**PL-600 Accurate Study Material & PL-600 Valid Practice Questions & PL-600 Latest Training Material**

For added reassurance, we also provide you with up to 1 year of free Microsoft Dumps updates and a free demo version of the actual product so that you can verify its validity before purchasing. The key to passing the Microsoft PL-600 exam on the first try is vigorous PL-600 practice. And that's exactly what you'll get when you prepare from our Microsoft Power Platform Solution Architect (PL-600) practice material. Each format of our PL-600 study material excels in its own way and serves to improve your skills and gives you an inside-out understanding of each exam topic.

## Microsoft Power Platform Solution Architect Sample Questions (Q11-Q16):

### NEW QUESTION # 11

You need to resolve the issue reported during testing.  
What should you do?

- A. Create a relationship within the Inspection Order table to the originating inspection order.
- **B. Create an image data type within the Inspection Order table.**
- C. Create a Quick View form for the inspection order.

**Answer: B**

Explanation:

Need to store the image in the table.

Scenario: The company uses photos of employees to generate employee badges. Photos are uploaded into Microsoft 365 user profiles.

### NEW QUESTION # 12

You need to recommend an authentication solution for the planned implementation of Dynamics 365.  
What should you include in the recommendation?

- A. Use the Office 365 tenant for Dynamics 365 Customer Service.
- **B. Use synchronized identities.**
- C. Create a new tenant for Dynamics 365 Customer Service.
- D. Use federated identities

**Answer: B**

Explanation:

Scenario: Ensure that employees can sign in to all Microsoft apps by using one set of credentials per employee.

Synchronized identity. Synchronize on-premises directory objects with Microsoft 365 and manage your users on-premises. You can also synchronize passwords so that the users have the same password on-premises and in the cloud, but they will have to sign in again to use Microsoft 365.

### NEW QUESTION # 13

You are designing a model-driven app for a hospital. The app will be used to track teams at the hospital including:

Team	Comments
Cleaning	There are three predetermined cleaning teams. Tasks are assigned to a team. Anyone on the team can complete an assigned task.
Emergency room	These teams are formed as needed based on patient needs and staff availability.
Billing	These teams are assigned to specific hospital departments. Team members must <b>only</b> see data for the hospital department to which they are assigned.

You need to recommend the team types to use.

Which team types should you recommend? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

## Requirement

## Team type

Cleaning teams

	▼
Access	
Owner	

Emergency room teams

	▼
Access	
Owner	

Billing teams

	▼
Access	
Owner	

Answer:

Explanation:

Requirement	Team type						
Cleaning teams	<table border="1"><tr><td></td><td>▼</td></tr><tr><td>Access</td><td></td></tr><tr><td>Owner</td><td></td></tr></table>		▼	Access		Owner	
	▼						
Access							
Owner							
Emergency room teams	<table border="1"><tr><td></td><td>▼</td></tr><tr><td>Access</td><td></td></tr><tr><td>Owner</td><td></td></tr></table>		▼	Access		Owner	
	▼						
Access							
Owner							
Billing teams	<table border="1"><tr><td></td><td>▼</td></tr><tr><td>Access</td><td></td></tr><tr><td>Owner</td><td></td></tr></table>		▼	Access		Owner	
	▼						
Access							
Owner							

Explanation:

Box 1: Owner team

Owner team: An owner team owns records and has security roles assigned to the team. A user's privileges can come from their individual security roles, those of the teams that they're part of or the ones they inherit. A team has full access rights on the records that the team owns. Team members are added manually to the owner team.

Box 2: Access team

Access team: An access team doesn't own records and doesn't have security roles assigned to the team. The team members have privileges defined by their individual security roles and by roles from the teams they're members of. These members share records with an access team, and the team is granted access rights to the records. Access rights include Read, Write, and Append.

Box 3: Owner team

### NEW QUESTION # 14

You are supporting the go-live process for a company. The company is responsible for migrating data to the Microsoft Power Platform by using a custom solution. The company reports the following issues:

- \* Migration processes fail due to operation timeouts.
- \* Records that include lookup columns often fail to load.

You need to recommend a solution.

What should you recommend? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

Issue	Solution
Migration processes fail due to operation timeouts.	<input type="checkbox"/> Increase multithreading and/or batch size settings. <input checked="" type="checkbox"/> Increase multithreading and/or batch size settings. <input type="checkbox"/> Decrease multithreading and/or batch size settings. <input type="checkbox"/> Ensure you are loading data into all tables at the same time. <input type="checkbox"/> Ensure you are loading data into tables in a particular order.
Records that include lookup columns often fail to load.	<input checked="" type="checkbox"/> Ensure you are loading data into tables in a specific order. <input type="checkbox"/> Increase multithreading and/or batch size settings. <input type="checkbox"/> Decrease multithreading and/or batch size settings. <input type="checkbox"/> Ensure you are loading data into all tables at the same time. <input checked="" type="checkbox"/> Ensure you are loading data into tables in a specific order.

Answer:

### NEW QUESTION # 15

Drag and Drop Question

You need to recommend methods for assigning security to each group of users.

The customer provides the following requirements:

- Customers need the ability to submit a case through an online portal.
- Portal must handle 75 concurrent users submitting cases.
- Service data must be retained for at least six years.

You need to determine which requirements are functional or non-functional.

Which requirements are functional or non-functional? To answer, drag the appropriate types to the correct requirements. Each type

may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.  
NOTE: Each correct selection is worth one point.

Types	Requirement	Type
<input type="checkbox"/> Functional	Customers need the ability to submit a case through an online portal.	<input type="text"/>
<input type="checkbox"/> Non-functional	Portal must handle 75 current users submitting cases.	<input type="text"/>
	Service data must be retained for at least six years.	<input type="text"/>

Answer:

Explanation:

### Answer Area

Types	Requirement	Type
<input checked="" type="checkbox"/> Functional	Customers need the ability to submit a case through an online portal.	<input type="text" value="Functional"/>
<input type="checkbox"/> Non-functional	Portal must handle 75 current users submitting cases.	<input type="text" value="Non-functional"/>
	Service data must be retained for at least six years.	<input type="text" value="Non-functional"/>

Explanation:

Box 1: Functional

Functional requirements describe what the solution needs to do or its behaviors.

Box 2: Non-functional

Non-functional requirements commonly describe non-behavior aspects of the solution such as performance requirements.

Box 3: Non-functional

Examples of common non-functional requirement types include:

Availability

Compliance/regulatory

Data retention/residency

Performance (response time, and so on)

Privacy

Recovery time

Security

Scalability
