## New RCA Brindumps Sheet - RCA Latest Exam Book

If you are going to purchase RCA Study Materials online, you may pay attention to your money safety. With applying the international recognition third party for the payment, your money and account safety can be guaranteed if you choose us. And the third party will protect your interests. In addition, RCA training materials are high-quality, for we have a professional team to research the latest information, and you can use them at ease. Besides if you have little time to prepare for your exam, you can also choose us, you just need to spend 48 to 72 hours on studying, you can pass the exam. Choose us, and you will never regret!

## Relativity Certified Administrator Sample Questions (Q21-Q26):

### NEW QUESTION # 21

When using Import/Export, what happens to existing metadata fields when you select the option to overlay metadata while importing a document load file that contains several blank metadata values?

- A. The overlay will error for each document with blank values.
- B. The existing values will remain in the corresponding mapped fields.
- C. Only fixed-length text fields will be overlaid with the blank values.
- D. The blank values will replace the existing field values.

**Answer: D**

Explanation:

The correct answer is C. The blank values will replace the existing field values. Relativity's Import/Export document load file import documentation states that for Append/Overlay and Overlay Only, if a blank metadata field exists in the load file, the blank value will overlay remove any existing value in the corresponding mapped field. That means the blank value does not preserve the original value; it clears it.

This rules out the other options. The import does not preserve the old value in the mapped field, so option A is incorrect. The workflow does not error merely because blank values are present, so option B is also incorrect. Option D is wrong because the behavior is not limited to fixed-length text fields; it is described generally for mapped metadata fields in overlay mode. Therefore, the correct answer is that blank values replace existing field values during overlay import.

#### NEW QUESTION # 22

What happens during the staging step of a production?

- A. Relativity assigns Bates numbers to documents.
- B. Relativity displays a sample image showing how the branding is applied to documents in the production.
- **C. Relativity takes a snapshot of the data sources and checks for duplicate documents between data sources.**
- D. Relativity performs a conflict check to ensure the data sources do not contain documents that are also in the saved search selected in the Production Restriction field.

**Answer: C**

Explanation:

The correct answer is B. Relativity's official production console documentation explains that Stage Production and Stage and Run Production both take a snapshot of the data sources for the production.

The staging step captures the current contents of those data sources so the production job runs against a fixed set of documents. Relativity also documents that staging errors occur if the same document is found in multiple data sources, which means duplicate-document checking is part of what administrators must evaluate during the staging phase.

The other options describe different production activities. Showing a sample image of branding is associated with Preview Production, not staging. Bates numbers are assigned later as part of the production run, not during the initial staging snapshot. The option about conflict checking against a Production Restriction saved search is not the best description of the staging step itself according to the official documentation. For RCA exam purposes, the key concept is that staging freezes the production inputs and surfaces structural issues, especially duplicate documents across data sources, before the full production run proceeds. This is an important quality-control checkpoint because it helps administrators verify that the right documents and data-source configuration are in place before branding, numbering, and export occur. Therefore, the best answer is that during staging, Relativity takes a snapshot of the data sources and checks for duplicate documents between data sources.

#### NEW QUESTION # 23

When using Simple File Upload to import new documents, what determines the Control Number?

- A. The Filename field of the document's load file.
- **B. The name of the file.**
- C. The next available Control Number based on Processing Profile settings.
- D. The next available Document ArtifactID value.

**Answer: B**

Explanation:

The correct answer is C. The name of the file. Relativity's Simple File Upload documentation states that when you upload a document using this feature, Relativity imports metadata including Control Number and File Name. In the Simple File Upload workflow, there is no traditional load file that defines document identifiers the way an Import/Export document load does. The uploaded file itself is the source object for the new document record, and the question's answer choices point to the documented practical behavior that the control number comes from the uploaded file name.

The other options do not align with the Simple File Upload model. ArtifactID is a system-generated identifier, but it does not determine the Control Number. There is no document load file in this workflow, so option B is incorrect. Processing Profile settings belong to Processing workflows, not Simple File Upload, so option D is also incorrect. Relativity's replacement guidance also reinforces the centrality of Control Number in this workflow by stating that you cannot upload a document that shares a Control Number with a document already in Relativity unless you use the replacement workflow. That behavior is consistent with the file name being used to derive the incoming document's control number in Simple File Upload.

#### NEW QUESTION # 24

What object in Relativity functions as the central location for people, companies, organizational groups, and their metadata?

- A. Document
- **B. Entity**
- C. Field
- D. Layout

**Answer: B**

Explanation:

The correct answer is D. Entity . Relativity's official documentation explicitly states that the Entity object functions as the central location for people, companies, organizational groups, and their metadata . This wording appears directly in the Entity object documentation and is the exact phrasing reflected in the question.

The other options are incorrect because they serve different purposes in Relativity. A Field stores data elements, a Layout controls display and editing arrangements, and a Document represents reviewable content. None of these objects serves as the centralized person/company/group metadata object described in the official documentation. Therefore, the correct answer is Entity .

### NEW QUESTION # 25

Which of the following fields does a transcript's Word Index contain?

- **A. Speaker**
- B. Count
- C. Associated fact
- D. Exhibit number

**Answer: A**

Explanation:

The correct answer is C. Speaker . In Relativity transcript review, the Word Index is used to navigate the transcript content by words and speakers appearing in the testimony. The transcript review experience centers on transcript text structure, including speaker-based navigation, rather than fields like associated facts or exhibits, which belong to different transcript-management features. Relativity's transcript tooling distinguishes transcript content navigation from fact management and exhibit linking, so Speaker is the correct Word Index field from the choices given.

The other options correspond to different transcript-related concepts. Associated fact belongs to fact management workflows, Exhibit number relates to transcript exhibits, and Count is not the specific transcript Word Index field tested here. While the current public help snippets I found do not surface the exact Word Index field list in one compact line, the available transcript/user documentation supports the transcript- review distinction that makes Speaker the correct answer. This one is slightly less directly quoted than some of the others, but it remains the best verified answer from Relativity transcript behavior.

### NEW QUESTION # 26

.....

Our RCA test training will provide you with a well-rounded service so that you will not lag behind and finish your daily task step by step. At the same time, our RCA study torrent will also save your time and energy in well-targeted learning as we are going to make everything done in order that you can stay focused in learning our RCA Study Materials without worries behind. We are so honored and pleased to be able to read our detailed introduction and we will try our best to enable you a better understanding of our RCA test training better.
