

New AZ-120 Exam Notes, New AZ-120 Practice Materials

2026 Latest Dumpexams AZ-120 PDF Dumps and AZ-120 Exam Engine Free Share: https://drive.google.com/open?id=1J9xa18pBHRBE_NdTiEorj02niai1ptnl

It is our consistent aim to serve our customers wholeheartedly. Our AZ-120 real exam try to ensure that every customer is satisfied, which can be embodied in the convenient and quick refund process. Although the passing rate of our AZ-120 training quiz is close to 100%, if you are still worried, we can give you another guarantee: if you don't pass the exam, you can get a full refund. So there is nothing to worry about, just buy our AZ-120 exam questions.

You can save too much precious time because AZ-120 actual dumps help you to prepare for the AZ-120 certification tests in a very short time. Using Dumpexams AZ-120 exam preparation material you will be aware of the final Microsoft AZ-120 exam pattern and the kind of AZ-120 Exam Questions. Microsoft AZ-120 valid dumps will remove your AZ-120 exam fear and you will take the actual Microsoft AZ-120 test with confidence. You will perform well in the Planning and Administering Microsoft Azure for SAP Workloads, AZ-120 exam and produce the best results.

>> New AZ-120 Exam Notes <<

Well-Prepared New AZ-120 Exam Notes - Effective AZ-120 Exam Tool Guarantee Purchasing Safety

Wrong topic tend to be complex and no regularity, and the AZ-120 torrent prep can help the users to form a good logical structure of the wrong question, this database to each user in the simulation in the practice of all kinds of wrong topic all induction and collation, and the Planning and Administering Microsoft Azure for SAP Workloads study question then to the next step in-depth analysis of the wrong topic, allowing users in which exist in the knowledge module, tell users of our AZ-120 Exam Question how to make up for their own knowledge loophole, summarizes the method to deal with such questions for, to prevent such mistakes from happening again.

Microsoft Planning and Administering Microsoft Azure for SAP Workloads Sample Questions (Q195-Q200):

NEW QUESTION # 195

You have an SAP environment on Azure.

You use Azure Site Recovery to protect an SAP production landscape.

You need to validate whether you can recover the landscape in the event of a failure. The solution must minimize the impact on the landscape.

Which four actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Actions

Validate the SAP production landscape

Create a virtual network that has the same subnets as the SAP production landscape

Create a network security group (NSG) that restricts traffic to the primary region

Shut down production virtual machines

Select **Test failover** from the Recovery Plans blade

Add a public IP address to a management server in the disaster recovery region

Answer Area

Answer:

Explanation:

Actions	Answer Area
Validate the SAP production landscape	Create a virtual network that has the same subnets as the SAP production landscape
Create a virtual network that has the same subnets as the SAP production landscape	Add a public IP address to a management server in the disaster recovery region
Create a network security group (NSG) that restricts traffic to the primary region	Shut down production virtual machines
Shut down production virtual machines	Select Test failover from the Recovery Plans blade
Select Test failover from the Recovery Plans blade	
Add a public IP address to a management server in the disaster recovery region	

Explanation

Create a virtual network that has the same subnets as the SAP production landscape

Add a public IP address to a management server in the disaster recovery region

Shut down production virtual machines

Select **Test failover** from the Recovery Plans blade

Step 1: Create a virtual network...

We recommend that for test failover, you choose a network that's isolated from the production recovery site network specific in the Compute and Network settings for each VM. By default, when you create an Azure virtual network, it is isolated from other networks. The test network should mimic your production network:

The test network should have same number of subnets as your production network. Subnets should have the same names.

The test network should use the same IP address range.

Step 2: Add a public IP address...

Because Site Recovery does not replicate the cloud witness, we recommend that you deploy the cloud witness in the disaster recovery region.

Step 3: Shut down production virtual machines

Make sure that the primary VM is shut down when you run the test failover. Otherwise there will be two VMs with the same identity, running in the same network at the same time. This can lead to unexpected consequences.

Step 4: Select Test failover from the Recovery Plans blade

References:

<https://docs.microsoft.com/en-us/azure/site-recovery/site-recovery-test-failover-to-azure>

NEW QUESTION # 196

You plan to migrate an SAP environment to Azure.

You need to recommend a solution to migrate the SAP application servers to Azure. The solution must minimize downtime and changes to the environments.

What should you include in the recommendation?

- A. Azure Import/Export service
- B. Azure Storage Explorer
- C. AzCopy
- D. Azure Site Recovery

Answer: D

Explanation:

Site Recovery is used to manage and orchestrate disaster recovery of on-premises machines and Azure VMs. However, it can also be used for migration. Migration uses the same steps as disaster recovery with one exception. In a migration, failing machines over from your on-premises site is the final step. Unlike disaster recovery, you can't fail back to on-premises in a migration scenario.

Reference:

<https://docs.microsoft.com/en-us/azure/site-recovery/migrate-tutorial-on-premises-azure>

<https://www.microsoft.com/en-us/itshowcase/strategies-for-migrating-sap-systems-to-microsoft-azure>

NEW QUESTION # 197

You are evaluating the proposed backup policy.

For each of the following statements, select Yes if the statement is true. otherwise, select No.
NOTE:Each correct selection is worth one point.

Statements	Yes	No
The backup policy meets the technical requirements.	<input type="radio"/>	<input type="radio"/>
The backup policy meets the business requirements.	<input type="radio"/>	<input type="radio"/>
If the backup policy is implemented, a deleted file can be restored to the running virtual machine one year after the file was deleted.	<input type="radio"/>	<input type="radio"/>

Answer:

Explanation:

Statements	Yes	No
The backup policy meets the technical requirements.	<input checked="" type="radio"/>	<input type="radio"/>
The backup policy meets the business requirements.	<input type="radio"/>	<input checked="" type="radio"/>
If the backup policy is implemented, a deleted file can be restored to the running virtual machine one year after the file was deleted.	<input checked="" type="radio"/>	<input type="radio"/>

Explanation

Statements	Yes	No
The backup policy meets the technical requirements.	<input checked="" type="radio"/>	<input type="radio"/>
The backup policy meets the business requirements.	<input type="radio"/>	<input checked="" type="radio"/>
If the backup policy is implemented, a deleted file can be restored to the running virtual machine one year after the file was deleted.	<input checked="" type="radio"/>	<input type="radio"/>

Box 1: Yes

Scenario: Technical requirements: Ensure that an application server can be restored from a backup created during the last five days within 15 minutes.

Instant Restore has 'The instance recovery snapshot(s) for 5 Day(s)'.

Box 2: No

Scenario: Ensure that all the production application servers can restore daily backups from the last 21 days.

The Retention of daily backup point is set to for 14 days only.

Box 3: Yes

Reference:

<https://docs.microsoft.com/en-us/azure/backup/backup-instant-restore-capability>

NEW QUESTION # 198

You have an Azure alert rule and action group as shown in the following exhibit.

```

PS Azure:\> Get-AzMetricAlertRuleV2 | Select WindowSize, EvaluationFrequency, Actions -ExpandProperty Criteria
WindowSize           : 00:05:00
EvaluationFrequency   : 00:01:00
Actions               : (/subscriptions/6dce0667-3896-4f0b-bcc4-1ea4da2de0dc/resourcegroups/resourcegroup1/
                        providers/microsoft.insights/actiongroups/admins)
Name                  : Metric1
MetricName            : Percentage CPU
MetricNamespace       : Microsoft.Compute/virtualMachines
OperatorProperty      : GreaterThan
TimeAggregation       : Average
Threshold             : 85
Dimensions            : {}
AdditionalProperties   :

PS Azure:\> Get-AzActionGroup | Select -ExcludeProperty ResourceGroupName, Tags, Location
GroupShortName       : admins
GroupShortName       : admins
Enabled              : True
EmailReceivers       : {admins_emailAction}
SmsReceivers         : {}
WebhookReceivers     : {}
Id                   : /subscriptions/6dce0667-3896-4f0b-bcc4-1ea4da2de0dc/resourcegroups/resourcegroup1/providers/
                        microsoft.insights/actiongroups/admins
Name                  : admins
Type                  : Microsoft.Insights/ActionGroups

GroupShortName       : restartVM
GroupShortName       : restartVM
Enabled              : True
EmailReceivers       : {}
SmsReceivers         : {}
WebhookReceivers     : {}
Id                   : /subscriptions/6dce0667-3896-4f0b-bcc4-1ea4da2de0dc/resourcegroups/resourcegroup1/providers/
                        microsoft.insights/actiongroups/restartVM
Name                  : restartVM
Type                  : Microsoft.Insights/ActionGroups

```

Use the drop-down menus to select the answer choice that completes each statement based on the information presented in the graphic.

NOTE: Each correct selection is worth one point.

The admins action group will be notified if the average CPU usage rises above 85% for

▼
one minute
five minutes
one second

The [answer choice] when the alert is triggered

▼
admins action group will be emailed
restartVM action group will be emailed
virtual machines will restart

Answer:

Explanation:

The admins action group will be notified if the average CPU usage rises above 85% for

The [answer choice] when the alert is triggered

▼
one minute
five minutes
one second

▼
admins action group will be emailed
restartVM action group will be emailed
virtual machines will restart

Explanation

Graphical user interface, text, application Description automatically generated

The admins **action** group will be notified if the average CPU usage rises above 85% for

one minute	▼
five minutes	
one second	

The **[answer choice]** when the alert is triggered

admins action group will be emailed	▼
restartVM action group will be emailed	
virtual machines will restart	

Box 1: five minutes

Window Size is 5 minutes.

Box 2: admins action group will be emailed

The admins1 actiongroup will be executed.

NEW QUESTION # 199

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Answer Area

Statements	Yes	No
When you deploy two standalone SAP Web Dispatchers to separate clustered virtual machines, you must deploy a load balancer to make the solution highly available.	<input type="radio"/>	<input type="radio"/>
When you deploy Primary Application Server (PAS) and Additional Application Server (AAS) instances on separate virtual machines for SAP NetWeaver, you must deploy an Azure load balancer for high availability.	<input type="radio"/>	<input type="radio"/>
When using an availability group listener for SAP application connectivity to Microsoft SQL Server servers in different Azure regions, you must deploy a load balancer in front of the disaster recovery SQL Server virtual machine.	<input type="radio"/>	<input type="radio"/>

Answer:

Explanation:
answer Area

Statements	Yes	No
When you deploy two standalone SAP Web Dispatchers to separate clustered virtual machines, you must deploy a load balancer to make the solution highly available.	<input type="radio"/>	<input checked="" type="radio"/>
When you deploy Primary Application Server (PAS) and Additional Application Server (AAS) instances on separate virtual machines for SAP NetWeaver, you must deploy an Azure load balancer for high availability.	<input checked="" type="radio"/>	<input type="radio"/>
When using an availability group listener for SAP application connectivity to Microsoft SQL Server servers in different Azure regions, you must deploy a load balancer in front of the disaster recovery SQL Server virtual machine.	<input checked="" type="radio"/>	<input type="radio"/>

Explanation

Text, letter Description automatically generated

Statements	Yes	No
When you deploy two standalone SAP Web Dispatchers to separate clustered virtual machines, you must deploy a load balancer to make the solution highly available	<input type="radio"/>	<input checked="" type="radio"/>
When you deploy Primary Application Server (PAS) and Additional Application Server (AAS) instances on separate virtual machines for SAP NetWeaver, you must deploy an Azure load balancer for high availability	<input checked="" type="radio"/>	<input type="radio"/>
When using an availability group listener for SAP application connectivity to Microsoft SQL Server servers in different Azure regions, you must deploy a load balancer in front of the disaster recovery SQL Server virtual machine	<input checked="" type="radio"/>	<input type="radio"/>

Box 1: No

Load balancers. Load balancers are used to distribute traffic to virtual machines in the application-tier subnet.

For high availability, use the built-in SAP Web Dispatcher, Azure Load Balancer, or network appliances. Your choice depends on the traffic type (like HTTP or SAP GUI) or the required network services, like Secure Sockets Layer (SSL) termination.

Box 2: Yes

Availability group listener SAP application SQL server load balancer disaster recovery Box 3: Yes Reference:

NEW QUESTION # 200

.....

Provided you get the certificate this time with our AZ-120 practice materials, you may have striving and excellent friends and promising colleagues just like you. It is also as obvious magnifications of your major ability of profession, so AZ-120 practice materials may bring underlying influences with positive effects. The promotion or acceptance will be easy. So it is quite rewarding investment.

New AZ-120 Practice Materials: <https://www.dumpexams.com/AZ-120-real-answers.html>

In addition, AZ-120 exam materials of us contain both questions and answers, and you can have a quickly check after practicing. Microsoft New AZ-120 Exam Notes Test Mode of Testing Engine: It is the Real Exam mode of Testing Engine that develops very similar to Real Exam Scenario and gives you exact experience of Actual Exam in center, Microsoft New AZ-120 Exam Notes In case of fail, you can provide your failed report card and get full refund.

To resolve this debate, we'll reveal the C++ features that are safe to use AZ-120 in embedded environments with limited memory and restricted processing resources, High-quality data is critical to the efficiency of a business.

Pass Guaranteed Quiz 2026 Microsoft AZ-120 Useful New Exam Notes

In addition, AZ-120 Exam Materials of us contain both questions and answers, and you can have a quickly check after practicing. Test Mode of Testing Engine: It is the Real Exam mode of Testing Engine that New AZ-120 Practice Materials develops very similar to Real Exam Scenario and gives you exact experience of Actual Exam in center.

In case of fail, you can provide your failed report card and get full refund, Passing the test and get AZ-120 certification test means that your ability and professional knowledge are acknowledged by the authority of this field.

This ways will cut off your preparation time.
