P.S. Free 2026 RedHat EX280 dumps are available on Google Drive shared by GuideTorrent: <https://drive.google.com/open?id=1GncHw4zloGNFxfXZHXa5dTqgn4JSEvZ>

Keeping the dynamic Red Hat Certified Specialist in OpenShift Administration exam (EX280) exam content in mind, we provide updated and reliable EX280 test material. We also offer free RedHat Dumps updates for up to 1 year after your purchase. We only provide cost-effective Red Hat Certified Specialist in OpenShift Administration exam (EX280) exam practice material. A 24/7 customer service can also help you in case of any problem. Don't wait for your success if the best Red Hat Certified Specialist in OpenShift Administration exam (EX280) exam preparation material is available on our platform. You can get actual Red Hat Certified Specialist in OpenShift Administration exam (EX280) exam questions and prepare for your test in a short time. If you have any issue, please contact our customer support.

RedHat EX280 Exam Syllabus Topics:

Section	Weight	Objectives
Topic 1: Work with Kubernetes Resources	25%	- Query, filter and modify resource attributes 1. Use labels, selectors and annotations 2. Import/export and configure manifests
		- Manage configuration data 1. Create and use ConfigMaps 2. Create and use Secrets

		- Configure identity providers • 1. Set up HTTPasswd and other providers
Topic 2: Manage Authentication and Authorization	15%	- Manage users, groups and permissions • 1. Assign roles and adjust access rights • 2. Create/delete users and modify passwords - Expose services externally
Topic 3: Configure Networking and Access	15%	• 1. Create and manage routes • 2. Control ingress and network policies - Troubleshoot software-defined networking - Work with container images • 1. Locate, identify and examine images • 2. Manage image streams and registries
Topic 4: Manage OpenShift Container Platform	20%	- Manage and configure clusters via web console and CLI • 1. Create and delete projects • 2. Monitor events, alerts and logs • 3. Examine cluster status and resources - Deploy applications from multiple sources • 1. Use Kustomize and overlays • 2. Use YAML manifests, templates and Helm charts
Topic 5: Deploy and Manage Applications	25%	- Manage application lifecycles • 1. Update and rollback deployments • 2. Manage replica sets and scaling

Three Best RedHat EX280 Exam Dumps Formats - Pass Exam With Ease

Several advantages we now offer for your reference. On the one hand, our EX280 learning questions engage our working staff in understanding customers' diverse and evolving expectations and incorporate that understanding into our strategies, thus you can 100% trust our EX280 Exam Engine. On the other hand, the professional EX280 study materials determine the high pass rate. According to the research statistics, we can confidently tell that 99% candidates have passed the EX280 exam.

RedHat Red Hat Certified Specialist in OpenShift Administration exam Sample Questions (Q20-Q25):

NEW QUESTION # 20

Configure an identity provider

Configure your OpenShift cluster to use an HTTPasswd identity provider with the following requirements:

The name of the identity provider is: ex280-httpasswd The name of the secret is: ex280-idp-secret The user account armstrong=indionce The user account collins=veraster The user account aldrin=roonkere The user account jobs=sestiver The user account wozniak=glegunge

Answer:

Explanation:

See the solution below in Explanation.

Explanation:

Solution:

```
$ sudo yum install httpd-tools -y
$ httpasswd -c -B -b httpasswd-file-upload armstrong indionce
$ httpasswd -B -b httpasswd-file collins veraster
$ httpasswd -B -b httpasswd-file aldrin roonkere
$ httpasswd -B -b httpasswd-file jobs sestiver
$ httpasswd -B -b httpasswd-file wozniak glegunge
$ oc create secret generic ex280-idp-secret --from-file
httpasswd=httpasswd-file -n openshift-config
$ oc get oauth/cluster -o yaml > oauth.yaml
$ vim oauth.yaml
$
```

esc-- > type :set paste -- > enter -- > insert -- > then paste the content for correct indent pasting spec:

identityProviders:

- name: ex280-httpasswd mappingMethod: claim type: HTTPasswd httpasswd:

fileData:

name: ex280-idp-secret

\$ oc replace -f oauth.yaml

\$ oc login -u armstrong -p indionce

\$ oc login -u collins -p veraster

\$ oc login -u aldrin roonkere

\$ oc login -u jobs sestiver

\$ oc login -u wozniak -p glegunge

#This below part of operation is completely optional and done just for handy login purpose

\$ alias _kube="oc login -u kubeadmin -p \${kube_pass} \${api_url}"

\$ alias _armstrong="oc login -u armstrong -p \${armstrong}

\${api_url}"

\$ alias _collins="oc login -u collins -p \${collins} \${api_url}"

\$ alias _aldrin="oc login -u aldrin -p \${aldrin} \${api_url}"

\$ alias _jobs="oc login -u jobs -p \${jobs} \${api_url}"

\$ alias _wozniak="oc login -u wozniak -p \${wozniak} \${api_url}"

\$ _armstrong; _armstrong; _collins; _aldrin; _jobs; _wozniak;

NEW QUESTION # 21

Create Service Account in QED

Task information Details:

Switch to project qed .

Create service account project1-sa .

Grant the anyuid SCC to that service account.

Answer:

Explanation:

See the solution below in Explanation.

Explanation:

Solution:

* Switch to the project:

oc project qed

* Create the service account:

oc create serviceaccount project1-sa -n qed

* Grant the SCC:

oc adm policy add-scc-to-user anyuid -z project1-sa -n qed

* Verify:

oc get sa project1-sa -n qed

oc adm policy who-can use scc anyuid

Why this matters:

* anyuid allows containers to run with arbitrary user IDs when an application requires it.

* This is a common administrative task in OpenShift for third-party container images.

This task validates service account creation and SCC assignment.

NEW QUESTION # 22

Create Resource Quota for Project Rocky

Task information Details:

Use project rocky and create a quota named rocky-quota with limits for CPU, memory, pods, services, replication controllers, and secrets.

Answer:

Explanation:

See the solution below in Explanation.

Explanation:

Solution:

* Ensure the project exists and switch to it:

```
oc new-project rocky
```

```
oc project rocky
```

* Create the quota:

```
oc create quota rocky-quota \
```

```
--hard=limits.cpu=2,limits.memory=1Gi,pods=3,services=6,replicationcontrollers=6,secrets=6
```

* Verify:

```
oc get resourcequota -n rocky
```

```
oc describe quota rocky-quota -n rocky
```

Notes:

* The lab text uses `cpu=2,memory=1G` and `secret=6`; in real OpenShift usage, the more reliable forms are `limits.cpu`, `limits.memory`, and `secrets`.

* If the exam specifically expects the exact resource names shown in the lab environment, use what the cluster accepts.

This task checks quota enforcement and namespace resource governance.

NEW QUESTION # 23

Configure cluster permissions

Configure your OpenShift cluster to meet the following requirements: The user account jobs can perform cluster administration tasks

The user account wozniak can create projects The user account wozniak cannot perform cluster administration tasks The user

account armstrong cannot create projects The user account kubeadmin is not present

Answer:

Explanation:

See the solution below in Explanation.

Explanation:

Solution:

```
$ oc adm policy add-cluster-role-to-user cluster-admin jobs
```

```
$ oc adm policy remove-cluster-role-from-group self-provisioner
```

```
system:authenticated:oauth
```

```
$ oc adm policy add-cluster-role-to-user self-provisioner wozniak
```

```
$ oc delete secret kubeadmin -n kube-system
```

NEW QUESTION # 24

Autoscale of Pods

Task information Details:

Create an HPA for httpd with `min=2` , `max=9` , and CPU target 60% .

Set resource requests on the httpd deployment so autoscaling can function properly.

Answer:

Explanation:

See the solution below in Explanation.

Explanation:

Solution:

* Set resource requests on the deployment:
 oc set resources deployment httpd --requests=cpu=50m,memory=100Mi
 * Create the HPA:
 oc autoscale deployment httpd --min=2 --max=9 --cpu-percent=60
 * Verify:
 oc get hpa
 oc describe hpa httpd
 oc get deployment httpd -o yaml
 Why resource requests matter:
 * HPA CPU utilization is calculated against requested CPU.
 * Without requests, percentage-based autoscaling is incomplete or invalid.
 This task focuses on autoscaling prerequisites and policy creation.

NEW QUESTION # 25

.....

Considering all customers' sincere requirements, EX280 test question persist in the principle of "Quality First and Clients Supreme" all along and promise to our candidates with plenty of high-quality products, considerate after-sale services as well as progressive management ideas. To be out of the ordinary and seek an ideal life, we must master an extra skill to get high scores and win the match in the workplace. Our EX280 Exam Question can help make your dream come true. What's more, you can have a visit of our website that provides you more detailed information about the EX280 guide torrent.
