Exam 1z0-1042-24 Guide | 1z0-1042-24 Book Free

2026 Latest LatestCram 1z0-1042-24 PDF Dumps and 1z0-1042-24 Exam Engine Free Share: https://drive.google.com/open?id=1bEIJu8BA4AxKeeZx_uiUwltP01MDFvbQ

Our 1z0-1042-24 exam dumps are compiled by our veteran professionals who have been doing research in this field for years. There is no question to doubt that no body can know better than them. The content and displays of the 1z0-1042-24 pass guide Which they have tailor-designed are absolutely more superior than the other providers'. Besides, they update our 1z0-1042-24 Real Exam every day to make sure that our customer can receive the latest 1z0-1042-24 preparation brain dumps.

Oracle 1z0-1042-24 Exam Syllabus Topics:

Topic	Details
Topic 1	• Testing, Monitoring, and Troubleshooting Integrations: This section assesses candidates abilities in testing, monitoring, and troubleshooting integrations within the OIC.
Topic 2	• Using OIC Connections & Adapters: Candidates must demonstrate their ability to create and configure OIC connections, including trigger and invoke connections. They should be familiar with the Connectivity Agent, which facilitates on-premises connectivity to OIC services.
Topic 3	• Getting Started with OIC Integrations: This section tests the ability of IT professionals and integration specialists to understand the fundamental components and concepts of Oracle Integration Cloud (OIC). Candidates are expected to describe the key features of OIC integration and explain core integration concepts.
Topic 4	• Creating Orchestrated Integrations: This part of the exam evaluates the candidate's skills in creating and managing orchestrated integrations using OIC. Candidates should be able to manage OIC lookups, use the OIC Data Mapper, and incorporate custom JavaScript libraries into their integrations.
Topic 5	• Creating Scheduled Integrations: In this section of the exam, candidates are evaluated based on their skills in managing scheduled integrations. This includes converting scheduled integrations to app-driven integrations and understanding the scheduling options within the OIC.

100% Pass Quiz 2026 High Pass-Rate Oracle Exam 1z0-1042-24 Guide

These features enable you to study real 1z0-1042-24 questions in PDF anywhere. LatestCram also updates its questions bank in Oracle Cloud Infrastructure 2024 Application Integration Professional (1z0-1042-24) PDF according to updates in the Oracle 1z0-1042-24 Real Exam syllabus. These offers by LatestCram save your time and money. Buy Oracle Cloud Infrastructure 2024 Application Integration Professional (1z0-1042-24) practice material today.

Oracle Cloud Infrastructure 2024 Application Integration Professional Sample Questions (Q32-Q37):

NEW QUESTION # 32

When defining the frequency for scheduled orchestration style integration runs, you can choose either Basic or the Advanced option. Which expression format is used for defining advanced scheduled runs?

- A. cron
- B. iCal
- C. Groovy
- D. YAML

Answer: B

Explanation:
Comprehensive and Detailed Explanation:
OIC provides two scheduling options: Basic (simple intervals) and Advanced (complex patterns). For Advanced scheduling, OIC uses theiCal (Internet Calendaring)format, a standard for defining recurring events.
* Option A:iCal supports expressions like FREQ=DAILY;BYDAY=MO-FR, ideal for precise scheduling.
* Option B:Cron is common in UNIX systems but not used in OIC.
* Option C:YAML is a data serialization format, not for scheduling.

NEW QUESTION # 33

Which statements are TRUE about WSDL? Select TWO.

- A. It uses XML to define the service layer document which consists of origin of the web service, headers, port types, request, and response data.
- B. It stands for "Web Service Description Language" and is a document written in XML.
- C. It is a wrapper for a SOAP message.
- D. It stands for "Web Service Description Language" and is a document written in Object Notation.
- E. It uses XML or JSON to define the service layer document which consists of origin of the web service, headers, port types, request, and response data.

Answer: A,B

Explanation:
Comprehensive and Detailed Explanation:
WSDL (Web Services Description Language):
* A:True-defines service details (ports, operations, messages) in XML.
* B:True-full name and XML-based nature are accurate.
* C:False-WSDL uses XML, not Object Notation (e.g., JSON).
* D:False-WSDL describes services, not a message wrapper.

NEW QUESTION # 34

Which operation is NOT supported by an Oracle Integration Cloud (OIC) connection resource configured with FTP Adapter in the Invoke role?

- A. Download File
- B. Read File
- C. Write File
- D. Delete File
- E. Read File in Segments

Answer: E

Explanation:
Comprehensive and Detailed Explanation:
The OIC FTP Adapter in theInvoke rolefacilitates interactions with an FTP server from an integration flow.
Let's break down each operation with exhaustive detail:

* Option A: Write File
* Supported:The FTP Adapter allows writing files to an FTP server. For example, you could use a Stage File action to prepare a CSV file and then invoke the FTP Adapter to write it to a remote directory like /inbound. This is a core capability for outbound file transfers.
* Option B: Read File
* Supported:Reading an entire file from an FTP server is possible in Invoke mode. You specify a file path (e.g., /outbound/data.csv), and the adapter retrieves itscontents, useful for processing complete files in one go, like a daily report.
* Option C: Read File in Segments
* Not Supported (Answer):This operation, which processes large files incrementally (e.g., 100 records at a time), is exclusive to theTrigger roleor Stage File actions, not the Invoke role of the FTP Adapter. In Invoke mode, the adapter doesn't support segmented reading because it's designed for direct, one-shot operations rather than iterative processing. For segmented reads, you'd use a File Adapter in Trigger mode or Stage File with a Connectivity Agent.
* Option D: Delete File
* Supported:Deleting a file on the FTP server (e.g., /archive/oldfile.txt) is a standard Invoke operation, often used for cleanup after processing.
* Option E: Download File
* Supported:Downloading retrieves a file to OIC for further processing, similar to Read File but typically implies storing it locally in the integration flow (e.g., staging it).
Why C is the answer:The Invoke role focuses on discrete actions (write, read, delete, download), not iterative tasks like segmented reading, which requires a polling mechanism better suited to Trigger roles or Stage File actions.
Edge Case:If you need segmented reading from an FTP server, you'd download the file first using Invoke, then use a Stage File action to process it in segments- a workaround, not a direct capability.
Use Case Example:An integration writing a sales report to FTP (A), downloading a log file (E), and deleting an old backup (D) works fine, but attempting to read a 10GB file in segments (C) fails in Invoke mode.

NEW QUESTION # 35
You are working on integration within Oracle Integration (OIC) that includes several connections to external systems. As part of your development work, you need to implement fault handling to ensure that any unexpected errors are caught and handled correctly. Which approach can you use for this requirement?

* A. Add a Try-Catch action to your integration flow and configure it to catch and handle faults.
* B. Create a separate fault handling integration and configure your integration to invoke it when necessary using the Rethrow Fault action.
* C. Open the Global Fault Handler page on the integration canvas and add actions to handle faults.
* D. Use the Throw New Fault action within your integration flow to send caught faults to the OIC Error Hospital.

Answer: C

Explanation:
Comprehensive and Detailed Explanation:
Fault Handling:
* C:True-Global Fault Handler is standard.

NEW QUESTION # 36
Which two statements are true regarding messaging adapters in Oracle Integration Cloud (OIC)?

* A. It is not mandatory to install a connectivity agent to use the OCI Streaming Adapter for Inbound polling.
* B. The OCI Streaming adapter does not support consuming messages from a specified consumer group.
* C. Both the Apache Kafka and OCI Streaming adapters support XML, JSON, and AVRO message formats.
* D. The Apache Kafka Adapter can be configured to support Transactions in case of Producers.

Answer: C,D

Explanation:
Comprehensive and Detailed Explanation:
Messaging adapters:
* A:True-Kafka and OCI Streaming support XML, JSON, and AVRO.
* C:True-Kafka adapter supports producer transactions.
* B:False-OCI Streaming supports consumer groups.

NEW QUESTION # 37

......

We understand your itching desire of the exam. Do not be bemused about the exam. We will satisfy your aspiring goals. Our 1z0-1042-24 real questions are high efficient which can help you pass the exam during a week. We just contain all-important points of knowledge into our 1z0-1042-24 latest material. And we keep ameliorate our 1z0-1042-24 latest material according to requirements of 1z0-1042-24 exam. Besides, we arranged our 1z0-1042-24 Exam Prep with clear parts of knowledge. You may wonder whether our 1z0-1042-24 real questions are suitable for your current level of knowledge about computer, as a matter of fact, our 1z0-1042-24 exam prep applies to exam candidates of different degree. By practicing and remember the points in them, your review preparation will be highly effective and successful.
