

# Mule-Arch-201熱門考題和資格考試中的領先提供平臺 & Salesforce Certified MuleSoft Platform Architect

BONUS!!! 免費下載Testpdf Mule-Arch-201考試題庫的完整版: <https://drive.google.com/open?id=1MTN1QYUeowEhbgX4FnjJLtlbm74TmUn>

如果你是找考試資料或學習書籍? 試試我們的免費的 Salesforce 的 Mule-Arch-201 考題吧! 這是一個免費試用考試 PDF 測試版本的考題, 你可以類比真實的考試情景, 可以快速讓你掌握 Salesforce 的基礎知識。我們的 Mule-Arch-201 權威考試題庫軟體是 Salesforce 認證廠商的授權產品。正確率100%, 讓你一次性輕鬆通過 Salesforce Mule-Arch-201 考試。

Testpdf考題大師始終致力與為客戶提供 Mule-Arch-201 認證的全真考題及認證學習資料, 該模擬試題可以在不同的電腦中使用, 這對於考生來說沒有任何限制。我們的 Mule-Arch-201 權威考試題庫軟體是 Salesforce 認證廠商的授權產品, 全新的收錄了 Salesforce 認證考試的所有試題, 並根據認證的不斷變化而動態更新, 參考資料的考試試題都是最新推出的。能夠幫助你一次通過 Salesforce Mule-Arch-201 認證考試。

>> Mule-Arch-201熱門考題 <<

熱門的 Mule-Arch-201 熱門考題通過 Salesforce Certified MuleSoft Platform Architect - 專業人士推薦

Salesforce 的 Mule-Arch-201 考古題覆蓋了最新的考試指南，根據真實的 Mule-Arch-201 考試真題編訂，確保每位考生順利通過 Mule-Arch-201 考試。如果在考試過程中變題了，考生可以享受免費更新一年的考題服務，保障了考生的權利。Mule-Arch-201 考試適合於 Salesforce 技術人士開發，目的是為了測驗考生基於各種平臺的設計和開發應用知識技能。考生要考取 Mule-Arch-201 認證，必須要擁有兩年開發技術領域的能力。

## 最新的 Salesforce MuleSoft Mule-Arch-201 免費考試真題 (Q80-Q85):

### 問題 #80

An API implementation is updated. When must the RAML definition of the API also be updated?

- A. When the API implementation changes the structure of the request or response messages
- B. When the API implementation is optimized to improve its average response time
- C. When the API implementation is migrated from an older to a newer version of the Mule runtime
- D. When the API implementation changes from interacting with a legacy backend system deployed on-premises to a modern, cloud-based (SaaS) system

答案: A

解題說明:

Correct Answer: When the API implementation changes the structure of the request or response messages

\*\*\*\*\*

>> RAML definition usually needs to be touched only when there are changes in the request/response schemas or in any traits on API.

>> It need not be modified for any internal changes in API implementation like performance tuning, backend system migrations etc..

### 問題 #81

A Mule application exposes an HTTPS endpoint and is deployed to the CloudHub Shared Worker Cloud. All traffic to that Mule application must stay inside the AWS VPC.

To what TCP port do API invocations to that Mule application need to be sent?

- A. 0
- B. 1
- C. 2
- D. 3

答案: A

解題說明:

Correct Answer: 8082

\*\*\*\*\*

>> 8091 and 8092 ports are to be used when keeping your HTTP and HTTPS app private to the LOCAL VPC respectively.

>> Above TWO ports are not for Shared AWS VPC/ Shared Worker Cloud.

>> 8081 is to be used when exposing your HTTP endpoint app to the internet through Shared LB

>> 8082 is to be used when exposing your HTTPS endpoint app to the internet through Shared LB So, API invocations should be sent to port 8082 when calling this HTTPS based app.

### 問題 #82

Which two statements are true about the technology architecture of an Anypoint Virtual Private Cloud (VPC)?

Choose 2 answers

- A. Anypoint VPC is responsible for load balancing the applications
- B. Round-robin load balancing is used to distribute client requests across different applications
- C. By default, HTTP requests can be made from the public internet to workers at port 6091
- D. Ports 8081 and 8082 are used

- E. CIDR blocks are used

答案: C,E

解題說明:

An Anypoint Virtual Private Cloud (VPC) provides a secure and private networking environment for MuleSoft applications, using specific architectural elements:

CIDR Blocks:

Anypoint VPCs utilize CIDR blocks to define IP ranges, allowing organizations to control and segment the VPC's IP address space.

Port 6091 for HTTP Requests:

By default, HTTP requests can be made to workers on port 6091 from the public internet, providing an accessible entry point unless additional restrictions are applied.

of Correct Answers (B, E):

CIDR blocks enable IP range management for VPCs, and port 6091 is the default public entry port, which is part of Anypoint VPC's default settings.

of Incorrect Options:

Option A (Ports 8081 and 8082) is incorrect; these are not default public ports for Anypoint VPC.

Option C (responsible for load balancing) is incorrect as load balancing requires a separate Dedicated Load Balancer (DLB).

Option D (round-robin load balancing) applies to DLBs, not directly to VPCs.

Reference

For more on VPC setup and networking, refer to MuleSoft documentation on VPC configurations and default port settings.

### 問題 #83

What best describes the Fully Qualified Domain Names (FQDNs), also known as DNS entries, created when a Mule application is deployed to the CloudHub Shared Worker Cloud?

- A. The FQDNs are determined by the application name chosen, IRRESPECTIVE of the region
- B. A fixed number of FQDNs are created, IRRESPECTIVE of the environment and VPC design
- C. The FQDNs are determined by both the application name and the Anypoint Platform organization
- D. The FQDNs are determined by the application name, but can be modified by an administrator after deployment

答案: A

解題說明:

Correct Answer: The FQDNs are determined by the application name chosen, IRRESPECTIVE of the region

\*\*\*\*\*

>> When deploying applications to Shared Worker Cloud, the FQDN are always determined by application name chosen.

>> It does NOT matter what region the app is being deployed to.

>> Although it is fact and true that the generated FQDN will have the region included in it (Ex: exp-salesorder-api.aus1.cloudhub.io), it does NOT mean that the same name can be used when deploying to another CloudHub region.

>> Application name should be universally unique irrespective of Region and Organization and solely determines the FQDN for Shared Load Balancers.

### 問題 #84

What is true about where an API policy is defined in Anypoint Platform and how it is then applied to API instances?

- A. The API policy is defined in Runtime Manager as part of the API deployment to a Mule runtime, and then ONLY applied to the specific API Instance
- B. The API policy is defined in API Manager and then automatically applied to ALL API instances
- C. The API policy is defined in API Manager, and then applied to ALL API instances in the specified environment
- D. The API policy is defined in API Manager for a specific API Instance, and then ONLY applied to the specific API instance

答案: D

解題說明:

Correct Answer: The API policy is defined in API Manager for a specific API instance, and then ONLY applied to the specific API instance.

\*\*\*\*\*

>> Once our API specifications are ready and published to Exchange, we need to visit API Manager and register an API instance for each API.  
>> API Manager is the place where management of API aspects takes place like addressing NFRs by enforcing policies on them.  
>> We can create multiple instances for a same API and manage them differently for different purposes.  
>> One instance can have a set of API policies applied and another instance of same API can have different set of policies applied for some other purpose.  
>> These APIs and their instances are defined PER environment basis. So, one need to manage them seperately in each environment.  
>> We can ensure that same configuration of API instances (SLAs, Policies etc..) gets promoted when promoting to higher environments using platform feature. But this is optional only. Still one can change them per environment basis if they have to.  
>> Runtime Manager is the place to manage API Implementations and their Mule Runtimes but NOT APIs itself. Though API policies gets executed in Mule Runtimes, We CANNOT enforce API policies in Runtime Manager. We would need to do that via API Manager only for a cherry picked instance in an environment.  
So, based on these facts, right statement in the given choices is - "The API policy is defined in API Manager for a specific API instance, and then ONLY applied to the specific API instance".

## 問題 #85

.....

儘管當時在市場上有許多 Salesforce 方面的書籍，但沒有一本是百分之百介紹實際操作的。許多關於 Salesforce 配置方面的書也只包括配置的某些部分，並不提供足夠的信息使讀者能完整地建立和測試配置。而 Testpdf 的 Mule-Arch-201 考題助您一次輕鬆通過 Salesforce 考試。我們提供的 Mule-Arch-201 考古題含蓋了當前最新的真實考題，並且全部附有正確答案。如果您正在準備考試，它將是最佳的學習助手，是您通過考試取得 Mule-Arch-201 認證的捷徑。

**Mule-Arch-201考古題更新:** <https://www.testpdf.net/Mule-Arch-201.html>

我們的Salesforce的Mule-Arch-201考試認證培訓資料包含試題及答案，這些資料是由我們資深的IT專家團隊通過自己的知識及不斷摸索的經驗而研究出來的，它的內容有包含真實的考試題，如果你要參加Salesforce的Mule-Arch-201考試認證，選擇Testpdf是無庸置疑的選擇，對於Mule-Arch-201考試準備要有明確的目標，很多人在練習Mule-Arch-201問題集時，在看到某一道考題後感覺很熟悉，在頭腦裡擬一遍解題思路就結束了，通過該考試需要高度專業的知識，如果你還欠缺這方面的知識，Testpdf Mule-Arch-201考古題更新可以為你提供知識的來源，Salesforce Mule-Arch-201熱門考題 這科考試要求考生在90分鐘完成70道試題，建議考生選擇英語為考試語種，你有沒有用過Testpdf Mule-Arch-201考古題更新的IT考試考古題，或者你有沒有聽到周圍的人提到過Testpdf Mule-Arch-201 考古題更新的考試資料呢？

可緊接著，便臉色發苦起來，在八大勢力眼裏，妳可是大惡中的大惡，我們的Salesforce的Mule-Arch-201考試認證培訓資料包含試題及答案，這些資料是由我們資深的IT專家團隊通過自己的知識及不斷摸索的經驗而研究出來的，它的內容有包含真實的考試題，如果你要參加Salesforce的Mule-Arch-201考試認證，選擇Testpdf是無庸置疑的選擇。

## 正確的Mule-Arch-201熱門考題 & Pass-Sure Salesforce認證培訓 - 已驗證的Salesforce Certified MuleSoft Platform Architect

對於Mule-Arch-201考試準備要有明確的目標，很多人在練習Mule-Arch-201問題集時，在看到某一道考題後感覺很熟悉，在頭腦裡擬一遍解題思路就結束了，通過該考試需要高度專業的知識，如果你還欠缺這方面的知識，Testpdf可以為你提供知識的來源。

這科考試要求考生在90分鐘完成70道試題，建議考生選擇英語為考試語種。
