

2V0-13.25 Exam Consultant, 2V0-13.25 Exam Exercise

Download Broadcom 2V0-13.24 Exam Dumps for Best Preparation

Exam : **2V0-13.24**

Title : VMware Cloud Foundation
5.2 Architect

<https://www.passcert.com/2V0-13.24.html>

1 / 5

When you are hesitating whether to purchase our 2V0-13.25 exam software, why not try our free demo of 2V0-13.25. Once you have tried our free demo, you will ensure that our product can guarantee that you successfully Pass 2V0-13.25 Exam. Our professional IT team of Itexamguide continues updating and improving 2V0-13.25 exam dumps in order to guarantee you win the exam while you are preparing for the exam.

2V0-13.25 study material is suitable for all people. Whether you are a student or an office worker, whether you are a veteran or a rookie who has just entered the industry, 2V0-13.25 test answers will be your best choice. For office workers, 2V0-13.25 test dumps provide you with more flexible study time. You can download learning materials to your mobile phone and study at anytime, anywhere. And as an industry rookie, those unreadable words and expressions in professional books often make you feel mad, but 2V0-13.25 Study Materials will help you to solve this problem perfectly. All the language used in 2V0-13.25 study materials is very simple and easy to understand. With 2V0-13.25 test answers, you don't have to worry about that you don't understand the content of professional books. You also don't need to spend expensive tuition to go to tutoring class. 2V0-13.25 test dumps can help you solve all the problems in your study.

Useful 2V0-13.25 Exam Consultant & Leading Offer in Qualification Exams & Realistic VMware VMware Cloud Foundation 9.0 Architect

Our web backend is strong for our 2V0-13.25 study braindumps. No matter how many people are browsing our websites at the same time, you still can quickly choose your favorite 2V0-13.25 exam questions and quickly pay for it. There has no delay reaction of our website. So you can begin your pleasant selecting journey on our websites. And you will find our 2V0-13.25 practice materials are easy to download.

VMware 2V0-13.25 Exam Syllabus Topics:

Topic	Details
Topic 1	Plan and Design the VMware Solution: This section measures the skills of Cloud Infrastructure Designers. It focuses on gathering and analyzing business requirements and then transforming them into conceptual, logical, and physical models of VMware Cloud Foundation. Candidates are expected to identify prerequisites and make design decisions across fleet topologies, networking, management domains, workload domains, automation, and operations. The section also includes designing for availability within and across zones, creating strategies for manageability such as lifecycle, scalability, and capacity, and ensuring performance and recoverability through BCDR strategies. Additional emphasis is given to designing secure environments, workload migration strategies, and creating consumption, automation, and monitoring strategies to support modern applications and governance.
Topic 2	Troubleshoot and Optimize the VMware Solution: This section of the exam measures the skills of Operations Engineers. There are no explicitly testable objectives provided in this domain, but candidates are expected to understand troubleshooting and optimization principles to maintain the VMware environment effectively in real-world deployments.
Topic 3	VMware Products and Solutions: This section of the exam evaluates the knowledge of VMware Solution Specialists and focuses on VMware Cloud Foundation (VCF). Candidates must be able to identify and differentiate between various VCF architecture options in given scenarios. The emphasis is on understanding the key products and how they integrate into enterprise design choices.
Topic 4	IT Architectures, Technologies, Standards: This section of the exam measures the skills of IT Architects and covers the ability to distinguish business requirements from technical ones. It expects candidates to understand the differences between conceptual, logical, and physical designs while also differentiating requirements, assumptions, constraints, and risks. Core concepts of availability, manageability, performance, recoverability, and security (AMPRS) are tested. Learners also need to document risk mitigation strategies, design decisions, and create a validation strategy that ties requirements to practical implementation.
Topic 5	Install, Configure, Administrate the VMware Solution: This section of the exam is relevant to System Administrators. Although it has no directly testable objectives, it underlines the expectation that candidates are familiar with installation, configuration, and administration tasks that form the foundation for VMware Cloud Foundation solutions.

VMware Cloud Foundation 9.0 Architect Sample Questions (Q104-Q109):

NEW QUESTION # 104

What are the best practices for troubleshooting VMware storage performance with Broadcom hardware?

- A. Reset RAID controller configuration
- B. Ensure RAID controller firmware is up to date
- C. Monitor storage I/O metrics
- D. Check disk health and RAID status

Answer: B,C,D

Explanation:

Disk health, I/O metrics, and firmware updates are essential to resolving storage performance issues.

NEW QUESTION # 105

An architect is designing a VMware Cloud Foundation (VCF) deployment to meet the following design requirements:

- * Tenants need dedicated external network access.
- * The number of NSX Edge clusters should be minimized.

To fulfill these requirements, the architect made a design decision to use a Workload Networking VPC with Full Services Model. Which additional design decision should be considered as part of the logical network design?

- A. Use Virtual Routing and Forwarding (VRF) lite to create a separate VRF TO Gateway for each tenant.
- B. Use NSX Federation providing a dedicated NSX instance for each tenant.
- C. Install two NSX bare metal Edges with multiple physical interfaces to separate tenants.
- D. Deploy the maximum number of 10 NSX Edges into a single Edge cluster.

Answer: A

Explanation:

The NSX VPC Full Services Model allows tenant isolation using VRF-lite, enabling independent routing tables within the same Tier-0 gateway.

This ensures dedicated external access without requiring a separate NSX Edge cluster per tenant, thereby minimizing the number of Edge clusters.

VMware VCF 9.0 recommends VRF Lite for multi-tenant environments with centralized Edge clusters and segmented routing needs.

NEW QUESTION # 106

During a design workshop, the security team provides the following requirement for the VMware Cloud Foundation (VCF) Automation deployment:

* All Virtual Machine images must be reviewed and vetted by the security team prior to consumption.

Which Content Library type supports the requirement?

- A. Local Content Library
- B. Subscribed Content Library
- C. Provider-managed Content Library
- D. Tenant-managed Content Library

Answer: C

Explanation:

A Provider-managed Content Library is curated and controlled centrally by the VCF administrator or provider. It enables vetting and version control over VM templates and OVF's, ensuring compliance with organizational policies, including security reviews. This directly supports the requirement that all images must be reviewed and approved before being used in deployments.

NEW QUESTION # 107

Requirement: The solution must include high security hardening levels to meet military compliance standards.

Which two physical design decisions will meet this security requirement in the workload domain? (Choose two.)

- A. VCF Operations will be configured to renew the SSL certificate for vCenter Server per security policies.
- B. The advanced setting `UserVars.SuppressShellWarning` will be configured to 0 across all ESXi hosts.
- C. The certificate of the VI workload domain vCenter Server will be issued by `RootCA.Military.Domain.Com`.
- D. The vSAN storage policy will be configured as Secondary Failures to Tolerate = 1.
- E. NTP will be configured to the internal NTP servers of 192.168.12.1 and 192.168.24.1.

Answer: B,C

Explanation:

* D: Setting `UserVars.SuppressShellWarning` = 0 ensures warnings are shown when shell access is used, improving auditability and compliance.

* E: Using certificates signed by a trusted military Root CA aligns with security compliance standards for certificate trust and chain of custody.

Options A and C are operational best practices, but not military hardening. B is about operations automation, not compliance-level hardening.

Reference: VMware Cloud Foundation 9.0 Security Hardening Guide.

NEW QUESTION # 108

When designing a VMware environment with Broadcom hardware, which storage solutions are critical for ensuring performance and

reliability?

- A. Fibre Channel HBA
- B. vSAN
- C. Broadcom NVMe SSD
- D. Broadcom RAID Controller

Answer: B,C,D

Explanation:

Broadcom NVMe SSDs, RAID Controllers, and vSAN are critical for performance and reliability in VMware storage environments.

NEW QUESTION # 109

.....

Are you tired of feeling overwhelmed and unsure about how to prepare for your VMware Cloud Foundation 9.0 Architect (2V0-13.25) exam? Are you ready to take control of your future and achieve the scores you want to get in the VMware Cloud Foundation 9.0 Architect (2V0-13.25) certification exam? If so, it's time to buy real VMware 2V0-13.25 Dumps of Itexamguide our team of experts has designed the product that has already helped thousands of students just like you pass the exam.
