Um die Interessen zu schützen, bietet unsere Website die online Prüfungen zur VMware 2V0-13.24 Zertifizierungsprüfung von ITZert, die von den erfahrungsreichen IT-Experten nach den Bedürfnissen bearbeitet werden. Sie werden Ihnen nicht nur helfen, die VMware 2V0-13.24 Prüfung zu bestehen und auch eine bessere Zukunft zu haben.

VMware 2V0-13.24 Prüfungsplan:

Thema	Einzelheiten
Thema 1	• VMware by Broadcom Solution: This section of the exam measures the skills of cloud architects and infrastructure engineers and focuses on understanding the architecture of VMware by Broadcom solution. Candidates should be able to differentiate between various VMware Cloud Foundation architecture options based on different scenarios.
Thema 2	• IT Architectures, Technologies, Standards: This section of the exam measures the skills of enterprise architects and solution architects and focuses on the fundamentals of IT architectures, technologies, and standards. It covers differentiating between business and technical requirements, understanding conceptual models, and logical and physical designs, and recognizing the distinctions between requirements, assumptions, constraints, and risks. Also included are availability, manageability, performance, recoverability, and security (AMPRS), developing risk mitigation strategies, documenting design decisions, and creating design validation strategies.
Thema 3	• Troubleshoot and Optimize the VMware by Broadcom Solution: This section has NO TESTABLE OBJECTIVES in this version of the exam.
Thema 4	• Install, Configure, and Administrate the VMware by Broadcom Solution: This section has NO TESTABLE OBJECTIVES in this version of the exam.
Thema 5	• Plan and Design the VMware by Broadcom Solution: This section of the exam measures the skills of VMware administrators. It involves gathering and analyzing business objectives and requirements to create a conceptual model. Additionally, it covers the creation of VMware Cloud Foundation logical and physical designs. This includes prerequisites and design decisions related to Network Infrastructure, VCF Management Domain, VCF Workload Domain, VCF Edge Cluster, VCF Cloud Automation, and VCF Cloud Operations. Designs should consider availability within and across availability zones, manageability (Lifecycle Management, Scalability, Capacity Management), performance, recoverability (BCDR strategies), and security for VCF Management Components and Workloads. Workload mobility, consumption, and monitoring strategies are also addressed in this section.

2V0-13.24 Online Praxisprüfung, 2V0-13.24 Unterlage

Wenn Sie in kurzer Zeit mit weniger Mühe sich ganz effizient auf die VMware 2V0-13.24 Zertifizierungsprüfung vorbereiten, benutzen Sie doch schnell die Schulungsunterlagen zur VMware 2V0-13.24 Zertifizierungsprüfung. Sie werden von der Praxis bewährt. Viele Kandidaten haben bewiesen, dass man mit der Hilfe von ITZert die Prüfung 100% bestehen können. Mit ITZert können Sie Ihr Ziel erreichen und die beste Effekte erzielen.

VMware Cloud Foundation 5.2 Architect 2V0-13.24 Prüfungsfragen mit Lösungen (Q34-Q39):

34. Frage

A customer is implementing a new VMware Cloud Foundation (VCF) instance and has a requirement to deploy Kubernetes-based applications. The customer has no budget for additional licensing. Which VCF feature must be implemented to satisfy the requirement?

- A. Aria Automation
- B. VCF Edge
- **C. IaaS control plane**
- D. Tanzu Mission Control

Antwort: C

Begründung:

The customer requires Kubernetes-based application deployment within a new VCF 5.2 instance without additional licensing costs. VCF includes foundational components and optional features, some requiring separate licenses. Let's evaluate each option:

Option A: Tanzu Mission ControlTanzu Mission Control (TMC) is a centralized management platform for Kubernetes clusters across environments. It's a SaaS offering requiring a separate subscription, not included in the base VCF license. TheVCF 5.2 Architectural Guideexcludes TMC from standard VCF features, making it incompatible with the no-budget constraint.

Option B: VCF EdgeVCF Edge refers to edge computing deployments (e.g., remote sites) using lightweight VCF instances. It's not a Kubernetes-specific feature and doesn't inherently provide Kubernetes capabilities without additional configuration or licensing (e.g., Tanzu). TheVCF 5.2 Administration Guidepositions VCF Edge as an architecture, not a Kubernetes solution.

Option C: Aria AutomationAria Automation (formerly vRealize Automation) provides cloud management and orchestration, including some Kubernetes integration via Tanzu Service Mesh or custom workflows.

However, it's an optional component in VCF, often requiring additional licensing beyond the base VCF bundle, per theVCF 5.2 Licensing Guide. It's not mandatory for basic Kubernetes and violates the budget restriction.

Option D: IaaS control planeIn VCF 5.2, the IaaS control plane includes VMware Cloud Director or the native vSphere with Tanzu capability (via NSX and vSphere 7.x). vSphere with Tanzu, enabled through the Workload Management feature, provides a Supervisor Cluster for Kubernetes without additional licensing beyond VCF's core components (vSphere, vSAN, NSX). TheVCF 5.2 Architectural Guideconfirms that vSphere with Tanzu is included in VCF editions supporting NSX, allowing Kubernetes-based application deployment (e.g., Tanzu Kubernetes Grid clusters) at no extra cost.

Conclusion:TheIaaS control plane (D), leveraging vSphere with Tanzu, meets the requirement for Kubernetes deployment within VCF 5.2's existing licensing, satisfying the no-budget constraint.References:

35. Frage

What is the primary purpose of a logical design for VMware Cloud Foundation?

Response:

- A. To specify the backup and disaster recovery strategies
- **B. To provide a detailed blueprint for the network, storage, and compute resources**
- C. To configure the virtual machines and workloads
- D. To determine the physical hardware and network components

Antwort: B

36. Frage

Which two actions are required to support business continuity in a VCF deployment?

(Choose two)

Response:

- A. Ensuring that all virtual machines are replicated across regions
- **B. Implementing vSphere HA for automatic restart of workloads**
- **C. Configuring multi-region clusters for high availability**
- D. Setting up cloud-based backup for virtual machine snapshots

Antwort: B,C

37. Frage

Due to limited budget and hardware, an administrator is constrained to a VMware Cloud Foundation (VCF) consolidated architecture of seven ESXi hosts in a single cluster. An application that consists of two virtual machines hosted on this infrastructure requires minimal disruption to storage I/O during business hours.

Which two options would be most effective in mitigating this risk without reducing availability? (Choose two.)

- A. Enable fully automatic Distributed Resource Scheduling (DRS) policies on the cluster
- **B. Perform all host maintenance operations outside of business hours**
- C. Apply 100% CPU and memory reservations on these virtual machines
- D. Replace the vSAN shared storage exclusively with an All-Flash Fibre Channel shared storage solution
- **E. Implement FTT=1 Mirror for this application virtual machine**

Antwort: B,E

38. Frage

Which two strategies are critical for securing workloads in a VMware Cloud Foundation environment?

(Choose two)

Response:

- **A. Enabling vSphere HA for automatic recovery of virtual machines**
- B. Using a separate storage network to isolate data access from compute
- C. Deploying VMware NSX to configure micro-segmentation for enhanced security
- **D. Encrypting all virtual machines with VMware vSphere encryption**

Antwort: A,D

39. Frage

.....

Wofür sorgen Sie? Sorgen Sie sich um VMware 2V0-13.24 Zertifizierungsprüfung? Tatsächlich ist VMware 2V0-13.24 Zertifizierungsprüfung eine schwierige Prüfung. Aber es ist unnötig, dass Sie dafür zu viel sorgen. Mit geeigneten Methoden können Sie die 2V0-13.24 Prüfungen leichter bestehen. Wissen Sie, was die geeignete Methode ist? Es ist eine sehr gute Methode, die VMware 2V0-13.24 Prüfungsmaterialien zu benutzen. ITZert hilft vielen Kandidaten seit langen Zeit und ist von ihnen gut bewertet. Diese Prüfungsfragen und -antworten können Sie gewährleisten, diese Prüfung einmalig zu bestehen. Deswegen benutzen Sie unbesorgt diese VMware 2V0-13.24 Dumps.
