無與倫比的PL-200软件版和保證Microsoft PL-200考試成功與高效的PL-200考古題分享

雖然大多數人會覺得通過Microsoft PL-200認證考試很難。但是如果你選擇了我們的KaoGuTi，你會覺得拿到Microsoft PL-200認證考試的證書不是那麼難了。KaoGuTi的訓練工具很全面，包含線上服務和售後服務。我們的線上服務是研究資料，它包含類比訓練題，和Microsoft PL-200認證考試相關的考試練習題和答案。售後服務是KaoGuTi不僅能提供最新的Microsoft PL-200認證考試練習題和答案以及動態消息，還不斷的更新考試練習題和答案和裝訂。

Microsoft PL-200（Microsoft Power Platform 功能顧問）認證考試是一項業界認可的認證，驗證了設計、配置和部署Power Platform解決方案所需的技能和知識。Power Platform是一套工具，包括Power Apps、Power BI、Power Automate 和 Power Virtual Agents，使組織能夠構建自定義應用程序、自動化業務流程並從數據中獲取見解。Microsoft Power Platform 功能顧問負責理解業務需求，將其轉化為技術解決方案並為客戶提供價值。

最新的 Microsoft Power Platform PL-200 免費考試真題 (Q69-Q74):

問題 #69

You have a model-driven app. You create five Microsoft Excel templates for analyzing customer data.

Four of the templates must be available to all users. The remaining template must be available only to you. You configure the appropriate security roles for users.

You need to determine how to upload the Excel templates.

Which method should you use? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Availability

Method

Available to everyone

- In the Settings menu, select Document Templates.
- In the view for the email records, select Excel Templates.
- In the Settings menu, select Email Templates.

Available only to yourself

- In the Settings menu, select Document Templates.
- In the view for the email records, select Excel Templates.
- In the Settings menu, select Email Templates.

答案:

解題說明:

Availability

Method

Available to everyone

- In the Settings menu, select Document Templates.
- In the view for the email records, select Excel Templates.
- In the Settings menu, select Email Templates.

Available only to yourself

- In the Settings menu, select Document Templates.
- In the view for the email records, select Excel Templates.
- In the Settings menu, select Email Templates.

問題 #70

You are a Dynamics 365 Customer Service administrator.

Users report that the main form does not display data from other entities or allow them to edit data from other entities.

You need to embed information from other entities in the form and allow users to edit the data.

Which actions should you perform? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Requirement	Action
Edit data	- Add a mobile form - Add a quick create form - Add a sub-grid - Add a virtual entity
View data	- Add a reference panel - Add a quick view

答案:

解題說明:

Explanation

Graphical user interface, text, application, chat or text message Description automatically generated

Box 1: Add a quick create form

With quick create forms, your app can have a streamlined data entry experience with full support for logic defined by form scripts and business rules.

Box 2: Add a quick view

A quick view form can be added to another form as a quick view control. It provides a template to view information about a related entity record within a form for another entity record. This means your app users do not need to navigate to a different record to see the information needed to do their work.

問題 #71

A company uses Power Apps.

The company plans to create a canvas app that uses a responsive design.

You need to configure the app.

Which two actions should you perform? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. Enable the lock orientation setting.
- B. Disable the Scale to fit setting.
- C. Configure the height and width properties by using drag handles.
- D. Configure the height and width properties by using a formula.

答案：B,D

問題 #72

You are a Dynamics 365 Customer Service system administrator. You create an app for the sales team. Members of the sales team cannot access the app. You need to ensure that sales team members can access the app. Where should you configure app permissions?

- A. Security Roles
- B. Dynamics administration center
- C. Dynamics 365 home
- D. Manage Roles

答案：D

解題說明：

Explanation

References:

<https://docs.microsoft.com/en-us/dynamics365/customer-engagement/customize/manage-access-apps-security-ro> Manage access to apps by using security roles.

You can choose what users see and access from the My Apps page or the Customer Engagement home page by giving app access to specific security roles. Users will have access to apps based on the security roles they're assigned to.

1. Go to Settings > My Apps.
2. In the lower-right corner of the app tile you want to manage access for, select More options (...), and then select Manage Roles.
3. Enter the following in the Manage Roles dialog box:
 - a) App URL Suffix
 - b) Roles
 - c) Select Save.
4. Refresh the My Apps page.
5. Go to the Apps Being Edited view, and publish the app again.

問題 #73

You are designing a chatbot for a sports outlet.

You need to complete the chatbot.

Which features should you use? To answer, drag the appropriate features to the correct requirements. Each feature may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE Each correct selection is worth one point.

Features

Answer Area

Topics
Entities
Variables
Flows

Requirement

Enable the chatbot to relate to a real-world object or topic in a dialog.

Define the path and triggers for a chatbot conversation.

Implement conditional logic to dynamically route a conversation across different paths.

Feature

Feature

Feature

Feature

答案:

解題說明:

Explanation:

Graphical user interface, text, application, email Description automatically generated

Box 1: Entities

Out of the box, Power Virtual Agents comes with a set of prebuilt entities, which represent the most commonly used stereotype information in real-world dialogs, such as age, colors, numbers, and names.

With the knowledge granted by entities, a bot can smartly recognize the relevant information from a user input and save it for later use.

Box 2: Topics

In Power Virtual Agents, a topic defines a how a bot conversation plays out.

You can author topics by customizing provided templates, create new topics from scratch, or get suggestions from existing help sites. A topic has trigger phrases - these are phrases, keywords, or questions that a user is likely to type that is related to a specific issue - and conversation nodes - these are what you use to define how a bot should respond and what it should do.

Box 3: Variables

Variables let you save responses from your customers in a conversation with your bot so that you can reuse them later in the conversation.

For example, you can save a customer's name in a variable called UserName. The bot can then address the customer by name as the conversation continues.

You can use variables to create logical expressions that dynamically route the customer down different conversation paths.
