Test PEGACPLSA23V1 Answers | Exam PEGACPLSA23V1 Tutorials

Our PEGACPLSA23V1 test training will provide you with a well-rounded service so that you will not lag behind and finish your daily task step by step. At the same time, our PEGACPLSA23V1 study torrent will also save your time and energy in well-targeted learning as we are going to make everything done in order that you can stay focused in learning our PEGACPLSA23V1 Study Materials without worries behind. We are so honored and pleased to be able to read our detailed introduction and we will try our best to enable you a better understanding of our PEGACPLSA23V1 test training better.

Pegasystems Certified Pega Lead System Architecture (LSA) Exam 23 Sample Questions (Q23-Q28):

NEW QUESTION # 23
Consider a scenario where an e-commerce company is using a Job Scheduler to manage various tasks. The Job Scheduler is responsible for updating inventory, processing orders, sending order confirmation emails, and generating daily sales reports. Which two of the following are typical features of a Job Scheduler?
(Choose Two)

- A. It can run tasks in a specific order.
- B. It can automatically commit the data updates.
- C. It can automatically retry failed tasks.
- D. It can run tasks in parallel.

Answer: C,D

Explanation:
Comprehensive and Detailed Explanation From Exact Extract:
Pega's Job Scheduler is a server-side component designed to execute recurring tasks at specified intervals, as described in Pega Academy'sLead System Architect Missionand thePega Certified Lead System Architect Study Guide. It supports automation and scalability for background processes, making it ideal for tasks like inventory updates or report generation.
* Option A (Correct): Job Schedulers can automatically retry failed tasks, configurable through retry policies in the Job Scheduler rule. This ensures reliability for critical tasks, as documented in theJob Schedulersection of Pega Community.
* Option B (Incorrect): Job Schedulers do not inherently run tasks in a specific order unless explicitly configured with dependencies, which is not a default feature. Tasks are scheduled independently based on their recurrence settings, per theAsynchronous Processingmodule.
* Option C (Incorrect): Job Schedulers do not automatically commit data updates. Committing updates depends on the activities or processes within the scheduled task, and Pega requires explicit commit actions (e.g., Obj-Save), as noted in theData Managementguidelines.
* Option D (Correct): Job Schedulers can run tasks in parallel across multiple nodes, leveraging Pega's distributed processing capabilities. This is particularly useful for high-volume tasks like order processing, as outlined in theJob Scheduler Configurationmodule.
:
Pega Academy:Lead System Architect Mission(covers Job Scheduler features).
Pega Community:Job Scheduler(details on retry and parallel execution).
Pega Certified Lead System Architect Study Guide (v23): Section onWork Delegation and Asynchronous Processing(emphasizes Job Scheduler capabilities).

NEW QUESTION # 24
Select two ways for queuing an item for a queue processor. (Choose Two.)

- A. Use Run in Background smart shape
- B. Use the Queue for -agent method
- C. Use the Queue-for-processing method
- D. Use Utility smart shape

Answer: A,C

NEW QUESTION # 25
What is the primary advantage of using asynchronous processing with a Job Scheduler or Queue Processor?

- A. It reduces the need for background processing altogether.
- B. It ensures real-time processing and immediate results.
- C. It simplifies the overall design of the application.
- D. It allows the system to process tasks concurrently and improves performance.

Answer: D

NEW QUESTION # 26
A warranty claim application is used globally.
Which two of the following statements are good reasons to use application specialization? (Choose Two)

- A. Rules can be circumstanced based on the application name.
- B. Cases can be persisted to region-specific tables based on the application name.
- C. Region-specific users are prevented from accessing cases outside their region.
- D. Each region plans to host its application in its own environment.

Answer: C,D

NEW QUESTION # 27
A case displays recent customer transaction. Different operators often view the recent transactions for the same customer repeatedly throughout the day. the operation to fetch the transactions is resource- intensive, and the source data is updated once an hour.
select two options to configure a data page to cache the customer transactions and minimize the operator's wait time. (choose two)

- A. configure the data page scope to node.
- B. configure the data page scope to thread.
- C. configure the refresh strategy to reload of older than 1 hour
- D. configure the refresh strategy to reload once per interaction.

Answer: A,C
