You have an option to try the Analytics-Con-201 exam dumps demo version and understand the full features before purchasing. You can download the full features of Analytics-Con-201 PDF Questions and practice test software right after the payment. Exam4Labs has created the three best formats of Analytics-Con-201 practice questions. These Formats will help you to prepare for and pass the Salesforce Analytics-Con-201 Exam. Analytics-Con-201 pdf dumps format is the best way to quickly prepare for the Analytics-Con-201 exam. You can open and use the Salesforce Certified CRM Analytics and Einstein Discovery Consultant pdf questions file at any place. You don't need to install any software.

Salesforce Certified CRM Analytics and Einstein Discovery Consultant Analytics-Con-201 practice test software always keeps track of previous Analytics-Con-201 practice exam attempts and shows the changes and improvements in every attempt. All the Salesforce Certified CRM Analytics and Einstein Discovery Consultant questions given in Salesforce Certified CRM Analytics and Einstein Discovery Consultant pdf questions file and practice test software are very similar to the actual Salesforce Certified CRM Analytics and Einstein Discovery Consultant Analytics-Con-201 Exam Questions. So it eliminates the hassle of Analytics-Con-201 exam fear. The desktop Analytics-Con-201 practice exam software is compatible with windows based computers. There are many customers support team of Exam4Labs always to fix any problems.

Dumps Analytics-Con-201 Free Download - Valid Analytics-Con-201 Exam Experience

By using our Analytics-Con-201 study engine, your abilities will improve and your mindset will change. Who does not want to be a positive person? This is all supported by strength! In any case, a lot of people have improved their strength through Analytics-Con-201 Exam simulating. They now have the opportunity they want. Whether to join the camp of the successful ones, purchase Analytics-Con-201 learning braindumps, you decide for yourself!

Salesforce Certified CRM Analytics and Einstein Discovery Consultant Sample Questions (Q98-Q103):

NEW QUESTION # 98

In Data Alerts, a field named Region is 96.5% North America. The consultant believes that this is an important field since the majority of sales is in the North American market. What is the appropriate action?

- A. Append more rows of data with "other values of Region" to balance the dataset properly.
- B. Choose the recommended action "keep only North America" and exclude all of the other rows.
- C. Understand if client should only "focus on North America" or drop the field, as it does not have valuable information.

Answer: C

NEW QUESTION # 99

Cloud Kicks' Salesforce org has multiple currencies enabled. This company's business intelligence team uses CRM Analytics to build a dataflow/recipe that creates a dataset, "OpportunityDataSet", which is populated with data extracted from Opportunity. One of the extracted fields is the standard field, Amount.

Which currency will the Amount values be shown in "OpportunityDataSet"?

- A. the connected user's currency
- B. In the currency that is set on the "currency" attribute.
- C. In the integration user's currency

Answer: C

Explanation:

When a dataset like "OpportunityDataSet" is populated through a dataflow or recipe in CRM Analytics, the currency values (such as the standard field "Amount") will be displayed in the currency of the integration user unless there is specific currency conversion logic set up within the dataset or recipe. The integration user is the user whose credentials are used to run the dataflow and extract data, and their currency setting will dictate how numeric currency values are displayed unless overridden.

NEW QUESTION # 100

Universal Containers' CRM Analytics team is building a dashboard with two widgets.

1. List widget associated to the query "Type_2" and grouped by the dimension "Type" (multi-selection)
2. Donut chart widget associated to the query "Step_pie_3" and grouped by the dimension "Type" The team wants to use bindings/interactions so any selection in the List widget will filter the Donut chart. The queries use different datasets, and users should be able to choose more than one Type (multi-selection).

What is the right syntax for the binding/interaction?

- A.

The screenshot shows a configuration field for a widget. The label is "filters:". The value is a JSON array containing an object with "Type" as a key and a function call as a value. The function call is "{cell(Step_pie_3.selection, 0, 'Type').asObject()}".

- B.

The screenshot shows a configuration field for a widget. The label is "filters:". The value is a JSON array containing an object with "Type" as a key and a function call as a value. The function call is "{cell(Step_pie_3.selection, 0, 'Type').asObject()}".

- C.

Answer: C

Explanation:

For the given requirement where a selection in a list widget needs to filter data displayed on a donut chart, and considering the list allows for multi-selection of the 'Type', the correct binding/interaction would be to use a syntax that captures the multi-select aspect and passes it appropriately. The right syntax, as indicated in Option A, looks like this:

```
"{{column(Type_2.selection, ['Type\']).asObject()}}"
```

This syntax ensures:

* Multi-selection: The column() function in combination with .asObject() ensures that multiple selected values from the 'Type_2' query can be passed as an object, which the donut chart can utilize to filter its content.

* Correct Data Type Handling: By using .asObject(), the binding ensures the data passed between widgets maintains the correct structure expected by the CRM Analytics dashboard, thereby ensuring accurate filtering.

NEW QUESTION # 101

Universal Containers builds a new sales dashboard and wants to make sure account managers can access the dashboard while traveling.

What should the consultant consider doing in this process?

- A. Make sure the dashboard automatically is optimized for mobile viewing.
- **B. A Set the optimal Dashboard width for the Phone layout to get a more accurate preview.**
- C. Enable mobile optimization in the analytics settings under Setup.

Answer: B

NEW QUESTION # 102

A CRM Analytics consultant has been asked to bring data from an external database as well as five external Salesforce environments into CRM Analytics. Twenty-five objects have been enabled from the local Salesforce connector.

The requirements are:

* 10 objects should be enabled from an external database

* 12 objects each from three of the external Salesforce environments

* 15 objects each from the remaining two external Salesforce environments The consultant estimates each connector will, per object, bring between 1,000 and 1 million rows of data.

Which limit will be exceeded?

- **A. Total number of enabled objects**
- B. Salesforce external connector number of synced rows
- C. Storage rows of data

Answer: A

Explanation:

In evaluating the scenario presented where multiple external sources and objects are being integrated into CRM Analytics, we need to consider the total number of enabled objects across all connections. Here's a breakdown:

* 10 objects from an external database

* 12 objects each from three external Salesforce environments, totaling 36 objects

* 15 objects each from two external Salesforce environments, totaling 30 objects

* 25 objects already enabled from the local Salesforce connector

This brings us to a total of 101 objects enabled, which may exceed typical limits on the number of objects that can be enabled in a CRM Analytics environment, depending on the specific Salesforce licensing and platform limits.

NEW QUESTION # 103

.....

It is believed that employers nowadays are more open to learn new knowledge, as they realize that Salesforce certification may be conducive to them in refreshing their life, especially in their career arena. A professional Salesforce certification serves as the most powerful way for you to show your professional knowledge and skills. For those who are struggling for promotion or better job, they should figure out what kind of Analytics-Com-201 Test Guide is most suitable for them. However, some employers are
