Pass-guaranteed SPLK-1004 Exam Practice Display the High-quality Training Materials - Exam-Killer

The pass rate is 98.65%, and we can ensure you pass the exam if you choose SPLK-1004 training materials from us. In addition, we have professional experts to compile and verify SPLK-1004 questions and answers, therefore you can just use them at ease. We also pass guarantee and money back guarantee if you fail to pass the exam. Free update for SPLK-1004 Training Materials is available, namely, in the following year, you don't need to spend a cent, but you can get the latest information of the exam. And the latest version for SPLK-1004 exam brindumps will send to your email automatically.

Splunk Core Certified Advanced Power User Sample Questions (Q18-Q23):

NEW QUESTION # 18

Which function of the stats command creates a multivalue entry?

- A. makemv
- **B. list**
- C. mvcombine
- D. eval

Answer: B

Explanation:

The list function of the stats command creates a multivalue entry, combining multiple occurrences of a field into a single multivalue field.

The `list` function of the `stats` command creates a multivalue entry by aggregating values from multiple events into a single field. This is particularly useful when you want to group data and collect all matching values into a list.

Here's why this works:

* Purpose of `list`: The `list` function collects all values of a specified field for each group and stores them as a multivalue field. For example, if you group by `user_id`, the `list` function will create a multivalue field containing all corresponding product values for that user.

* Multivalue Fields: Multivalue fields allow you to handle multiple values within a single field, which can be expanded or manipulated using commands like `mvexpand` or `foreach`.

NEW QUESTION # 19

Which of the following functions' primary purpose is to convert epoch time to a string format?

- A. `tostring`
- B. `strftime`
- C. `strptime`
- D. `tonumber`

Answer: B

Explanation:

The `strftime` function in Splunk is used to convert epoch time (also known as POSIX time or Unix time, which is a system for describing points in time as the number of seconds elapsed since January 1, 1970) into a human-readable string format. This function is particularly useful when formatting timestamps in search results or when creating more readable time representations in dashboards and reports. The `strftime` function takes an epoch time value and a format string as arguments and returns the formatted time as a string according to the specified format. The other options (`tostring`, `strptime`, and `tonumber`) serve different purposes: `tostring` converts values to strings, `strptime` converts string representations of time into epoch format, and `tonumber` converts values to numbers.

NEW QUESTION # 20

Repeating JSON data structures within one event will be extracted as what type of fields?

- A. `Mvindex`
- B. `Multivalue`
- C. `Lexicographical`
- D. `Single value`

Answer: B

Explanation:

Repeating JSON data structures within a single event in Splunk are extracted as multivalue fields (Option C).

Multivalue fields allow a single field to contain multiple distinct values, which is common with JSON data structures that include arrays or repeated elements. Splunk's field extraction capabilities automatically recognize and parse these structures, allowing users to work with each value within the multivalue field for analysis and reporting.

NEW QUESTION # 21

What file types does Splunk use to define geospatial lookups?

- A. `GPX` or `GML` files
- B. `KMZ` or `KML` files
- C. `TXT` files
- D. `CSV` files

Answer: B

Explanation:

Splunk uses KMZ or KML files to define geospatial lookups. These formats are designed for geographic annotation and mapping, making them ideal for geospatial data in Splunk.

NEW QUESTION # 22

What command is used to compute and write summary statistics to a new field in the event results?

- A. eventstats
- B. transaction
- C. stats
- D. tstats

Answer: A

Explanation:

The eventstats command in Splunk is used to compute and add summary statistics to all events in the search results, similar to stats, but without grouping the results into a single event.

NEW QUESTION # 23

.....

There may be a lot of people feel that the preparation process for exams is hard and boring, and hard work does not necessarily mean good results, which is an important reason why many people are afraid of examinations. Today, our SPLK-1004 study materials will radically change this.
