The money will be refund to your account and no extra questions will be asked. Additionally, AP-219 exam braindumps of us have helped many candidates pass the exam successfully with their high-quality. And we have professional technicians examine the update every day, and once we have new version, our system will send the latest version to your email automatically.

Salesforce Order Management Administrator Accredited Professional Sample Questions (Q86-Q91):

NEW QUESTION # 86

What object does the Ensure Funds Apex Flow action look for when resolving Invoice balances associated with an Order Summary?

- A. Order Payments
- **B. Order Payment Summaries**
- C. Payments
- D. Payment Summaries

Answer: B

Explanation:

The object that the Ensure Funds Apex Flow action looks for when resolving Invoice balances associated with an Order Summary is Order Payment Summaries. This object represents the payments made for an order, and it has a lookup relationship to both Invoice and Order Summary objects. The Ensure Funds Apex Flow action uses this object to calculate the balance due for each Invoice and update its status accordingly. Verified Reference: https://help.salesforce.com/s/articleView?id=sf.order_management_order_payment_summary.htm&type=5https://help.salesforce.com/s/articleView?id=sf.flow_ref_elements_om_actions_ensure_funds_async.htm&type=5

NEW QUESTION # 87

A company's service team should not see Process Exceptions on any Order Summaries. How can an administrator meet these requirements?

- A. Modify the service team profiles to remove access to the lightningcomponent and all associated Apex classes
- B. Add a filter to the Process Exception component on the Order Summary lightning record page to hide the component for the service team's Profile
- **C. Create a copy of the Order Summary lightning record page for the service team and remove the Process Exceptions component. Activate the lightning record page by profile for all Service team profiles.**
- D. Modify the Order Summary page layout to remove visibility to the Process Exception component for Service team profiles

Answer: C

NEW QUESTION # 88

A company has multiple fulfillment centers that they want to utilize when orders are fulfilled. The administrator is tasked with minimizing the distance from fulfillment center to delivery location. How can this be accomplished?

- A. Modify the Fulfillment Location Search process to search by closes! distance instead of least number of splits
- B. Create a Workflow Rule on the Fulfillment Order object that utilizes the Order Management workflow field update actions
- C. Add the "Order Routing Rank By Closest Distance" action to the fulfillment flow
- D. Ask a developer to create an Apex Action that can determine the closest fulfillment location

Answer: C

Explanation:

The best way for the administrator to accomplish this task is to add the "Order Routing Rank By Closest Distance" action to the fulfillment flow. This action is a flow core action that ranks the fulfillment locations by their distance from the delivery location, and returns a list of ranked locations. The administrator can use this action to find the optimal fulfillment location for each order based on proximity. Verified Reference: https://help.salesforce.com/s/articleView?id=sf.flow_ref_elements_om_actions_order_routing_rank_by_closest_distance.htm&type=5

NEW QUESTION # 89

What two steps are required to add an item to the Actions & Recommendations panel on the Order Summary record page?

- A. Create a New Deployment
- B. Create a new sub-flow
- C. Make a new Lightning Record Page
- D. Drag the Actions & Recommendations component on the page

Answer: B,D

Explanation:

Two steps that are required to add an item to the Actions & Recommendations panel on the Order Summary record page are: Drag the Actions & Recommendations component on the page. The Actions & Recommendations component is a standard component that displays actions and recommendations based on business logic for records in Lightning Experience or Salesforce mobile app. The administrator can use the Lightning App Builder to drag and drop the Actions & Recommendations component onto the Order Summary record page layout.

Create a new sub-flow. A sub-flow is a type of flow that can be invoked by another flow as an element. A sub-flow can contain logic and actions that are specific to a certain scenario or use case, such as order fulfillment or payment processing. The administrator can use Flow Builder to create a new sub-flow that defines the actions and recommendations for Order Summaries, and then add it to the Actions & Recommendations component on the record page.

NEW QUESTION # 90

An administrator needs to import Order Summary records containing historical data but does not want them to be actioned on by Order Management. Which feature supports this use case?

- A. Order Life Cycle Type Picklist
- B. Order Management Type Picklist
- C. Unmanaged Order Checkbox
- D. Custom checkbox

Answer: C

Explanation:

The feature that supports this use case is the Unmanaged Order Checkbox. This is a standard field on the Order Summary object that indicates whether the order is managed by Order Management or not. If this field is checked, then the order is not actioned on by Order Management, and it does not trigger any flows or processes. The administrator can use this field to import Order Summary records containing historical data without affecting the order lifecycle.
