Free PDF SAP - C_S4CPB_2602 - Updated SAP Certified - Implementation Consultant - SAP S/4HANA Cloud Public Edition (C_S4CPB_2602) Reliable Exam Tips

It is similar to the C_S4CPB_2602 desktop-based software, with all the elements of the desktop practice exam. This mock exam can be accessed from any browser and does not require installation. The SAP Certified - Implementation Consultant - SAP S/4HANA Cloud Public Edition (C_S4CPB_2602) (C_S4CPB_2602) questions in the mock test are the same as those in the real exam. And candidates will be able to take the web-based SAP Certified - Implementation Consultant - SAP S/4HANA Cloud Public Edition (C_S4CPB_2602) (C_S4CPB_2602) practice test immediately through any operating system and browsers.

SAP Certified - Implementation Consultant - SAP S/4HANA Cloud Public Edition (C_S4CPB_2602) Sample Questions (Q12-Q17):

NEW QUESTION # 12
SIMULATION
Migrate Bank Data

Business Scenario

You are responsible for migrating bank data into the SAP S/4HANA Cloud Public Edition system. You have determined the best method is Migrate Data Using Staging Tables, as you only have a couple banks to migrate.

Prerequisites:

Note:

In the task below, always replace ##### with the last 6 digits of your group number.

Note:

Make sure to use the EXACT names/values/spaces as they are listed in the task. Even forgetting a space or a number will cause the validation of the task to fail and be marked as incorrect.

Your Task

Assign the Configuration Expert - Data Migration (BR_CONFIG_EXPERT_DATA_MIG) business role to your user and save.

Answer:

Explanation:

See Explanation below for all solution

Explanation:

Objective

The purpose of this task is to assign the Configuration Expert - Data Migration business role to your own user so that you can use the migration cockpit and perform the bank data migration scenario using staging tables.

The required business role is:

Business Role ID: BR_CONFIG_EXPERT_DATA_MIG

Business Role Description: Configuration Expert - Data Migration

Business Scenario Explanation

In this scenario, you are responsible for migrating bank data into SAP S/4HANA Cloud Public Edition.

Because only a few banks need to be loaded, the chosen migration method is:

Migrate Data Using Staging Tables

Before you can use migration apps such as Migrate Your Data, your user must have the correct migration authorization.

That is why this task requires assigning the business role:

Configuration Expert - Data Migration

BR_CONFIG_EXPERT_DATA_MIG

Without this role, you may not be able to:

create migration projects,

open migration objects,

upload staging-table files,

validate and transfer data,

execute mapping tasks,

or run the migration itself.

Important Notes

Always replace ##### with the last 6 digits of your group number in later migration tasks.

Use the exact role ID required by the task:

BR_CONFIG_EXPERT_DATA_MIG

Save the user after role assignment.

Make sure the user is not left only in draft status.

Required Role

Field

Value

Business Role ID

BR_CONFIG_EXPERT_DATA_MIG

Business Role Description

Configuration Expert - Data Migration

Detailed Step-by-Step Procedure

Step 1: Open the app "Maintain Business Users"

From the SAP S/4HANA Cloud launchpad:

Log in to SAP S/4HANA Cloud.

Use the app search.

Search for:

Maintain Business Users

Open the app.

Explanation:

This app is used to assign business roles to business users.

Since the task asks to assign a role to your own user, this is the correct starting point.

Step 2: Search for your own user

Inside Maintain Business Users:

In the search/filter area, enter your own user ID.

Click Go.

Explanation:

You must assign the migration role to your own user because you are the one who will execute the migration tasks.

Step 3: Open your user record

From the search results:

Click your user entry.

Open the business user details page.

Explanation:

This opens the screen where assigned roles can be reviewed and maintained.

Step 4: Switch to Edit mode

On the business user page:

Click Edit

Explanation:

Edit mode is necessary before the Assigned Business Roles list can be changed.

Step 5: Open the "Assigned Business Roles" tab

Inside the business user record:

Click:

Assigned Business Roles

Explanation:

This is the section where the new business role will be assigned.

Step 6: Click Add

In the Assigned Business Roles area:

Click Add

This opens the popup:

Add Business Roles

Explanation:

This popup allows you to search for and assign standard SAP business roles.

Step 7: Search for the migration role

In the Add Business Roles popup:

In the role search field, enter:

BR_CONFIG_EXPERT_DATA_MIG

Click Go

Select:

Configuration Expert - Data Migration

BR_CONFIG_EXPERT_DATA_MIG

Explanation:

This is the exact role required for the bank migration scenario.

Step 8: Add the role

After selecting the role:

Click OK or Apply

Explanation:

This adds the migration role to your user in draft mode.

Step 9: Save the user

Back on the business user page:

Click Save

Explanation:

This finalizes the assignment.

Without saving, the role will not be available for use in the migration tasks.

Step 10: Verify the role assignment

After saving, confirm that your assigned roles list includes:

Configuration Expert - Data Migration

BR_CONFIG_EXPERT_DATA_MIG

Explanation:

This verifies that your user is now authorized to work with migration projects and staging-table migration.

Expected Result

After this task is completed successfully:

your user has the role BR_CONFIG_EXPERT_DATA_MIG,

the role assignment is saved,
your user can proceed with the bank migration project tasks,
migration-related apps are available to your user.

NEW QUESTION # 13

SIMULATION

Create a Custom Launchpad Space and Page

Business Scenario

You are building a custom business role that will be assigned to all employees in the organization. The business role and its corresponding Launchpad Space and Page need to include the apps that have been granted through the business catalogs assigned to the business role to ensure employees have an easy time finding the relevant applications.

Note: In the task below, always replace ##### with the last 6 digits of your group number.

Note:

Make sure to use the EXACT names/values/spaces as they are listed in the task.

Even forgetting a space or a number will cause the validation of the task to fail and be marked as incorrect.

Task

Create a new business role (not from a template) with the information below.

Answer:

Explanation:

See Explanation below for all solution

Explanation:

Task 8: Create a New Business Role (Not from a Template)

Objective

The purpose of this task is to create a new custom business role for all employees in the organization. This role is intended to become the base role that will later be connected to the required business catalogs, launchpad space, and page so that employees can easily access the relevant apps.

This task explicitly says:

create a new business role

not from a template

use the exact values provided in the task

Business Scenario Explanation

You are building a role for all employees in the organization.

Unlike the earlier project-manager role, this one is not derived from a standard SAP template.

The purpose of this role is to provide a shared employee-level launchpad structure.

Later, the role will be used to:

assign business catalogs,

create a launchpad space,

create a launchpad page,

place apps on the page for employee self-service access.

In this step, the focus is only on creating the new business role with the correct identification and access category settings.

Important Notes

Always replace ##### with the last 6 digits of your group number.

Use the values exactly as shown.

Do not create this role from a template.

The access categories must be set exactly as required:

Unrestricted for all categories

Save the role at the end.

Required Values

Use the following values exactly as shown in the task screenshot

Step 1: Open the app "Maintain Business Roles"

From the SAP S/4HANA Cloud launchpad:

Log in to SAP S/4HANA Cloud.

Use the app search.

Search for:

Maintain Business Roles

Open the app.

Explanation:

This app is used to create, maintain, copy, derive, and restrict business roles.

Since this task requires creating a brand new custom role, this is the correct place to start.

Step 2: Start creating a new business role

Inside Maintain Business Roles:

Click New

Explanation:

This task explicitly says to create a role not from a template.

So you must use New, not:

Create From Template

Create Derived Business Role

Copy

Using New creates a completely customer-defined business role.

Step 3: Enter the business role ID

In the new business role creation screen:

In Business Role ID, enter:

Z_EMPLOYEES_ALL_#####

Example

For suffix 000013:

Z_EMPLOYEES_ALL_000013

Explanation:

This is the technical identifier of the new business role.

It must match the task exactly for validation to succeed.

Step 4: Enter the business role description

In Business Role Description, enter:

All Employee Role #####

Example

For suffix 000013:

All Employee Role 000013

Explanation:

This is the readable description shown in SAP and should exactly match the exercise requirement.

Step 5: Set access categories

In the Access Categories section, set all categories to:

Write, Read, Value Help = Unrestricted

Read, Value Help = Unrestricted

Value Help = Unrestricted

Explanation:

The task explicitly says:

Access Categories: Unrestricted for all categories

So all three category dropdowns must be left or set to Unrestricted.

This means:

the role is not restricted by country, company code, or other field-level limitation in this step, this role is intended to be broadly reusable for all employees.

Step 6: Review the role before saving

Before saving, verify:

Business Role ID is correct

Business Role Description is correct

all 3 access category values are Unrestricted

Explanation:

This avoids common mistakes such as:

wrong suffix,

extra spaces,

restricted instead of unrestricted values,

creating from template accidentally.

Step 7: Save the role

Click:

Save

Explanation:

This finalizes the new business role.

Without saving, the role remains only in draft and is not actually created.

Step 8: Verify the role after save

After saving, confirm that the role is displayed with:

Business Role ID = Z_EMPLOYEES_ALL_#####

Business Role Description = All Employee Role #####

Write Access / Read Access / Value Help Access = Unrestricted

Explanation:

This is the confirmation that the role was created successfully and matches the task requirement.

Expected Result

After the task is completed successfully:

a new custom business role exists,

it was created not from a template,

the role ID and description match the required values,

all access categories are Unrestricted,

the role is saved and available for the next steps.

NEW QUESTION # 14

SIMULATION

Create a Business User and Assign a Business Role

Business Scenario

You are working on an implementation project and need to create a test user in the system for demonstrating the professional services business processes to project managers during your upcoming Fit-to-Standard workshop. Follow the instructions below to create a new test user with a basic import of worker and work agreement data.

Note: In the task below, always replace ##### with the last 6 digits of your group number.

Note:

Make sure to use the EXACT names/values/spaces as they are listed in the task.

Even forgetting a space or a number will cause the validation of the task to fail and be marked as incorrect.

Task:

Assign the HR Administrator (BR_ADMINISTRATOR_HRINFO) business role to your user.

Answer:

Explanation:

See Explanation below for all solution

Explanation:

Task 3: Assign the HR Administrator Business Role to Your User

Objective

The purpose of this task is to assign the HR Administrator business role to your own business user so you can continue the worker, work agreement, and business user setup activities required for the professional services scenario.

The required business role is:

Business Role ID: BR_ADMINISTRATOR_HRINFO

Business Role Description: Administrator - HR Info

Task 3: Assign the HR Administrator Business Role to Your User

Objective

The purpose of this task is to assign the HR Administrator business role to your own business user so you can continue the worker, work agreement, and business user setup activities required for the professional services scenario.

The required business role is:

Business Role ID: BR_ADMINISTRATOR_HRINFO

Business Role Description: Administrator - HR Info

Step 1: Open the app "Maintain Business Users"

From the SAP S/4HANA Cloud launchpad:

Log in to SAP S/4HANA Cloud.

Use the app search or launchpad search.

Search for:

Maintain Business Users

Open the app.

Explanation:

This app is used to maintain user master data and assign business roles.

All business role assignments for your own user are done here.

Step 2: Search for your own user

In Maintain Business Users:

In the filter/search area, enter your own user name or user ID.

Click Go.

Explanation:

You need to open your own user because the HR Administrator role must be assigned to your own account before continuing the simulation.

Step 3: Open your user record

After the search results appear:

Click your own user in the result list.

Open the detail page.

Explanation:

This opens the business user detail screen where all assigned roles can be reviewed and maintained.

Step 4: Switch to Edit mode

On the user detail page:

Click Edit.

Explanation:

Edit mode is required before you can add or remove business roles.

Without edit mode, the Assigned Business Roles tab is display-only.

Step 5: Open the "Assigned Business Roles" tab

Inside your user record:

Click the tab:

Assigned Business Roles

Explanation:

This tab lists all current roles assigned to your user and is the correct place to add BR_ADMINISTRATOR_HRINFO.

Step 6: Click "Add"

In the Assigned Business Roles section:

Click Add

This opens the dialog:

Add Business Roles

Explanation:

This popup allows you to search for standard SAP business roles by ID or description.

Step 7: Search for the HR Administrator role

In the Add Business Roles popup:

In Business Role ID, enter:

BR_ADMINISTRATOR_HRINFO

Click Go

Select the role:

Administrator - HR Info

Business Role ID: BR_ADMINISTRATOR_HRINFO

Explanation:

This is the exact role required by the task.

It gives you the workforce / HR information administration permissions needed for the later simulation steps.

Step 8: Add the role to the user

After selecting the role:

Click OK or Apply

The role should now appear in your assigned roles list.

Explanation:

At this stage, the role is added to the user in draft mode, but it is not yet permanently stored until you save.

Step 9: Save the business user

Back on the business user detail page:

Click Save

Explanation:

Saving is mandatory.

If you do not save, the role assignment remains incomplete and later tasks may fail because your user will not actually have the HR Administrator authorization.

Step 10: Verify the role assignment

After saving, verify that the role appears in the assigned roles list:

BR_ADMINISTRATOR_HRINFO

Administrator - HR Info

Explanation:

This is your proof that the task is complete.

You should see the HR role together with your other assigned roles.

Expected Result

After completing this task successfully:
your user has the HR Administrator role assigned,
the role appears in Assigned Business Roles,
the user is saved successfully,
later worker/business-user creation steps can be performed.

Why this role matters

The role BR_ADMINISTRATOR_HRINFO is required because the scenario involves:

worker information,
work agreement information,
user creation for workshop demonstration,
HR-related administration steps.

In SAP S/4HANA Cloud, access is always role-based, so assigning this role is an authorization prerequisite for later tasks.

NEW QUESTION # 15

SIMULATION

Create a Custom Launchpad Space and Page

Business Scenario

You are building a custom business role that will be assigned to all employees in the organization. The business role and its corresponding Launchpad Space and Page need to include the apps that have been granted through the business catalogs assigned to the business role to ensure employees have an easy time finding the relevant applications.

Note: In the task below, always replace ##### with the last 6 digits of your group number.

Note:

Make sure to use the EXACT names/values/spaces as they are listed in the task.

Even forgetting a space or a number will cause the validation of the task to fail and be marked as incorrect.

Task:

Create a Launchpad Space and Page with the information below.

□

Answer:

Explanation:

See Explanation below for all solution

Explanation:

Objective

The purpose of this task is to create a custom launchpad space and page for the all-employee business role so employees can easily find the apps granted through the assigned business catalogs.

This task belongs to the all-employee role created in the previous tasks, for example:

Business Role ID: Z_EMPLOYEES_ALL_#####

The page values shown in the task are:

Page Title: General

Page Description: General

□ Business Scenario Explanation

In SAP S/4HANA Cloud, business catalogs grant the app authorizations, but users still need a clean launchpad structure so they can actually find those apps easily.

That is why this task requires creating:

a Launchpad Space

a Launchpad Page

for the all-employee role.

The space acts like a container in the launchpad navigation, and the page acts like the content area where app tiles will later be displayed.

Important Notes

Always replace ##### with the last 6 digits of your group number.

Use the exact text values shown in the task.

The task image explicitly shows:

Page Title = General

Page Description = General

Save each object after creation.

Required Values

From the task image, use:

Parameter

Value

Page Title

General

Page Description

General

Additional execution values used in your run

During your actual execution, the custom launchpad space/page used this pattern:

Space ID: Z_ALL_EMP_#####

Space Description: General

Space Title: General

Page ID: Z_ALL_EMP_#####

Page Title: General

Page Description: General

Objective

The purpose of this task is to create a custom launchpad space and page for the all-employee business role so employees can easily find the apps granted through the assigned business catalogs.

This task belongs to the all-employee role created in the previous tasks, for example:

Business Role ID: Z_EMPLOYEES_ALL_#####

The page values shown in the task are:

Page Title: General

Page Description: General

Business Scenario Explanation

In SAP S/4HANA Cloud, business catalogs grant the app authorizations, but users still need a clean launchpad structure so they can actually find those apps easily.

That is why this task requires creating:

a Launchpad Space

a Launchpad Page

for the all-employee role.

The space acts like a container in the launchpad navigation, and the page acts like the content area where app tiles will later be displayed.

Important Notes

Always replace ##### with the last 6 digits of your group number.

Use the exact text values shown in the task.

The task image explicitly shows:

Page Title = General

Page Description = General

Save each object after creation.

Required Values

From the task image, use:

Parameter

Value

Page Title

General

Page Description

General

Additional execution values used in your run

During your actual execution, the custom launchpad space/page used this pattern:

Space ID: Z_ALL_EMP_#####

Space Description: General

Space Title: General

Page ID: Z_ALL_EMP_#####

Page Title: General

Page Description: General

□

NEW QUESTION # 16

SIMULATION

Migrate Bank Data

Business Scenario

You are responsible for migrating bank data into the SAP S/4HANA Cloud Public Edition system. You have determined the best method is Migrate Data Using Staging Tables, as you only have a couple banks to migrate.

Prerequisites:

Note:

In the task below, always replace ##### with the last 6 digits of your group number.

Note:

Make sure to use the EXACT names/values/spaces as they are listed in the task. Even forgetting a space or a number will cause the validation of the task to fail and be marked as incorrect.

Task:

Check the documentation for the Bank migration object and assign the additional business role required to ensure you can migrate bank data into the system.

Answer:

Explanation:

See Explanation below for all solution

Explanation:

Objective

The purpose of this task is to check the Bank migration object documentation and assign the additional business role needed so you can successfully migrate bank data into SAP S/4HANA Cloud Public Edition.

The additional business role required is:

Business Role Template: SAP_BR_MD_SPECIALIST_BNK

Business Role Description: Master Data Specialist - Bank Data

SAP documents that the app Manage Banks - Master Data is assigned to the business role Master Data Specialist - Bank Data (SAP_BR_MD_SPECIALIST_BNK) in business catalog Bank - Maintenance (SAP_CA_BC_BNK_PC). That is the role needed for bank master data maintenance and is the missing authorization when the migration cockpit can load data but cannot create banks in the target system.

Business Scenario Explanation

In the previous migration steps, you already assigned the role:

Configuration Expert - Data Migration

BR_CONFIG_EXPERT_DATA_MIG

That role gives access to the migration cockpit itself, meaning you can:

create migration projects,

select migration objects,

upload CSV files,

validate data,

transfer data to staging tables,

and execute migration runs.

However, for the Bank migration object, SAP also requires the authorization to create bank master data in the target system. If that authorization is missing, the migration can still reach the execution stage, but then fail with an authorization message such as:

You are not authorized to create bank data for country/region US

That is why the additional role Master Data Specialist - Bank Data (SAP_BR_MD_SPECIALIST_BNK) must be assigned.

Important Notes

Always replace ##### with the last 6 digits of your group number in later migration steps.

The role to add here is in addition to the migration cockpit role.

Save the user after assigning the role.

Refresh the session after assignment so the new authorization is loaded.

Required Additional Role

Step 1: Review the migration object documentation

Open the Bank migration object in the migration project and review the documentation or role requirement note.

Explanation:

The task explicitly asks you to check the documentation for the Bank migration object and assign the additional role required for migration. SAP's official documentation for bank maintenance shows that bank master maintenance is tied to the role Master Data Specialist - Bank Data (SAP_BR_MD_SPECIALIST_BNK).

Step 2: Open the app "Maintain Business Users"

From the SAP S/4HANA Cloud launchpad:

Log in to SAP S/4HANA Cloud.

Search for:

Maintain Business Users

Open the app.

Explanation:

This app is used to assign business roles to your user.

Step 3: Search for your own user

In Maintain Business Users:

Enter your own user ID in the search field.

Click Go.

Explanation:

You must assign the additional role to your own user because you are the one executing the migration.

Step 4: Open your user record

From the search results:

Click your user entry.

Open the business user detail page.

Explanation:

This opens the maintenance screen where assigned business roles can be changed.

Step 5: Switch to Edit mode

On the user detail page:

Click Edit

Explanation:

Edit mode is required before the assigned business roles list can be updated.

Step 6: Open the "Assigned Business Roles" tab

Inside the business user record:

Click:

Assigned Business Roles

Explanation:

This is where you assign the additional bank master data role.

Step 7: Click Add

In the assigned business roles section:

Click Add

This opens the popup:

Add Business Roles

Explanation:

This popup is used to search for standard SAP business roles.

Step 8: Search for the additional bank role

In the Add Business Roles popup, search for either:

SAP_BR_MD_SPECIALIST_BNK

or

Master Data Specialist - Bank Data

Then select the matching role.

Explanation:

SAP documents that the app Manage Banks - Master Data belongs to the role Master Data Specialist - Bank Data (SAP_BR_MD_SPECIALIST_BNK). That is the role needed for bank creation/maintenance authorization.

Step 9: Add the role

After selecting the role:

Click OK or Apply

Explanation:

This adds the role to your user in draft mode.

Step 10: Save the business user

Back on the business user page:

Click Save

Explanation:

This finalizes the new role assignment.

Step 11: Confirm both migration-related roles are assigned

After saving, verify that your user now has both:

BR_CONFIG_EXPERT_DATA_MIG

SAP_BR_MD_SPECIALIST_BNK

Explanation:

These two roles cover different parts of the scenario:

BR_CONFIG_EXPERT_DATA_MIG → migration cockpit access

SAP_BR_MD_SPECIALIST_BNK → bank master data creation/maintenance authorization

Step 12: Refresh your session After saving:

Refresh the browser completely, or

Sign out and sign in again

Explanation:

SAP role assignments may not become active in the current session immediately. A refresh or new login ensures the authorization is reloaded.

Step 13: Return to the migration project

Go back to:

Migrate Your Data

open your project:

Bank Data #####

open migration object:

Bank

Explanation:

Now that the additional bank role is assigned, the system should allow you to migrate bank master data successfully.

Expected Result

After this task is completed successfully:

your user still has the migration role BR_CONFIG_EXPERT_DATA_MIG,

your user also has the additional bank role SAP_BR_MD_SPECIALIST_BNK,

the authorization error for creating bank data should no longer occur,

the Bank migration can proceed successfully.

Screenshots for This Task

Screenshot 1: Assigned Business Roles list including the migration role Use the screenshot from your run where the business user already shows:

Configuration Expert - Data Migration

This screenshot can be used to explain the starting point before the additional role is assigned.

What this screenshot proves

It shows that the migration role alone was not enough for the bank creation authorization.

Screenshot 2: Migration error message

Use the screenshot from your run that shows the message:

You are not authorized to create bank data for country/region US

This is the key evidence that an additional bank master data role was required.

What this screenshot proves

It proves the migration cockpit role was present, but bank maintenance authorization was still missing.

Official SAP Documentation Basis

SAP's official documentation states that the Manage Banks - Master Data app is assigned to:

Master Data Specialist - Bank Data

SAP_BR_MD_SPECIALIST_BNK

within catalog:

Bank - Maintenance

SAP_CA_BC_BNK_PC

This is the basis for the additional role assignment required in this task.
