BraindumpQuiz 2V0-32.24 exam braindumps are authorized legal products which is famous for its high passing rate. Our dumps can cover nearly 95% questions of the real test, our answers and explanations are edited by many experienced experts and the correct rate is 100%. Our VMware 2V0-32.24 Exam Braindumps provide three versions to satisfy different kinds of customers' habits: PDF version, Soft test engine and APP test engine.

VMware 2V0-32.24 Exam Syllabus Topics:

Topic	Details
Topic 1	Architecture and Technologies: This section of the exam measures the skills of Cloud Architects and covers the core differences between VMware Cloud Management offerings, focusing on SaaS versus on-premises deployments. It introduces the capabilities of vRealize Suite Lifecycle Manager, vRealize Operations, and vRealize Log Insight, helping professionals understand the foundational technologies that support VMware's cloud ecosystem.
Topic 2	Troubleshooting and Repairing: This section of the exam measures skills of Support Engineers and covers the diagnosis and resolution of common performance and configuration issues in vRealize Operations, Log Insight, and Lifecycle Manager. It also includes cluster management options, log bundle generation, password handling, and changing authentication settings, equipping professionals to ensure system reliability.
Topic 3	Performance-tuning, Optimization, and Upgrades: This section has no testable objectives and therefore is not directly assessed in the exam.
Topic 4	VMware Products and Solutions: This section of the exam measures the skills of Cloud Engineers and covers the components, integrations, and use cases for various VMware Cloud Management solutions. It includes tools like vRealize True Visibility Suite, Skyline, Federated Analytics, vRealize AI Cloud, and Log Insight Cloud. Candidates also explore deployment tools such as Remote Collectors and Cloud Proxies to understand their role in scalable cloud operations.
Topic 5	Administrative and Operational Tasks: This section of the exam measures skills of Cloud Administrators and covers daily operational tasks such as content and environment management in vRealize Suite Lifecycle Manager. It also includes managing licensing, alert systems, dashboards, metrics, cost assessments, capacity optimization, workload planning, and system monitoring. Additionally, it explores access control, patching, and retention settings in vRealize Log Insight, ensuring ongoing operational excellence across VMware tools.

New 2V0-32.24 Exam Vce & Latest 2V0-32.24 Exam Practice

Today is the right time to learn new and in demands skills. You can do this easily, just get registered in VMware Cloud Operations 8.x Professional V2 2V0-32.24 certification exam and start preparation with VMware 2V0-32.24 exam dumps. The VMware Cloud Operations 8.x Professional V2 2V0-32.24 pdf questions and practice test are ready for download. Just pay the affordable VMware 2V0-32.24 authentic dumps charges and click on the download button. Get the Channel Partner Program VMware Cloud Operations 8.x Professional V2 2V0-32.24 latest dumps and start preparing today.

VMware Cloud Operations 8.x Professional V2 Sample Questions (Q44-Q49):

NEW QUESTION # 44

Which three factors determine the size of vRealize Log Insight (vRLI) deployment? (Choose three.)

- A. Log message format
- B. Syslog connections
- C. Log ingestion per day
- D. Number of endpoints
- E. Type of vRLI Agents
- F. Events per second

Answer: C,D,F

Explanation:

The size of a vRealize Log Insight (vRLI) deployment is determined by the following factors:

Number of endpoints: The more endpoints (e.g., ESXi hosts, virtual machines, network devices) that generate logs, the larger the vRLI deployment needs to be to handle the log data.

Log ingestion per day: The volume of log data ingested on a daily basis affects the size of the deployment, as more storage and processing power are required to handle higher data volumes.

vmware®

Events per second: The rate at which events are generated (events per second) directly impacts the capacity required for log processing and storage in vRLI.

NEW QUESTION # 45

An administrator has been tasked to configure vRealize Operations to securely forward vRealize Operations logs to a centralized syslog server. The logs should be forwarded in their original format. What would be the resulting Protocol and Port configuration?

- A. Port: 514 - Protocol: syslog
- B. Port: 9000 - Protocol: cfapi

- C. Port: 6514 - Protocol: syslog
- D. Port: 9543 - Protocol: cfapi

Answer: C

Explanation:

To securely forward vRealize Operations logs to a centralized syslog server, the syslog protocol over port 6514 is used. Port 6514 is the default port for secure syslog (Syslog over TLS), ensuring that logs are transmitted in their original format while being encrypted for security.

NEW QUESTION # 46

When setting up the vRealize Log Insight integration within vRealize Operations what do administrators configure within vRealize Operations?

- A. The vRealize Log Insight management pack
- B. The vRealize Log Insight troubleshooting dashboard
- C. The vRealize Log Insight content pack
- D. The vRealize Log Insight collector group instance

Answer: A

Explanation:

When setting up vRealize Log Insight integration within vRealize Operations, administrators configure the vRealize Log Insight management pack in vRealize Operations. This management pack allows vRealize Operations to integrate with vRealize Log Insight, enabling the collection and analysis of log data from vRealize Log Insight within the vRealize Operations platform. It provides enhanced visibility and monitoring for logs, allowing users to correlate performance data with log data.

NEW QUESTION # 47

When creating a vRealize Operations content endpoint in vRealize Suite Lifecycle Manager what should an administrator configure on the vRealize Operations appliance?

- A. A local user account with the relevant permissions to allow ssh access
- B. A new file system partition that is shared for storing content exports
- C. A content management agent for capturing the supported types of content
- D. A configuration file with the vRealize Suite Lifecycle Manager server details

Answer: D

Explanation:

When creating a vRealize Operations content endpoint in vRealize Suite Lifecycle Manager (vRSLCM), an administrator must configure a configuration file that includes the vRealize Suite Lifecycle Manager server details. This allows vRealize Operations to communicate with vRSLCM and facilitates the management of content within vRealize Operations using the Lifecycle Manager.

NEW QUESTION # 48

Which three types of Virtual Machine (VM) action can be scheduled in a vRealize Operations Automation Central job? (Choose three.)

- A. Downsize oversized VMs
- B. Move VMs
- C. Power On VMs
- D. Reboot VMs
- E. Delete powered off VMs
- F. Delete unused snapshots for VMs

Answer: A,C,D

Explanation:

Power On VMs: You can schedule the action to power on specific VMs at a specified time.

Downsize oversized VMs: This action allows you to resize VMs based on performance data, ensuring resources are allocated optimally.
