

2V0-32.24 Exam Materials - 2V0-32.24 Training Questions

P.S. Free 2025 VMware 2V0-32.24 dumps are available on Google Drive shared by Itcertkey: https://drive.google.com/open?id=1_ab05yQ_d1_1vKxeQpqt9SVmYoB5gCo

Our 2V0-32.24 latest exam torrents are your best choice. I promise you that you can learn from the 2V0-32.24 exam questions not only the knowledge of the certificate exam, but also the ways to answer questions quickly and accurately. Our 2V0-32.24 exam questions just need students to spend 20 to 30 hours practicing on the platform which provides simulation problems, can let them have the confidence to pass the 2V0-32.24 Exam, so little time great convenience for some workers, how efficiency it is.

For candidates who are going to buy 2V0-32.24 exam dumps online, the safety for the website is quite important. If you choose us, we will provide you with a clean and safe online shopping environment. We have professional technicians to check the website at times, therefore the website safety can be guaranteed. In addition, 2V0-32.24 Exam Materials of us contain both questions and answers, and you can have a quickly check after practicing. We have online and offline chat service for 2V0-32.24 training materials. If you have any questions, you can contact with us, and we will give you reply as soon as possible.

Hot 2V0-32.24 Exam Materials 100% Pass | Reliable 2V0-32.24 Training Questions: VMware Cloud Operations 8.x Professional V2

The VMware Cloud Operations 8.x Professional V2 (2V0-32.24) practice tests have customizable time and VMware Cloud Operations 8.x Professional V2 (2V0-32.24) exam questions feature so that the students can set the time and VMware Cloud Operations 8.x Professional V2 (2V0-32.24) exam questions according to their needs. The VMware Cloud Operations 8.x Professional V2 (2V0-32.24) practice test questions are getting updated on the daily basis and there are also up to 1 year of free updates. Earning the VMware Cloud Operations 8.x Professional V2 (2V0-32.24) certification exam is the way to grow in the modern era with high-paying jobs.

VMware 2V0-32.24 Exam Syllabus Topics:

Topic	Details
Topic 1	Planning and Designing: This section of the exam measures the skills of Cloud Architects and covers the architectural models and sizing requirements for vRealize Operations and vRealize Log Insight. It evaluates the ability to choose between standalone, clustered, and high-availability setups, and to plan appropriately based on scenario-based requirements for capacity and deployment type, ensuring well-designed cloud solutions.
Topic 2	Installing, Configuring, and Setting Up: This section of the exam measures skills of Implementation Specialists and covers the end-to-end setup process for vRealize Suite Lifecycle Manager, vRealize Operations, and Log Insight. It includes prerequisites, installation steps (manual and automated), identity and access configuration, environment settings, data sources, content packs, and system integrations to enable a functional cloud management platform.
Topic 3	Architecture and Technologies: This section of the exam measures the skills of Cloud Architects and covers the core differences between VMware Cloud Management offerings, focusing on SaaS versus on-premises deployments. It introduces the capabilities of vRealize Suite Lifecycle Manager, vRealize Operations, and vRealize Log Insight, helping professionals understand the foundational technologies that support VMware's cloud ecosystem.

VMware Cloud Operations 8.x Professional V2 Sample Questions (Q17-Q22):

NEW QUESTION # 17

An administrator has been asked to provide their internal support team Network Operations Center (NOC) live information of their existing vSphere infrastructure for only one (1) day, which will expire automatically.

The support team does not have access to vRealize Operations.

Using vRealize Operations features and capabilities, which approach is best suited for this task?

- A. Configure vRealize Operations Access Control to allow support team members access to vROps and then restrict access to the appropriate areas in vRealize Operations.
- B. Download a custom NOC Dashboard from the VMware vRealize Sample Exchange.
- C. Scheduled Reports which include Views and Dashboard information.
- D. Share predefined or custom dashboards using URL or Email.

Answer: D

Explanation:

The best approach for providing live information to the Network Operations Center (NOC) for one day, without giving them access to vRealize Operations, is to share predefined or custom dashboards using a URL or email. This allows you to share the necessary information with the support team for a specified period (in this case, one day). Dashboards can be created and shared through a URL or by email, and access to the information can expire once the sharing link is no longer accessible.

NEW QUESTION # 18

An administrator has configured vRealize Lifecycle Manager to manage content between two vRealize Operations instances. The administrator is encountering an issue when releasing content to the second vRealize Operations instance.

What are the two possible causes of the issue? (Choose two.)

- A. Only the policy "Allow content to be captured from this endpoint" has been configured for both vRealize Operations endpoints.

- B. Content release from different versions of vRealize Operations Manager may fail.
- C. A vRealize Operations endpoint can only be configured with FQDN.
- D. Configuring a vRealize Operations endpoint with an SSH user other than root is not supported.
- E. The policy "Enable code review" must be added to the second vRealize Operations endpoint.

Answer: B,D

Explanation:

Configuring a vRealize Operations endpoint with an SSH user other than root is not supported: vRealize Lifecycle Manager (vRSLCM) requires the use of the root user for SSH access to vRealize Operations endpoints. Using any other user for SSH access is not supported and may lead to issues when attempting to release content.

Content release from different versions of vRealize Operations Manager may fail: If the two vRealize Operations instances are running different versions, content release might fail due to version incompatibility.

It's recommended to ensure both instances are running compatible versions of vRealize Operations to ensure seamless content management and release.

NEW QUESTION # 19

An administrator looking to add a new FQDN of vRealize Suite Lifecycle Manager in the VMware Identity Manager catalogue. Which action does the administrator need to take?

- A. Sync FQDN and re-register with VMware Identity Manager
- B. Delete vRealize Suite Lifecycle Manager and redeploy it
- C. Recreate authentication provider and sync VMware Identity Manager
- D. Update authentication provider and re-sync FQDN

Answer: D

Explanation:

To add a new Fully Qualified Domain Name (FQDN) of vRealize Suite Lifecycle Manager (vRSLCM) in the VMware Identity Manager catalog, the administrator needs to update the authentication provider in VMware Identity Manager and then re-sync the FQDN. This ensures the new FQDN is properly reflected in the VMware Identity Manager for seamless integration.

NEW QUESTION # 20

What is a use case for vRealize Operations in a hybrid cloud infrastructure?

- A. Infrastructure as a service automation and governance
- B. Unified visibility across on-premises environments and public clouds
- C. Central log collector for public clouds
- D. Holistic network visibility across overlay and physical networks with detailed information about Cisco switches and NSX-T

Answer: B

Explanation:

vRealize Operations provides unified visibility across both on-premises environments and public clouds, making it ideal for managing hybrid cloud infrastructures. It helps administrators gain insights into performance, capacity, and efficiency across multiple environments, allowing for better management and optimization of resources in hybrid cloud deployments. This unified visibility simplifies monitoring and ensures consistent performance across both on-premises and cloud environments.

NEW QUESTION # 21

An administrator is configuring the log masking feature within vRealize Log Insight. Select the correct statement.

- A. A logmask configuration can be applied to logs in which the FieldName field and the filter criteria have Dynamic fields.
- B. A log mask configuration does not take precedence to a configured and enabled archival rule.
- C. A log mask configuration is applied only to the logs that are ingested after creating and enabling the configuration.
- D. A log mask configuration is applied to the all stored logs that after creating and enabling the configuration.

Answer: C

Explanation:

Log masking in vRealize Log Insight is applied to logs after the configuration has been created and enabled. It will only affect logs that are ingested after the log masking is activated, meaning that historical logs already ingested before the mask configuration will not be affected.

NEW QUESTION # 22
