Exam GIAC GICSP Cost & Test GICSP Study Guide

Our GICSP practice materials not only reflect the authentic knowledge of this area, but contents the new changes happened these years. They are reflection of our experts' authority. By assiduous working on them, they are dependable backup and academic uplift. So our experts' team made the GICSP Guide dumps superior with their laborious effort. Of course the quality of our GICSP exam quiz is high.

As we all know, it is difficult to prepare the GICSP exam by ourselves. Excellent guidance is indispensable. If you urgently need help, come to buy our study materials. Our company has been regarded as the most excellent online retailers of the GICSP exam question. So our assistance is the most professional and superior. You can totally rely on our study materials to pass the exam. In addition, all installed GICSP study tool can be used normally. In a sense, our GICSP Real Exam dumps equal a mobile learning device. We are not just thinking about making money. Your convenience and demands also deserve our deep consideration. At the same time, your property rights never expire once you have paid for money. So the GICSP study tool can be reused after you have got the GICSP certificate. You can donate it to your classmates or friends. They will thank you so much.

GIAC GICSP Exam Questions Updates Are Free For one year

RealExamFree is an experienced website with great reputation which offering GIAC dumps torrent and professional explanations. Our GICSP test questions are created by our IT elites who pay great attention to the IT exam certification so we can ensure you the authority and reliability of our GICSP Practice Test.

GIAC Global Industrial Cyber Security Professional (GICSP) Sample Questions (Q31-Q36):

NEW QUESTION # 31
Which of the following statements best describes how a security policy should be written?

- A. It should be as comprehensive as possible, and cover every possible contingency in as much detail as possible
- B. It should be direct, concise, and easily readable by those expected to follow it
- C. It should be written in formal, legal language similar to a business contract between two parties

Answer: B

Explanation:
Comprehensive and Detailed Explanation From Exact Extract:
A good security policy must be clear, concise, and easily understandable by its audience (A). This ensures compliance and effective implementation.
Writing in overly formal legal language (B) can create barriers to understanding and practical application.
Overly comprehensive policies (C) risk being ignored due to complexity.
GICSP stresses that policies must balance completeness with clarity to be effective governance tools.

GICSP Official Study Guide, Domain: ICS Security Governance & Compliance NIST SP 800-100 (Information Security

NEW QUESTION # 32
What is a use of Network Address Translation?

- A. To maximize Firewall functionality
- B. To enable network routing functionality
- C. To hide private network addresses
- D. To make access list configuration easier

Answer: C

Explanation:
Network Address Translation (NAT) is a technique used to hide private IP addresses behind a public IP address (C), providing security benefits by masking internal network structures from external networks. NAT also conserves public IP addresses and allows multiple devices to share a single IP when accessing external networks.
While NAT affects routing and firewall operations, its primary purpose is not to maximize firewall functionality (A), simplify access lists (B), or enable routing (D), although it may indirectly impact these functions.
GICSP training stresses NAT as part of network security design, especially at the boundary between enterprise and ICS networks.

NEW QUESTION # 33
What type of physical security control is a procedure that details what to do in the event of a security breach?

- A. Detective
- B. Responsive
- C. Deterrence
- D. Delaying

Answer: B

Explanation:
Comprehensive and Detailed Explanation From Exact Extract:
A responsive physical security control refers to actions or procedures implemented after a security breach or incident has been detected, guiding how personnel should respond to minimize damage and restore security.
Procedures outlining what to do during or after a breach fall into this category (A).
Detective controls (B) identify or detect intrusions but do not specify response steps.
Delaying controls (C) slow down an attacker physically.
Deterrence (D) aims to discourage attackers from attempting intrusion.
GICSP emphasizes responsive controls as part of a comprehensive security program, including physical security incident response plans.
Reference:
GICSP Official Study Guide, Domain: ICS Security Governance & Compliance GICSP Training on Physical Security Controls and Incident Response

NEW QUESTION # 34
Which of the following types of network devices sends traffic only to the intended recipient node?

- A. Ethernet switch
- B. Wireless bridge
- C. Wireless access point
- D. Ethernet hub

Answer: A

Explanation:
An Ethernet switch (C) is a network device that learns the MAC addresses of connected devices and forwards packets only to the port associated with the destination node, reducing unnecessary traffic and improving security and efficiency.
An Ethernet hub (A) broadcasts incoming packets to all ports, not selectively.
A wireless access point (B) broadcasts signals to multiple wireless clients within range.
A wireless bridge (D) connects two network segments wirelessly but forwards traffic according to device types, not necessarily selectively to single nodes.
GICSP's ICS network segmentation and architecture domain underline the use of switches to limit broadcast traffic and reduce attack surfaces.
Reference:
GICSP Official Study Guide, Domain: ICS Security Architecture & Design
NIST SP 800-82 Rev 2, Section 5.5 (Network Architecture)
GICSP Training on Network Devices and Traffic Management

NEW QUESTION # 35

What should be considered when implementing fieldbus protocols over an Ethernet network?

- A. Communications between machines are limited to one host at a time
- B. Different protocols will need a bridging device to talk to each other
- C. Different protocols cannot route across the same infrastructure
- D. The network cannot be segmented into smaller subnets or VLANs

Answer: B

Explanation:
Fieldbus protocols are industrial communication standards used at lower levels of ICS networks. When these protocols are implemented over Ethernet, several considerations arise:
Different fieldbus protocols (such as Modbus TCP, PROFINET, EtherNet/IP) have unique data formats and communication methods.
To enable communication between devices using different protocols, a bridging device or gateway (D) is typically required to translate between protocol types.
Other options are incorrect because:
(A) Ethernet allows multiple hosts to communicate simultaneously.
(B) Different protocols can coexist on the same physical infrastructure using VLANs or other segmentation.
(C) Networks can and should be segmented into VLANs for security and performance.
GICSP covers these considerations in the ICS Security Architecture domain emphasizing protocol interoperability and network design.

NEW QUESTION # 36

......

As we all know, the main problem is a lack of quality and utility in the IT fields. How to get you through the GIAC GICSP certification exam? We need choose high quality learning information. RealExamFree will provide all the materials for the exam and free demo download. Like the actual certification exam, multiple choice questions (MCQ) help you pass the exam. Our GIAC GICSP Exam will provide you with exam questions with verified answers that reflect the actual exam. These questions and answers provide you with the experience of taking the actual test. High quality and Value for the GICSP Exam: 100% guarantee to Pass Your GIAC Business Solutions GICSP exam and get your GIAC Business Solutions Certification.
