

# Microsoft DP-100 Practice Exams for Thorough Preparation (Desktop & Web-Based)

BTW, DOWNLOAD part of PrepAwayExam DP-100 dumps from Cloud Storage: <https://drive.google.com/open?id=1XWtErXp5PM1x71V0VUxWZRHEVdBBAzPI>

As a matter of fact, long-time study isn't a necessity, but learning with high quality and high efficient is the key method to assist you to succeed. We provide several sets of DP-100 test torrent with complicated knowledge simplified and with the study content easy to master, thus limiting your precious time but gaining more important knowledge. Our Designing and Implementing a Data Science Solution on Azure guide torrent is equipped with time-keeping and simulation test functions, it's of great use to set up a time keeper to help adjust the speed and stay alert to improve efficiency. Our expert team has designed a high efficient training process that you only need 20-30 hours to prepare the exam with our DP-100 Certification Training. With an overall 20-30 hours' training plan, you can also make a small to-do list to remind yourself of how much time you plan to spend in a day with DP-100 test torrent.

## Microsoft DP-100: Exam Details

Microsoft doesn't provide detailed information regarding its exams, including the DP-100 certification test. The total number of questions in exam is not published on the official website, but the candidates can expect to encounter about 40-60 items in their delivery of their test. There is also a high probability that they will face scenario-based questions with single-answer and multiple-answer options. The duration is all about 120 minutes. The exam is available in several languages, including Japanese, English, Simplified Chinese, and Korean.

The Microsoft DP-100 exam can be taken at any nearest Pearson VUE testing center or online as a proctored option. The cost for the exam is \$165 in the United States but the price is usually different in other countries due to taxation. To find out the actual pricing for your country, simply check the official webpage.

The DP-100 certification exam is an excellent way for professionals to demonstrate their expertise in data science and machine learning on Azure. Designing and Implementing a Data Science Solution on Azure certification exam covers a range of topics, including data exploration, data preparation, modeling, and deployment. It also covers topics such as data ingestion, storage, and processing, as well as the use of various Azure services such as Azure Machine Learning, Azure Databricks, and Azure Cognitive Services. By passing the DP-100 Certification Exam, professionals can demonstrate their skills and knowledge to potential employers, and also gain access to a range of new career opportunities in the field of data science and machine learning.

Microsoft DP-100: Designing and Implementing a Data Science Solution on Azure certification is beneficial for individuals who want

to demonstrate their expertise in data science and Azure technologies to potential employers. Designing and Implementing a Data Science Solution on Azure certification highlights the candidate's proficiency in designing and implementing data solutions on the Azure platform, and it can help them stand out in a competitive job market.

## DP-100 Reliable Dump, Valid DP-100 Test Voucher

With the development of the electronic equipment, there are a lot of changes in the designs of our DP-100 pass-sure torrent. The most impressive version is the APP online version. Normally, it can be used on all kinds of digital devices. But it also has the special advantage that the online version can be used when you are not online, As long as you use it for the first time in a networked environment, you can use the online version of our DP-100 learning guide from anywhere without network connection. I believe the online version of our DP-100 exam questions will be a good choice for you

## Microsoft Designing and Implementing a Data Science Solution on Azure Sample Questions (Q359-Q364):

### NEW QUESTION # 359

You create an Azure Machine Learning dataset containing automobile price data. The dataset includes 10,000 rows and 10 columns. You use the Azure Machine Learning designer to transform the dataset by using an Execute Python Script component and custom code.

The code must combine three columns to create a new column.

You need to configure the code function.

Which configurations should you use? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

**Answer:**

Explanation:

see the answer below.

Explanation

See below image

### NEW QUESTION # 360

You are creating a classification model for a banking company to identify possible instances of credit card fraud. You plan to create the model in Azure Machine Learning by using automated machine learning.

The training dataset that you are using is highly unbalanced.

You need to evaluate the classification model.

Which primary metric should you use?

- A. normalized\_mean\_absolute\_error
- B. [spearman\_correlation
- C. normalized\_root\_mean\_squared\_error
- D. AUC\_weighted
- E. accuracy

**Answer: D**

Explanation:

Explanation

AUC\_weighted is a Classification metric.

Note: AUC is the Area under the Receiver Operating Characteristic Curve. Weighted is the arithmetic mean of the score for each class, weighted by the number of true instances in each class.

Reference:

<https://docs.microsoft.com/en-us/azure/machine-learning/how-to-understand-automated-ml>

### NEW QUESTION # 361

You create a multi-class image classification deep learning model.

The model must be retrained monthly with the new image data fetched from a public web portal. You create an Azure Machine Learning pipeline to fetch new data, standardize the size of images and retrain the model.

You need to use the Azure Machine Learning Python SDK v2 to configure the schedule for the pipeline. The schedule should be defined by using the frequency and interval properties with frequency set to 'month' and interval set to '1':

Which three classes should you instantiate in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

The screenshot shows the 'Actions' list on the left with the following items: AutoPauseSettings, CronTrigger, PipelineJob, RecurrenceTrigger, and JobSchedule. The 'Answer area' on the right is empty. Navigation arrows are present at the bottom of both sections.

**Answer:**

Explanation:

The screenshot shows the 'Actions' list with PipelineJob, RecurrenceTrigger, and JobSchedule highlighted with green dashed boxes. These three actions are moved to the 'Answer area' in the following order: PipelineJob, RecurrenceTrigger, and JobSchedule. The 'Answer area' is enclosed in a red dashed box.

Explanation

The screenshot shows the 'Actions' list with AutoPauseSettings and CronTrigger. The 'Answer area' shows the sequence of actions: 1. PipelineJob, 2. RecurrenceTrigger, and 3. JobSchedule.

### NEW QUESTION # 362

You are building a machine learning model for translating English language textual content into French language textual content.

You need to build and train the machine learning model to learn the sequence of the textual content.

Which type of neural network should you use?

- A. Convolutional Neural Networks (CNNs)
- B. Generative Adversarial Networks (GANs)
- C. Recurrent Neural Networks (RNNs)
- D. Multilayer Perceptions (MLPs)

**Answer: C**

Explanation:

To translate a corpus of English text to French, we need to build a recurrent neural network (RNN).

Note: RNNs are designed to take sequences of text as inputs or return sequences of text as outputs, or both. They're called recurrent because the network's hidden layers have a loop in which the output and cell state from each time step become inputs at the next time step. This recurrence serves as a form of memory.

It allows contextual information to flow through the network so that relevant outputs from previous time steps can be applied to network operations at the current time step.

### NEW QUESTION # 363

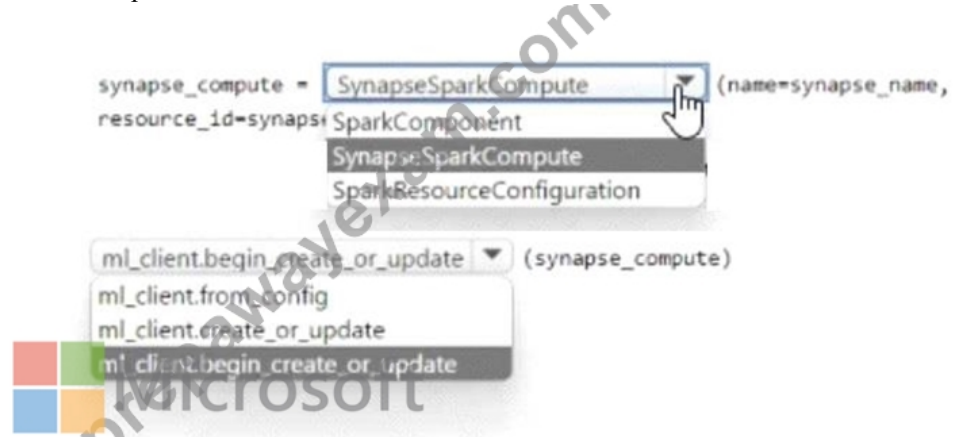

You are creating data wrangling and model training solutions in an Azure Machine Learning workspace.

You must use the same Python notebook to perform both data wrangling and model training.

You need to use the Azure Machine Learning Python SDK v2 to define and configure the Synapse Spark pool asynchronously in the workspace as dedicated compute. How should you complete the code segment? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

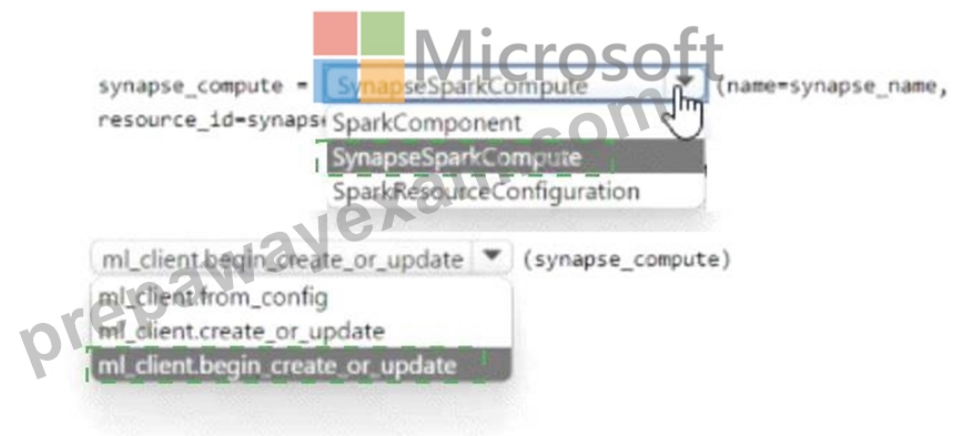

**Answer Area**

**Answer:**

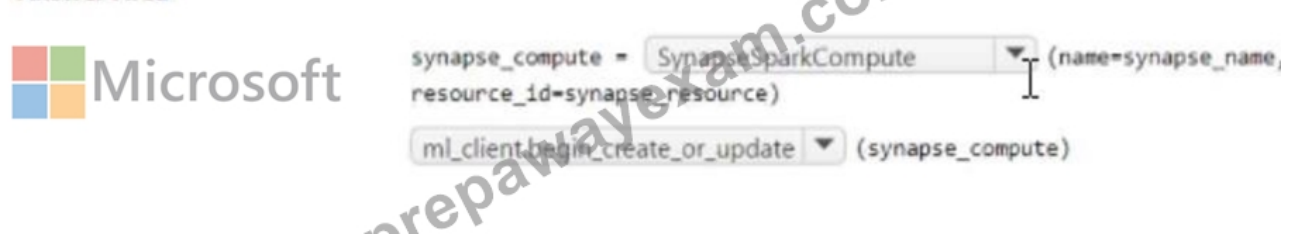

Explanation:

### NEW QUESTION # 364

.....

Before you try to attend the DP-100 practice exam, you need to look for best learning materials to easily understand the key points of DP-100 exam prep. There are DP-100 real questions available for our candidates with accurate answers and detailed explanations. We are ready to show you the most reliable DP-100 PDF VCE and the current exam information for your preparation of the test.
