질문 # 51

You cannot generate invoices for a project expenditure item. After running the Generate Invoices program for a billable expenditure item and active contract, the process completes successfully but without any billing, and does not provide any error logs.

The program's processing summary is as follows:

Billing Event Errors 0

Ineligible Contracts 0

Successfully Billing Events Created 0

Ineligible Contract Lines 0

Billing Transaction Exception Errors 0

Ineligible Bill Plans 0

Billing Transaction Exception Warnings 0

Ineligible Associated Projects 0

Successful Billing Transactions 0

Ineligible Expenditure Items 0

Draft Invoice Exception Errors 0

Ineligible Events 0

Draft Invoice Exception Warnings 0

Successful Draft Invoices 0

What was the invoice method classification set to that caused this behavior? (Choose the best answer.)

- A. Percent Complete
- B. As Incurred
- C. Rate Based
- **D. Amount Based**

정답: D

설명:

Reference https://docs.oracle.com/cd/E51367_01/projectop_gs/OAPJB/F1087458AN139C2.htm Topic - Invoice and Revenue Rates: How They Are Determined Oracle Fusion Project Billing uses bill rates, burdening, and transfer price schedules to derive standard bill rates, multipliers, markups, and bases for calculating potential revenue when the revenue method classification on a revenue plan is as billed, as incurred, or rate based. Similarly, bill rates derive invoice amounts when the invoice method classification on a bill plan is rate based.

질문 # 52

Stigma consulting has been hired by a client to implement Project Management Cloud. Which role should they assign to a user for using the rapid implementation feature to set up the Project Financial Management offering by populating and uploading a Microsoft Excel workbook?

- A. Project Administrator
- **B. Project Integration Specialist**
- C. Project Executive
- D. Project Application Administrator

정답: B

설명:

The Project Integration Specialist role should be assigned to a user for using the rapid implementation feature to set up the Project Financial Management offering by populating and uploading a Microsoft Excel workbook. This role allows the user to access the Functional Setup Manager and perform the common setups for project costing and billing using predefined templates and spreadsheets. The user can also monitor and validate the setup data using reports and dashboards. Reference:

질문 # 53

Your client has implemented Oracle Cloud Applications with their United States business unit and United Kingdom business unit. After six months, they acquired another company in China and added a China business unit. A project accountant in your organization is authorized to access transactions for the US, UK, and China business units. The project accountant can see the transactions for the US and UK business units but not for the China business unit. Why is he not able to see the transactions for the China business unit? (Choose the best answer.)

- A. The JOB role relevant to the China business unit is not assigned to the project accountant.
- B. The US and UK business units are linked to different ledgers than the China business unit.
- C. The China business unit is associated with a different legal entity than the US and UK business units.
- D. The project accountant is not assigned to the external role that grants access to the China business unit.

정답: D

설명:

To access transactions for a business unit, the project accountant needs to be assigned to an external role that grants access to that business unit. The external role is defined by the security profile of the business unit and can be different for each business unit. The job role and the legal entity are not relevant for accessing transactions for a business unit. The ledger is relevant for accounting transactions, but not for project transactions. 질문 # 54

Your customer wants to automatically allocate unassigned asset lines and common costs across multiple assets based on the construction-in-process cost of each asset. Identify the asset allocation method that you must use as the default method while configuring project types to meet this requirement. (Choose the best answer.)

- A. Standard Unit Cost
- B. Estimated Cost
- C. Spread Evenly
- D. Actual Unit
- E. Current Cost

정답: E

설명:

Ref: <https://docs.oracle.com/en/cloud/saas/project-portfolio-management/19a/oapfm/project-foundation-configuration-manage-project-types.html#OAPFM220111> Topic - Asset Cost Allocation Methods: Explained The asset cost allocation method determines how indirect or common costs incurred on a project are allocated to multiple assets.

You can specify an asset cost allocation method to enable Oracle Fusion Project Costing to automatically allocate unassigned asset lines and common costs across multiple assets. Unassigned asset lines typically occur when more than one asset is assigned to an asset grouping level.

Projects and project templates inherit a default asset cost allocation method from the associated project type.

You can override the default at the project level. If you use capital events to allocate costs, then you can also override the asset cost allocation method at the event level.

The following table describes the available asset cost allocation methods.

Method

Basis of Cost Allocation

Actual Units

Number of units defined for each asset

Current Cost

Construction-in-process (CIP) cost of each asset

Estimated Cost

Estimated cost of each asset

Standard Unit Cost

Combination of the standard unit cost and the number of units defined for each asset Spread Evenly Equal allocation of cost to each asset

질문 # 55

You search for resources to fulfill a project resource request but are unable to proceed after receiving the following error message: "The search for resources cannot be completed because the project resource search index is not available. Contact your help desk." Identify the cause for this error message. (Choose the best answer.)

- A. The index has been built.
- B. The index is not in the process.
- **C. The index is in the process of being updated.**
- D. The most recent update of the index finished successfully.

정답: C

설명:

Ref: <https://docs.oracle.com/en/cloud/saas/project-portfolio-management/19a/fapfm/implementing-project-execution-management-applications.htm#FAPFM1724547> Topic - Submitting the Process to Maintain Project Resource Search Index: Procedure Submit the Maintain Project Resource Search Index job set to update the resources that appear on the Search and Evaluate Resources page when a resource manager searches for resources to fulfill project resource requests. The job set consists of a set of processes that facilitate efficient and rapid searches for qualified resources.

Resource managers can't search for resources or view resource details if the search index isn't available for a project resource request with qualifications or keywords. For project resource requests without qualifications and keywords, resource managers can search for and evaluate resources based on resource availability even if the search index isn't current or available.

Caution: The search index isn't available if the Maintain Project Resource Search Index job set process fails, or while the process is running.
