## A Field Guide to FCP\_FAZ\_AN-7.6 All-in-One Exam Guide

The made from BraindumpsIT is designed by way of specialists and is often updated to mirror the present day modifications inside the FCP\_FAZ\_AN-7.6 content. The FCP\_FAZ\_AN-7.6 recognizes that scholars may also have distinctive learning patterns and options. Consequently, the BraindumpsIT gives PDF format, desktop exercise examination software program, and FCP\_FAZ\_AN-7.6 examination questions to assist customers prepare for the Fortinet FCP\_FAZ\_AN-7.6 examination correctly.

## Fortinet FCP - FortiAnalyzer 7.6 Analyst Sample Questions (Q43-Q48):

### NEW QUESTION # 43

Which log will generate an event with the status Unhandled?

- A. An AV log with action=qarantine.
- B. An IPS log with action=pass.**
- C. A WebFilter log with action=dropped.
- D. An AppControl log with action=blocked.

**Answer: B**

Explanation:

In FortiOS 7.4.1 and FortiAnalyzer 7.4.1, the "Unhandled" status in logs typically signifies that the FortiGate encountered a security event but did not take any specific action to block or alter it. This usually occurs in the context of Intrusion Prevention System (IPS) logs. IPS logs with action=pass: When the IPS engine inspects traffic and determines that it does not match any known attack

signatures or violate any configured policies, it assigns the action "pass". Since no action is taken to block or modify this traffic, the status is logged as "Unhandled."

#### NEW QUESTION # 44

Which two methods can you use to send notifications when an event occurs that matches a configured event handler? (Choose two.)

- A. Send SNMP trap
- B. Send Alert through FortiSIEM MEA
- C. Send Alert through Fabric Connectors
- D. Send SMS notification

**Answer: A,C**

Explanation:

Send Alert through Fabric Connectors: This method involves creating a Fabric Connector profile and selecting the option "Send Alert through Fabric Connectors" in the event handler notification settings. Notifications are then sent in JSON format to the configured endpoint, such as Microsoft Teams or other integrated platforms.

Send SNMP trap: You can configure SNMP traps to be sent when an event triggers an incident.

This involves setting the SNMP Trap IP address, community string, trap type, and protocol in the system's analytics or incident settings.

#### NEW QUESTION # 45

What is the purpose of using data selectors when configuring event handlers?

- A. They apply their filter criteria to the entire event handler so that you don't have to configure the same criteria in the individual rules.
- B. They download new filters can be used in event handlers.
- C. They are common filters that can be applied simultaneously to all event handlers.
- D. They filter the types of logs that FortiAnalyzer can accept from registered devices.

**Answer: A**

#### NEW QUESTION # 46

An administrator on your team has configured multiple reports to run periodically. Management has an additional request that all new generated reports be sent to a company email inbox for accessibility. The mail server has already been configured on FortiAnalyzer. Which item must configure on FortiAnalyzer so that emails are sent when the reports are generated?

- A. Add a mailto:<email address> option within the report layouts.
- B. Enable an output profile on the reports.
- C. Enable the option to email all reports under the mail server.
- D. Enable email notification under the report calendar.

**Answer: B**

Explanation:

To ensure that reports generated by FortiAnalyzer are automatically sent to an email inbox, you need to set up an output profile for the reports. Output profiles specify where and how reports should be delivered, including the option to send them via email.

Option D - Enable an Output Profile on the Reports:

An output profile can be configured on FortiAnalyzer to define delivery options, including emailing the report to specified recipients. This setup ensures that every time a report is generated according to the schedule, it is automatically emailed to the configured address.

#### NEW QUESTION # 47

Exhibit. Assume these are all the events that exist on the FortiAnalyzer device. How many events will be added to the incident created after running this playbook?

The screenshot shows the FortiAnalyzer Event Monitor interface. On the left, a list of events is displayed with checkboxes. On the right, a detailed view of an event is shown with columns for Event Status, Event Type, Severity, and Tags. The event details are as follows:

Event Status	Event Type	Severity	Tags
Unwanted	IPS	High	Block, SSL
Unwanted	IPS	Medium	Block, SSH
Unwanted	IPS	Low	Block, URL
Unwanted	Web Filter	Medium	Block, URL
Unwanted	Web Filter	High	Block, IP, C/C
Unwanted	IPS	High	Block, IP, C/C
Unwanted	Antivirus	Medium	Block, IP, C/C
Unwanted	Antivirus	Medium	Block, Signature, Victim
Unwanted	Antivirus	Medium	Block, Signature, Attacker

- A. Four events will be added.
- B. No events will be added.
- C. Eleven events will be added.
- D. Seven events will be added

#### Answer: A

##### Explanation:

In the exhibit, we see a playbook in FortiAnalyzer designed to retrieve events based on specific criteria, create an incident, and attach relevant data to that incident. The "Get Event" task configuration specifies filters to match any of the following conditions:

Severity = High

Event Type = Web Filter

Tag = Malware

##### Analysis of Events:

In the FortiAnalyzer Event Monitor list:

We need to identify events that meet any one of the specified conditions (since the filter is set to "Match Any Condition").

Events Matching Criteria:

Severity = High:

There are two events with "High" severity, both with the "Event Type" IPS.

Event Type = Web Filter:

There are two events with the "Event Type" Web Filter. One has a "Medium" severity, and the other has a "Low" severity.

Tag = Malware:

There are two events tagged with "Malware," both with the "Event Type" Antivirus and "Medium" severity.

After filtering based on these criteria, there are four distinct events:

Two from the "Severity = High" filter.

One from the "Event Type = Web Filter" filter.

One from the "Tag = Malware" filter.

## NEW QUESTION # 48

.....

BraindumpsIT believes in customer satisfaction and strives hard to make the entire Fortinet FCP\_FAZ\_AN-7.6 exam preparation process simple, smart, and successful. To achieve this objective the BraindumpsIT is offering the top-rated and real FCP\_FAZ\_AN-7.6 exam questions in three different FCP\_FAZ\_AN-7.6 Exam study material formats. These FCP\_FAZ\_AN-7.6 exam questions formats are Fortinet FCP\_FAZ\_AN-7.6 PDF dumps files, desktop practice test software, and web-based practice test software.
