## Salesforce Certified B2C Commerce Architect Sample Questions (Q45-Q50):

### NEW QUESTION # 45

A B2C Commerce developer has recently completed a tax service link cartridge integration into a new SHU site. During review, the Architect notices the basket calculation hook is being run multiple times during a single tax call. What is the reason for the duplicate calculations being run?

- A. The tax cat is being called multiple times.
- B. The LINK cartridge is included multiple times in the cartridge path.
- C. There are multiple hook.js files referring to the same hook.
- D. The checkout is designed to recursively refer to the same hook.

**Answer: A**

#### NEW QUESTION # 46

A Retailer has a single storefront site and a Product Management System (PIM). The PIM is generating the master catalog and storefront categorization catalog every day and it is uploading them to SFTP. How should the Architect configure the import job flows following the best practices?

- **A. 1st flow is global to download the files from SFTP. 2nd flow is global to import the storefront catalog. 3rd flow is global to import the master catalog.**
- B. 1st flow is assigned to the site to download the files from SFTP. 2nd flow is assigned to the site to import the master catalog. 3rd flow is global to import the storefront catalog.
- C. 1st flow is global to download the files from SFTP. 2nd flow is global to import the master catalog. 3rd flow is global to import the storefront catalog.
- D. 1st flow is assigned to the site to download the files from SFTP. 2nd flow is assigned to the site to import the storefront catalog. 3rd flow is global to import the master catalog.

**Answer: A**

Explanation:

For optimal job flow concerning data import from a PIM system, the sequence should begin with downloading files globally from an SFTP site, followed by importing data into the B2C Commerce platform:

\* First flow: Download files, ensuring all required files are available and ready for import.

\* Second flow: Import the storefront catalog which likely has dependencies on the master catalog but is generally smaller and can be updated more rapidly.

\* Third flow: Import the master catalog, as it typically contains the foundational data needed for various site functionalities.

This sequence respects data dependency and integrity, ensuring that the storefront reflects the most current and accurate information after all relevant data is imported.

#### NEW QUESTION # 47

A new client is moving from their existing e-commerce platform to B2C Commerce. They have an existing service that connects to the Email Marketing System. The endpoint of the service can directly parse the data posted by the customer from the Storefront page for marketing materials subscriptions. It is required that the service implementation on the B2C Commerce site supports authentication and encoding.

What type should the Architect document this new service as?

- **A. HTTP**
- B. SOAP
- C. Generic
- D. HTTP Form

**Answer: A**

#### NEW QUESTION # 48

There are three logging categories: category1, category1.eu, and category1.us.

In Business Manager, category1 is enabled for WARN level and no other categories are configured. All custom log targets are enabled.

The code segment below executes.

What is the result?

- A. Logs will be written to the log file with a prefix customwarn.
- B. Logs will not be written.
- C. Logs will be written to the log file with a prefix loggerFile.
- **D. Logs will be written to the log file with a prefix custom-loggerFile.**

**Answer: D**

### NEW QUESTION # 49

A company is using both Service Cloud and B2C Commerce but they are not using Mulesoft or any other integration middleware and do not plan on adding that in the near future. However, there is a need to keep customer records in sync across both Service Cloud and B2C Commerce. When a change to the customer record in Service Cloud takes place, such as an updated customer name, the same customer record should be updated in B2C Commerce. Assume that there is a common ID that uniquely identifies the customer across the two systems.

How should a Solution Architect deliver the desired functionality?

- A. Develop a custom solution in Service Cloud to consume and communicate with B2C Commerce APIs
- B. Send an Outbound Message from Service Cloud and catch and handle the Outbound Message using the B2C Commerce APIs
- **C. Send a platform event from Service Cloud and subscribe to the platform event in B2C Commerce using the built-in functionality**
- D. Use change data capture to send a message from Service Cloud and catch and handle the message using B2C Commerce Service Cloud Connector

**Answer: C**

### NEW QUESTION # 50

.....

As we all know, the preparation process for an exam is very laborious and time-consuming. We had to spare time to do other things to prepare for B2C-Commerce-Architect exam, which delayed a lot of important things.
