300-610 Download Demo | 300-610 Reliable Test Objectives

You can get the authoritative 300-610 certification exam in first try without attending any expensive training institution classes. The main reason that makes you get succeed is the accuracy of our 300-610 test answers and the current exam pass guide. We provide you the Latest 300-610 Dumps Pdf for exam preparation and also the valid study guide for the organized review. You can completely trust our learning materials.

Cisco Designing Cisco Data Center Infrastructure Sample Questions (Q261-Q266):

NEW QUESTION # 261

An engineer is installing a Cisco Nexus 7000 Series Switch with F2-Series I/O Module. The company's strict security policy requires that the port be in-band. The engineer must also keep these considerations in mind:

The customer's security requirements mandate the use of a secure management mechanism that supports authentication and encryption.

The port should support management over IP.

Which port type must be used to meet these requirements?

- A. management port
- B. connectivity management port
- C. console port
- D. Ethernet port

Answer: C

NEW QUESTION # 262

Which two types of service profile templates does Cisco UCS support? (Choose two.)

- A. updating
- B. initial
- C. temporary
- D. connected
- E. permanent

Answer: A,B

Explanation:

NEW QUESTION # 263

A storage administrator experiences a slow file transfer rate when archiving backup files on a tape library drive. The tape drive is connected directly to the Cisco Nexus 7009 switches. The file transfer rate gradually goes down with files that are over 100 GB in size. The requirement is for the file transfer rate to be consistent during the transfer window. Which two solutions meet this requirement? (Choose two.)

- A. Split the files before copying them to the tape drive.
- B. Increase the tape drive disk size to increase the write speed.
- C. Compress the files to reduce the data size before copying to the tape drive.
- D. Connect the tape drive with two 10G interfaces in vPC mode.
- E. Perform a file transfer to the tape drive after business hours.

Answer: A,C

NEW QUESTION # 264

A company's data center is currently running on a traditional SAN architecture with Cisco UCS C200 M5 Blade Servers, producing 1000 IOPS. The SAN is becoming a performance bottleneck, so management decided to implement a new solution to provide better performance and scalability. The preferred solution must meet these requirements:

- Provide at least 10x the performance of the current SAN
- Provide up to 100 Gbps of throughput per node
- Be easily scalable to meet the future needs of the enterprise

Which solution must the company deploy to meet the requirements?

- A. Cisco HyperFlex which provides a high-performance, scalable, and reliable hyperconverged infrastructure design
- B. cloud-based virtual server infrastructure, which provides a scalable, easy-to-manage approach with reduced budget pressure
- C. VMware vSAN solution, which provides storage mobility while remaining compatible with the existing Cisco UCS server infrastructure
- D. ACI solution compatible with the current data center design to unlock workload mobility and provide flexible, effective scalability

Answer: A

NEW QUESTION # 265

A network architect designs a high-availability architecture for the Cisco UCS Fabric Interconnects that are installed in a data center. The architecture must support clustering and redundancy.

Which architecture meets these requirements?

- A. dual connections from port L1 to L2 and one connection from port L2 to L1 with twinax cables
- B. dual connections from port L1 to L1 and one connection from port L1 to L1 with twinax cables
- C. dual connections from port L1 to L1 and one connection from port L2 to L2 with Ethernet cables
- D. dual connections from port L1 to L2 and one connection from port L2 to L1 with Ethernet cables

Answer: C

Explanation:
