Palo Alto Networks Cybersecurity Practitioner Sample Questions (Q179-Q184):

NEW QUESTION # 179

Data Loss Prevention (DLP) and Cloud Access Security Broker (CASB) fall under which Prisma access service layer?

- A. Security
- B. Network
- C. Management
- D. Cloud

Answer: A

Explanation:

A SASE solution converges networking and security services into one unified, cloud-delivered solution (see Figure 3-12) that includes the following:

* Networking

Software-defined wide-area networks (SD-WANs)

Virtual private networks (VPNs)

Zero Trust network access (ZTNA)

Quality of Service (QoS)

* Security

Firewall as a service (FWaaS)

Domain Name System (DNS) security

Threat prevention

Secure web gateway (SWG)

Data loss prevention (DLP)

Cloud access security broker (CASB)

NEW QUESTION # 180

What are two key characteristics of a Type 1 hypervisor? (Choose two.)

- A. runs within an operating system
- B. is hardened against cyber attacks
- C. runs without any vulnerability issues
- D. allows multiple, virtual (or guest) operating systems to run concurrently on a single physical host computer

Answer: B,D

Explanation:

A Type 1 hypervisor, also known as a bare-metal hypervisor, is a software layer that runs directly on the hardware of a physical host computer, without requiring an underlying operating system. A Type 1 hypervisor can create and manage multiple isolated virtual machines (VMs), each with its own virtual (or guest) operating system and applications. A Type 1 hypervisor is hardened against cyber attacks, as it has a smaller attack surface and fewer vulnerabilities than a Type 2 hypervisor, which runs within an operating system. A Type 1 hypervisor also offers better performance, scalability, and resource utilization than a Type 2 hypervisor. NEW QUESTION # 181

How does Prisma SaaS provide protection for Sanctioned SaaS applications?

- A. Prisma SaaS does not provide protection for Sanctioned SaaS applications because they are secure
- B. Prisma SaaS connects to an organizations internal print and file sharing services to provide protection and sharing visibility
- C. Prisma access uses Uniform Resource Locator (URL) Web categorization to provide protection and sharing visibility
- D. Prisma SaaS connects directly to sanctioned external service providers SaaS application service to provide protection and sharing visibility

Answer: D

Explanation:

Prisma SaaS connects directly to the applications themselves, therefore providing continuous silent monitoring of the risks within the sanctioned SaaS applications, with detailed visibility that is not possible with traditional security solutions.

NEW QUESTION # 182

On an endpoint, which method is used to protect proprietary data stored on a laptop that has been stolen?

- A. periodic data backups
- B. full-disk encryption
- C. operating system patches
- D. endpoint-based firewall

Answer: B

Explanation:

Full-disk encryption is a method of protecting data on a laptop that has been stolen by encrypting the entire hard drive, making it unreadable without the correct password or key. This prevents unauthorized access to the proprietary data stored on the laptop, even if the thief removes the hard drive and connects it to another device. Full-disk encryption can be enabled using built-in features such as BitLocker on Windows or FileVault on macOS, or using third-party software such as Absolute Home & Office12.

NEW QUESTION # 183

Which NGFW feature is used to provide continuous identification, categorization, and control of known and previously unknown SaaS applications?

- A. Device-ID
- B. User-ID
- C. Content-ID
- D. App-ID

Answer: D

Explanation:

App-ID™ technology leverages the power of the broad global community to provide continuous identification, categorization, and granular risk-based control of known and previously unknown SaaS applications, ensuring new applications are discovered automatically as they become popular.

NEW QUESTION # 184

.....

There are three versions for Cybersecurity-Practitioner exam braindumps, all three have free demo for you to have a try. Cybersecurity-Practitioner PDF materials are printable, and instant download.
