Deep-Security-Professional Real Exam Questions - Deep-Security-Professional Certification Test Answers

ISC2 Cybersecurity Certification (CC) Exam Questions and Answers

What type of security training is specifically designed to educate employees about attack techniques? - Answer- capture the flag

Linda's organization recently experienced a social engineering attack. The attacker called a help desk employee and persuaded her that she was a project manager on a tight deadline and locked out of her account. The help desk technician provided the attacker with access to the account. What social engineering principle was used? - Answer- urgency

What type of phishing attack focuses specifically on senior executives of a targeted organization? - Answer- whaling

Which one of the following data sanitization strategies is most secure? - Answer- destruction

Data classifications should be assigned based upon: - Answer- sensitivity and criticality

If Alice wants to send a message to Bob using symmetric cryptography, what key does she use to encrypt the message? - Answer- shared secret key

What are the hash lengths from the SHA-2 function? - Answer- 224, 256, and 512 bits

What operation uses a cryptographic key to convert plaintext into ciphertext? - Answer- encryption

What are the characteristics of cloud computing? - Answer- ubiquitous, on-demand, convenient

Purchasing server instances and configuring them to run your own software is an example of what cloud deployment model? - Answer- Infrastructure as a Service (IaaS)

What type of agreement is used to define availability requirements for an IT service that an organization is purchasing from a vendor? - Answer- Service Level Agreement (SLA)

Which cloud deployment model exclusively uses dedicated cloud resources for a customer? - Answer- private cloud

Vendors extend your organization's technology environment. If they handle data on your behalf, you should expect they execute the same degree of care that you would in your own operations. - Answer- true

Our Deep-Security-Professional study guide boosts many merits and functions. You can download and try out our Deep-Security-Professional test question freely before the purchase. You can use our product immediately after you buy our product. We provide 3 versions for you to choose and you only need 20-30 hours to learn our Deep-Security-Professional training materials and prepare the exam. The passing rate and the hit rate are both high. We provide 24-hours online customer service and free update within one year. And if you have a try on our Deep-Security-Professional Exam Questions, you will find that there are many advantages of our Deep-Security-Professional training materials.

We understand the difficulty of finding the latest and accurate Deep-Security-Professional questions. In today's competitive world, it is essential to prepare with the most probable Trend in Deep-Security-Professional exam dumps to stay ahead of the competition. That's why we have created our updated Trend Deep-Security-Professional Questions, which will help you to clear the Trend Micro Certified Professional for Deep Security (Deep-Security-Professional) exam in one go.

Updated Deep-Security-Professional Real Exam Questions - Find Shortcut to Pass Deep-Security-Professional Exam

Trend Micro Certified Professional for Deep Security Sample Questions (Q51-Q56):

NEW QUESTION # 51
Based on the Malware Scan Configuration displayed in the exhibit, which of the following statements is false.

□

- **A. Deep Security Agents will only be able to identify malware in files by using patterns downloaded from the Smart Protection Network.**
- B. Any document files that display suspicious behavior will be submitted and executed in a sandbox environment on a Deep Discover Analyzer device.
- C. Deep Security Agents using this Malware Scan Configuration will not monitor for compromised Windows processes.
- D. Internet access is required to properly enable the features identified in this configuration.

Answer: A

Explanation:
The configuration shown enables Predictive Machine Learning, Process Memory Scan, Document Exploit Protection, and other advanced technologies beyond just pattern-based detection. This means Deep Security Agents will use more than just patterns downloaded from the Smart Protection Network to detect malware.

NEW QUESTION # 52
The details for an event are displayed in the exhibit. Based on these details, which Protection Module generated the event?

- **A. Intrusion Prevention**
- B. Firewall
- C. Application Control
- D. Integrity Monitoring

Answer: A

Explanation:
The event shows a "Reason" that references a specific rule (1000847 - OpenLDAP LDAP Server BIND Request DoS), an "Action" of "Reset," and the event origin as "Agent." This format is specific to the Intrusion Prevention module, which detects and responds to network exploits using assigned rules and provides detailed event logs including signature ID, action taken, and protocol information. The other modules do not use signature IDs or these response actions.

NEW QUESTION # 53
Which of the following statements is true regarding software inventories used as part of the Application Control Protection Module?

- **A. When an administrator allows software that would be otherwise blocked by the En-forcement Mode, it isn't added to the inventory of approved software. Instead, it is added to that computer's white list.**
- B. An administrator can view the list of allowed of software in the inventory from the De-tails tab for each individual Computer.
- C. An administrator can share the inventory of allowed software with other computers protected by Deep Security Agents, by copying the inventory database file (ac.db) from the source computer.
- D. Disable the Application Control Protection Module when installing software upgrades, otherwise, the new software will be prevented from installing.

Answer: A

NEW QUESTION # 54

How does Smart Scan vary from conventional pattern-based anti-malware scanning?

- A. Smart Scan improves the capture rate for malware scanning by sending features of suspicious files to a cloud-based server where the features are compared to known malware samples.
- B. Smart Scan identifies files to be scanned based on the content of the file, not the extension.
- C. Smart Scan is performed in real time, where conventional scanning must be triggered manually, or run on a schedule.
- D. Smart Scan shifts much of the malware scanning functionality to an external Smart Protection Server.

Answer: D

Explanation:
Smart Scan offloads much of the malware scanning workload to a dedicated external Smart Protection Server (can be Trend Micro-hosted or on-premise), rather than performing all scanning and pattern lookups locally.
The endpoint performs a lightweight initial scan and then queries the Smart Protection Server for advanced analysis, improving performance and reducing pattern update frequency on endpoints.
From the official documentation:
"With Smart Scan, the agent sends file or process attributes to a Smart Protection Server, which then performs the pattern matching and returns the result. This allows agents to use a smaller local pattern file and offloads the majority of scanning to the Smart Protection infrastructure." Option B is correct.
Option A is misleading; although file features are checked externally, the main difference is offloading, not capture rate.
Option C is incorrect; both methods can scan in real-time.
Option D describes IntelliScan, not Smart Scan.

NEW QUESTION # 55

Which of the following statements is true regarding Intrusion Prevention protection?

- A. Intrusion Prevention protection can drop malicious packets but cannot reset the con-nection.
- B. Intrusion Prevention protection only works in conjunction with the Anti-Malware Pro-tection Module.
- C. Intrusion Prevention protection can drop or reset a connection.
- D. Intrusion Prevention protection can only work on computers where a Deep Security Agent is installed; agentless protection is not supported.

Answer: C

NEW QUESTION # 56

......

Deep-Security-Professional exam braindumps can prove your ability to let more big company to attention you. Deep-Security-Professional exam guide will help you get a good job. Deep-Security-Professional test prep can help you in a very short period of time to prove yourself perfectly and efficiently. With tens of thousands of our customers proved that, if you study with our Deep-Security-Professional Exam Questions for twenty to thirty hours, then you will be more confident and capable to pass the Deep-Security-Professional exam and get the according cetification.
