### NEW QUESTION # 179

Which two are configured in the DMARC verification profile? (Choose two.)

- A. message action into an incoming or outgoing content filter
- **B. name of the verification profile**
- C. minimum number of signatures to verify
- D. ESA listeners to use the verification profile
- **E. message action to take when the policy is reject/quarantine**

**Answer: B,E**

Explanation:

A DMARC verification profile is a list of parameters that the mail flow policies of the appliance use for verifying DMARC. The name of the verification profile identifies the profile and allows you to apply it to different mail flow policies. The message action to take when the policy is reject/quarantine determines how the appliance handles messages that fail DMARC verification based on the sender's DMARC policy.
