Free PDF Marvelous 2V0-17.25 - VMware Cloud Foundation 9.0 Administrator Training Solutions

When preparing to take the VMware 2V0-17.25 exam dumps, knowing where to start can be a little frustrating, but with ValidBrindumps VMware 2V0-17.25 practice questions, you will feel fully prepared. Using our VMware 2V0-17.25 practice test software, you can prepare for the increased difficulty on VMware 2V0-17.25 Exam day. Plus, we have various question types and difficulty levels so that you can tailor your VMware Cloud Foundation 9.0 Administrator exam dumps preparation to your requirements.

VMware Cloud Foundation 9.0 Administrator Sample Questions (Q57-Q62):

NEW QUESTION # 57

An administrator is tasked to deploy a new vSAN Storage Cluster to an existing VCF instance.

The VCF instance is deployed as a single workload domain. What must the administrator do to achieve this without deploying additional management components?

- A. Deploy an additional VCF instance and workload domain with a vSAN storage cluster.
- B. Deploy additional hosts as vSAN storage-only nodes within the existing cluster.
- C. Deploy a second cluster as a vSAN storage cluster in the existing workload domain.
- D. Deploy an additional workload domain with a vSAN storage cluster within the existing VCF instance.

Answer: C

Explanation:

The VCF 9.0 Architecture and Deployment Guide explains that within a single Workload Domain, administrators can scale resources by adding additional clusters, including compute or vSAN storage clusters. Specifically, "A Workload Domain can contain

multiple clusters. You can deploy a new cluster, such as a vSAN cluster, into an existing domain without introducing new management components."

NEW QUESTION # 58

What is a symptom of an issue with vSphere HA?

- A. VMs are not restarted after a host failure.
- B. Snapshots cannot be created or consolidated.
- C. Hosts frequently disconnect from vCenter Server.
- D. VMs are not being migrated using vMotion.

Answer: A

NEW QUESTION # 59

After deploying the VMware Cloud Foundation management domain, an administrator needs to configure backup for the components within the domain.

Which two steps are involved in configuring the backup of VMware Cloud Foundation management components? (Choose two.)

- A. Install a third-party backup solution on each ESXi host.
- B. Create a backup schedule on the SDDC manager to automate taking regular backups.
- C. Enable the vCenter Server snapshot manager on the SDDC Manager.
- D. Configure an external SFTP backup repository on the SDDC Manager.
- E. Manually export the NSX configuration to the SDDC Manager.

Answer: B,D

Explanation:

To configure backups for the VMware Cloud Foundation management components, you must set up an external SFTP backup repository within the SDDC Manager. This repository will store the backup files for management components like vCenter, NSX Manager, and SDDC Manager itself.

Creating a backup schedule within the SDDC Manager ensures that regular, automated backups are taken, helping to maintain data integrity and recovery options for the management domain.

NEW QUESTION # 60

An ESXi host experiences repeated PSOD (Purple Screen of Death) events.

Which tool or method is most useful for diagnosing kernel-level issues?

- A. vm-support command to collect a support bundle
- B. ESXi Shell access for log reviews
- C. vCenter Server Alarms
- D. vCenter Event Console

Answer: A

Explanation:

Using vm-support collects logs and diagnostic files needed for kernel-level debugging. Shell access can view logs, but the support bundle is more comprehensive. Alarms and the Event Console track events, not deep kernel crashes.

NEW QUESTION # 61

Which distributed switch feature can detect configurations that might cause a network mismatch, such as VLAN tagging errors or MTU inconsistencies?

- A. Network I/O Control (NIOC)
- B. Link Aggregation Control Protocol (LACP)
- C. Health Check
- D. Port Security

Answer: C

Explanation:

The Distributed Switch Health Check can identify VLAN, MTU, and teaming inconsistencies. NIOC manages traffic bandwidth, port security is a concept in physical networking, and LACP forms link- aggregated groups but doesn't check for VLAN or MTU mismatches.

NEW QUESTION # 62

.....

The system of our 2V0-17.25 study materials is great. It is developed and maintained by our company's professional personnel and is dedicated to provide the first-tier service to the clients. Our system updates the 2V0-17.25 study materials periodically and frequently to provide more learning resources and responds to the clients' concerns promptly. Our system will supplement New 2V0-17.25 Study Materials and functions according to the clients' requirements and surveys the clients' satisfaction degrees about our 2V0-17.25 study materials.
