ServiceNow Certified Implementation Specialist - Strategic Portfolio Management Sample Questions (Q110-Q115):

NEW QUESTION # 110

Which role provides edit access so users can generate capacity planning in Portfolio Planning Workspace?

- A. **sn_align_ws.spw_capacity_user**
- B. sn_align_ws.spw_financial_user
- C. sn_align_core.ap_read_only
- D. sn_align_ws.spw_capacity_read

Answer: A

NEW QUESTION # 111

Which role is needed to group related projects and demands?

- A. it_project_manager
- B. it_demand_manager
- **C. it_program_manager**
- D. it_project_user

Answer: C

Explanation:

According to the ServiceNow documentation¹, the **it_program_manager** role is needed to group related projects and demands. This role can create and manage programs, which are containers for projects and demands that share a common goal or objective. The other options are incorrect because:

B . **it_project_manager**: The **it_project_manager** role can create and manage projects, but not group them into programs².
 C . **it_demand_manager**: The **it_demand_manager** role can create and manage demands, but not group them into programs³.
 D . **it_project_user**: The **it_project_user** role can view and edit project tasks, but not create or manage projects, demands, or programs⁴.

[https://docs.servicenow.com/bundle/vancouver-it-business-management/concept/c_DemandManagement.html](https://docs.servicenow.com/bundle/vancouver-it-business-management/page/product/demand-management/concept/c_DemandManagement.html) 4: https://docs.servicenow.com/bundle/vancouver-it-business-management/page/product/project-management/reference/r_Roles.html

NEW QUESTION # 112

When creating a project from demand, what related records are moved and copied upon Project Creation?

- A. Resource Plan and Change Requests.
- B. Cost Plan and Assessment.
- **C. Resource Plan and Cost Plan.**
- D. Idea and Demand.

Answer: C

Explanation:

Explanation

According to the Create a customer project from a demand document, when creating a project from demand, the resource plan and the cost plan are moved and copied upon project creation. The resource plan defines the resources required for the project, and the cost plan defines the estimated and actual costs for the project. The other options are not correct, as they are not related records that are moved and copied upon project creation.

The change requests, the idea, and the demand are not moved or copied to the project, but they are linked to the project as references. The assessment is not a record that is associated with the project, but with the demand.

NEW QUESTION # 113

What is the default table that stores the idea categories that a user can select from when submitting an idea?

- A. dmn_demand
- B. im_idea_core
- C. im_category
- D. im_module

Answer: C

Explanation:

Explanation

According to the Category Configuration document, the default table that stores the idea categories that a user can select from when submitting an idea is im_category. This table contains the predefined categories for ideas, such as Business Process, Customer Service, or IT Service. The other options are not correct, as they are not the tables that store the idea categories. The dmn_demand table stores the demand records that are created from the approved ideas. The im_module table stores the idea modules that are used to group ideas by different criteria. The im_idea_core table stores the core fields of the idea records.

NEW QUESTION # 114

Which plugin activates the Ideas module to gather and evaluate ideas efficiently, and quickly identify ideas for implementation?

- A. Agile Development 2.0
- B. Test Management 2.0
- C. Ideation with PPM
- D. Resource Management

Answer: C

Explanation:

According to the Innovation Management document, the plugin that activates the Ideas module to gather and evaluate ideas efficiently, and quickly identify ideas for implementation is Ideation with PPM. This plugin enables the Innovation Management application, which allows organizations and employees to collect, vote on, manage, and collaborate on ideas from a centralized location. The other options are not correct, as they are not plugins that activate the Ideas module. Test Management 2.0 is a plugin that enables the Test Management 2.0 application, which allows users to create, plan, and execute tests. Agile Development 2.0 is a plugin that enables the Agile Development 2.0 application, which allows users to manage scrum or development work throughout the lifecycle. Resource Management is a plugin that enables the Resource Management application, which allows users to manage resource plans and allocations.

NEW QUESTION # 115

.....
