Pass Guaranteed Quiz 2026 Splunk Trustable SPLK-2003: Splunk Phantom Certified Admin PDF Download

Many candidates ask us if your SPLK-2003 original questions are really valid, if our exam file is really edited based on first-hand information & professional experts and if your SPLK-2003 original questions are really 100% pass-rate. Maybe you have a bad purchase experience before. I want to know that if you chose providers attentively before. Hereby, I can assure you that please rest assured all we guaranteed will be achieved. We are a legal authorized company which provides valid SPLK-2003 Original Questions more than 6 years and help thousands of candidates clear exams and obtain certification every year.

Splunk Phantom Certified Admin Sample Questions (Q112-Q117):

NEW QUESTION # 112
After a successful POST to a Phantom REST endpoint to create a new object what result is returned?

- A. The new object ID.
- B. The full CEF name.
- C. The new object name.
- D. The PostGres UUID.

Answer: A

Explanation:
After a successful POST to a Phantom REST endpoint to create a new object, the result returned is the new object ID. The object ID is a unique identifier for each object in Phantom, such as a container, an artifact, an action, or a playbook. The object ID can be used to retrieve, update, or delete the object using the Phantom REST API.
When a POST request is made to a Phantom REST endpoint to create a new object, such as an event, artifact, or container, the typical response includes the ID of the newly created object. This ID is a unique identifier that can be used to reference the object within the system for future operations, such as updating, querying, or deleting the object. The response does not usually include the full name or other specific details of the object, as the ID is the most important piece of information needed immediately after creation for reference purposes.

NEW QUESTION # 113
Which of the following can be configured in the ROI Settings?

- A. Annual analyst salary.
- B. Time lost.
- C. Analyst hours per month.
- D. Number of full time employees (FTEs).

Answer: C

Explanation:
ROI Settings dashboard allows you to configure the parameters used to estimate the data displayed in the Automation ROI Summary dashboard. One of the settings that can be configured is the FTE Gained, which is the number of full time employees (FTEs) that are freed up by automation. To calculate this value, Splunk SOAR divides the number of actions run by automation by the number of expected actions an analyst would take, based on minutes per action and analyst hours per day. Therefore, option A is the correct answer, as it is one of the settings that can be configured in the ROI Settings dashboard. Option B is incorrect, because time lost is not a setting that can be configured in the ROI Settings dashboard, but a metric that is calculated by Splunk SOAR based on the difference between the analyst minutes per action and the actual minutes per action. Option C is incorrect, because analyst hours per month is not a setting that can be configured in the ROI Settings dashboard, but a value that is derived from the analyst hours per day setting. Option D is incorrect, because annual analyst salary is a setting that can be configured in the ROI Settings dashboard, but not the one that is asked in the question.
1: Configure the ROI Settings dashboard in Administer Splunk SOAR (On-premises) ROI (Return on Investment) Settings within Splunk SOAR are used to estimate the efficiency and financial impact of the SOAR platform. One of the configurable parameters in these settings is the 'Analyst hours per month'. This parameter helps in calculating the time saved through automation, which in turn can be translated into cost savings and efficiency gains. It reflects the direct contribution of the SOAR platform to operational productivity.

NEW QUESTION # 114
Which of the following are the default ports that must be configured on Splunk to allow connections from Phantom?

- A. SplunkWeb (8421), SplunkD (8061), HTTP Collector (8798)
- B. SplunkWeb (8088), SplunkD (8089), HTTP Collector (8000)
- C. SplunkWeb (8000), SplunkD (8089), HTTP Collector (8088)
- D. SplunkWeb (8089), SplunkD (8088), HTTP Collector (8000)

Answer: C

NEW QUESTION # 115
Which of the following is an advantage of using the Visual Playbook Editor?

- A. Supports Python or Javascript.

- B. The Visual Playbook Editor is the only way to generate user prompts.
- C. Easier playbook maintenance.
- D. Eliminates any need to use Python code.

Answer: C

Explanation:
Visual Playbook Editor is a feature of Splunk SOAR that allows you to create, edit, and implement automated playbooks using visual building blocks and execution flow lanes, without having to write code. The Visual Playbook Editor automatically generates the code for you, which you can view and edit in the Code Editor if needed. The Visual Playbook Editor also supports Python and Javascript as scripting languages for custom code blocks. One of the advantages of using the Visual Playbook Editor is that it makes playbook maintenance easier, as you can quickly modify, test, and debug your playbooks using the graphical interface.

NEW QUESTION # 116
What is the main purpose of using a customized workbook?

- A. Workbooks may not be customized; only default workbooks are permitted within Phantom.
- B. Workbooks apply service level agreements (SLAs) to containers and monitor completion status on the ROI dashboard.
- C. Workbooks guide user activity and coordination during event analysis and case operations.
- D. Workbooks automatically implement a customized processing of events using Python code.

Answer: C

Explanation:
The main purpose of using a customized workbook is to guide user activity and coordination during event analysis and case operations. Workbooks can be customized to include different phases, tasks, and instructions for the users. The other options are not valid purposes of using a customized workbook.
Customized workbooks in Splunk SOAR are designed to guide users through the process of analyzing events and managing cases. They provide a structured framework for documenting investigations, tracking progress, and ensuring that all necessary steps are followed during incident response and case management. This helps in coordinating team efforts, maintaining consistency in response activities, and ensuring that all aspects of an incident are thoroughly investigated and resolved.
Workbooks can be customized to fit the specific processes and procedures of an organization, making them a versatile tool for managing security operations.

NEW QUESTION # 117
......
