

# Pass Guaranteed 1z0-076 - Unparalleled Latest Oracle Database 19c: Data Guard Administration Test Sample

What's more, part of that Test4Engine 1z0-076 dumps now are free: <https://drive.google.com/open?id=1ZgipkEdAcO4Ap9dzfTYx8FEPWUIMBWey>

For candidates who will attend the exam, choose the right 1z0-076 exam torrent is important. We offer you the 1z0-076 exam dumps to help you pass the exam. With the skilled experts to compile the exam dumps, the 1z0-076 study materials of us contain the questions and answers, and you can get enough practicing by using them. Besides, the 1z0-076 Soft test engine stimulates the real exam environment, and you can know what the real exam is like by using this version.

## Oracle 1z0-076 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"><li>Managing Physical Standby Files After Structural Changes on the Primary Database: The topic covers managing structural changes in the primary database and their impact on physical standby files.</li></ul>
Topic 2	<ul style="list-style-type: none"><li>Managing Oracle Net Services in a Data Guard Environment: The section focuses on Oracle Net Services and its role in Data Guard networking setup.</li></ul>
Topic 4	<ul style="list-style-type: none"><li>Using Oracle Active Data Guard: Supported Workloads in Read-Only Standby Databases: Here, the usage of physical standby databases for real-time queries is discussed.</li></ul>
Topic 5	<ul style="list-style-type: none"><li>Monitoring a Data Guard Broker Configuration: The topic covers the use of Enterprise Manager and DGMGRL to monitor Data Guard configurations and explains the various data protection modes available.</li></ul>
Topic 6	<ul style="list-style-type: none"><li>Patching and Upgrading Databases in a Data Guard Configuration: This section provides guidance on patching and upgrading databases in a Data Guard environment, along with performance optimization techniques and monitoring considerations.</li></ul>
Topic 8	<ul style="list-style-type: none"><li>Creating a Logical Standby Database: This topic guides users through the process of creating and managing a logical standby database, including SQL Apply filtering.</li></ul>
Topic 9	<ul style="list-style-type: none"><li>Backup and Recovery Considerations in an Oracle Data Guard Configuration: In this topic, Backup and recovery procedures in a Data Guard configuration are discussed, including RMAN backups, offloading to physical standby, and network-based recovery.</li></ul>

Topic 10	<ul style="list-style-type: none"> <li>• Creating a Data Guard Broker Configuration: This section delves into the practical aspects of creating and managing a Data Guard broker configuration, including command-line and Enterprise Manager approaches.</li> </ul>
Topic 11	<ul style="list-style-type: none"> <li>• Oracle Data Guard Broker Basics: An overview of the Data Guard broker, its architecture, components, benefits, and configurations, is provided here. It serves as an introduction to the tool used for managing Data Guard configurations.</li> </ul>
Topic 12	<ul style="list-style-type: none"> <li>• Oracle Data Guard Basics: This topic covers the essential architecture and concepts of Oracle Data Guard. It includes sub-topics such as the physical and logical standby database comparison, benefits of Data Guard, and its integration with multi-tenant databases.</li> </ul>

## Use Latest Oracle 1z0-076 Dumps And Gain Brilliant Scores

To avail of all these benefits you need to pass the 1z0-076 exam which is a difficult exam that demands firm commitment and complete 1z0-076 exam questions preparation. For the well and quick 1z0-076 exam dumps preparation, you can get help from Test4Engine 1z0-076 Questions which will provide you with everything that you need to learn, prepare and pass the Oracle Database 19c: Data Guard Administration certification exam.

## Oracle Database 19c: Data Guard Administration Sample Questions (Q99-Q104):

### NEW QUESTION # 99

Which three actions are performed by the START PLAN procedure of the DBMS ROLLING package?

- A. starting media recovery on all the Leading Group Standby databases
- B. converting the designated physical standby database into a logical standby database
- C. switching the primary database to the logical standby role
- D. creating a guaranteed restore point on the standby databases
- E. creating a guaranteed restore point on the primary database
- F. building a LogMiner dictionary on the primary database instance

**Answer: D,E,F**

Explanation:

The DBMS\_ROLLING package facilitates a rolling upgrade process across a Data Guard configuration. The START PLAN procedure in particular handles several critical actions, including:

Creating a guaranteed restore point on the standby databases (B): This ensures that the standby databases can be reverted to their state before the rolling upgrade process in case of any issues.

Building a LogMiner dictionary on the primary database instance (C): This is necessary for logical standby databases to interpret redo data during the SQL Apply process.

Creating a guaranteed restore point on the primary database (D): Similar to the standby databases, this ensures that the primary database can be reverted to a known good state if necessary.

Oracle Data Guard Concepts and Administration Guide

### NEW QUESTION # 100

Examine the fast-start failover configuration:

□

- A. The observer is running.
- B. If South\_Sales develops a problem and cannot be the target of a failover, the broker automatically changes the fast-start failover target to one of the other candidate targets.
- C. You must disable fast-start failover first to change the fast-start failover target to East sales.

- D. A failover may occur if the observer has lost connectivity to the primary database, even if the Fast-Start Failover target standby database has a good connection to the primary database
- E. The observer will initiate a failover when the primary database is unable to produce local archived redo log files.

**Answer: A,D,E**

#### NEW QUESTION # 101

Which three statements are true about Data Guard database modes and states?

- A. Force Logging Mode is not required for a primary database but is recommended.
- B. A primary database may ship redo directly to more than nine standby databases.
- C. The Primary Database can operate in noarchive log mode.
- D. A Logical Standby Database can be in MOUNT state while applying changes.
- E. Databases in a Data Guard Configuration need not operate in Flashback Logging mode.

**Answer: A,D,E**

#### NEW QUESTION # 102

Which TWO are benefits of using Transaction Guard in a Data Guard environment?

- A. It protects against recoverable errors during a planned or an unplanned outage of a primary database.
- B. It protects against user errors being replicated to standby databases.
- C. It provides application continuity by replaying transactions interrupted by a failover or a switchover
- D. It protects against logical corruptions being replicated to standby databases.
- E. It provides application continuity by rolling back uncommitted transactions interrupted by a failover or switchover.

**Answer: A,E**

Explanation:

Transaction Guard provides benefits in terms of transaction consistency and recovery in a Data Guard environment:

\* It provides application continuity by rolling back uncommitted transactions interrupted by a failover or switchover (B): Transaction Guard ensures that any uncommitted transactions at the time of an outage are rolled back consistently, thus preserving the integrity of the application's data and state.

\* It protects against recoverable errors during a planned or an unplanned outage of a primary database (D): Transaction Guard offers protection against errors that can occur during outages, allowing applications to resume operations more quickly and reliably after recovery. References:

#### NEW QUESTION # 103

Which THREE statements are TRUE about the supported workload in Active Data Guard standby databases?

- A. The DDL operations on private temporary tables are transparently redirected to the primary database.
- B. The DML operations on a standby can be transparently redirected to and run on the primary database
- C. Read-mostly reporting applications that use global temporary tables for storing temporary data can be offloaded.
- D. You might have to use sequences with global temporary tables to support read-mostly applications by using Active Data Guard.
- E. PL/SQL blocks that you run on Active Data Guard standby databases can be always redirected to and run on the primary database.

**Answer: B,C,D**

Explanation:

In an Oracle Active Data Guard environment:

\* B: Read-mostly reporting applications that utilize global temporary tables to store session-specific data can be effectively offloaded to an Active Data Guard standby database, reducing the load on the primary database.

\* C: Sequences can be used with global temporary tables on an Active Data Guard standby database to support certain types of read-mostly applications, though some restrictions on sequence use may apply.

\* E: In Oracle Database 19c and later, DML redirection allows DML operations performed on an Active Data Guard standby database to be transparently redirected to the primary database. This is part of the DML Redirection feature.

Option A is incorrect because not all PL/SQL blocks run on an Active Data Guard standby database can be redirected to the primary database. Some PL/SQL executions, specifically those that would attempt to make changes to the database, are not supported on the standby.

Option D is incorrect because DDL operations on private temporary tables are not redirected; instead, private temporary tables are session-specific and are not persisted on disk, so they do not generate redo and are not applicable to an Active Data Guard standby.

References: The behavior and capabilities of Active Data Guard standby databases are documented in the Oracle Data Guard Concepts and Administration guide and the Active Data Guard documentation.

## NEW QUESTION # 104

.....

The authoritative, efficient, and thoughtful service of 1z0-076 learning question will give you the best user experience, and you can also get what you want with our study materials. I hope our study materials can accompany you to pursue your dreams. If you can choose 1z0-076 test guide, we will be very happy. We look forward to meeting you. You can choose your favorite our study materials version according to your feelings. When you use 1z0-076 Test Guide, you can also get our services at any time. We will try our best to solve your problems for you. I believe that you will be more inclined to choose a good service product, such as 1z0-076 learning question. After all, everyone wants to be treated warmly and kindly, and hope to learn in a more pleasant mood.
