- ✓ Within 10 days of first use

With applying the international recognition third party for the payment, if you buying 2V0-41.24 exam braindumps from us, and we can ensure the safety of your money and account. There is no necessary for you to worry about the security of your money if you choose us. In addition, 2V0-41.24 test materials are high-quality, since we have a professional team to edit and verify them, therefore they can help you pass the exam just one time. And you can try free demo before purchasing 2V0-41.24 Exam Dumps, so that you can have a deeper understanding of what you are going to buy.

Never was it so easier to get through an exam like 2V0-41.24 exam as it has become now with the help of our high quality 2V0-41.24 exam questions by our company. You can get the certification just as easy as pie. As a company which has been in this field for over ten year, we have become a famous brand. And our 2V0-41.24 Study Materials can stand the test of the market and the candidates all over the world. Besides, the prices for our 2V0-41.24 learning guide are quite favourable.

>> 2V0-41.24 Examcollection Questions Answers <<

New Braindumps 2V0-41.24 Book, 2V0-41.24 Well Prep

The software of 2V0-41.24 guide torrent boosts varied self-learning and self-assessment functions to check the results of the learning. The software can help the learners find the weak links and deal with them. Our 2V0-41.24 exam questions boost timing function and the function to stimulate the exam. Our product sets the timer to stimulate the exam to adjust the speed and keep alert. Our 2V0-41.24 test torrents have simplified the complicated notions and add the instances, the stimulation and the diagrams to explain any hard-to-explain contents. So it is worthy for you to buy our 2V0-41.24 exam questions.

VMware NSX 4.X Professional V2 Sample Questions (Q45-Q50):

NEW QUESTION # 45

Which two of the following parameters are required for deploying the NSX Application Platform? (Choose two.)

- A. Interface Service Name
- **B. Upload XML File**
- C. Cluster Format Type
- **D. Upload Kubernetes Configuration File**
- E. Interface Name

Answer: B,D

Explanation:

Cluster Format Type: This parameter specifies the type of cluster format that will be used for the NSX Application Platform deployment.

Upload Kubernetes Configuration File: NSX Application Platform requires a Kubernetes environment, and the configuration file for Kubernetes must be uploaded to facilitate the deployment.

NEW QUESTION # 46

An NSX administrator is creating a NAT rule on a Tier-0 Gateway configured in active-standby high availability mode.

Which two NAT rule types are supported for this configuration? (Choose two.)

- A. Source NAT
- B. Reflexive NAT
- **C. Destination NAT**
- D. 1:1 NAT
- E. Port NAT

Answer: C

Explanation:

In an NSX environment with a Tier-0 Gateway configured in active-standby high availability mode, Destination NAT (DNAT) and Source NAT (SNAT) are supported NAT rule types. These allow for traffic redirection by modifying the destination or source IP addresses as needed, which is commonly used in configurations involving external access and internal IP address translation.

NEW QUESTION # 47

Which CLI command does an NSX administrator run on the NSX Manager to generate support bundle logs if the NSX UI is inaccessible?

- **A. get support-bundle file vcpnv.tgz**
- B. esxcli system syslog config logger set - -id=nsxmanager
- C. set support-bundle file vcpnv.tgz
- D. vm-support

Answer: A

Explanation:

To generate the support bundle logs on the NSX Manager via API, the NSX administrator needs to use the POST method with the URL `https://nsxmgr_ip/api/1.0/appliance-management/techsupportlogs/NSX`, where `nsxmgr_ip` is the IP address of the NSX Manager1. This will create a tech support bundle file with a name like `vcpnv.tgz`. To download the generated tech support bundle file via CLI, the NSX administrator needs to use the `get support-bundle file vcpnv.tgz` command on the NSX Manager1. The other commands are incorrect because they either do not generate or download the support bundle logs, or they are not related to the NSX Manager.

NEW QUESTION # 48

Which CLI command would an administrator use to allow syslog on an ESXi transport node when using the `esxcli` utility?

- A. esxcli network firewall ruleset set -r syslog -e false
- B. esxcli network firewall ruleset set -a -e false
- C. esxcli network firewall ruleset -e syslog
- **D. esxcli network firewall ruleset set -r syslog -e true**

Answer: D

Explanation:

The esxcli network firewall ruleset set -r syslog -e true command is used to enable the firewall ruleset for syslog on an ESXi host. Setting the -e flag to true allows syslog traffic through the ESXi firewall, enabling remote logging for syslog messages from the transport node.

NEW QUESTION # 49

Which CLI command is used for packet capture on the ESXi Node?

- A. set capture
- B. debug
- **C. pktcap-uw**
- D. tcpdump

Answer: C

Explanation:

According to the VMware Knowledge Base, this CLI command is used for packet capture on the ESXi node. pktcap-uw stands for Packet Capture User World and is a tool that allows you to capture packets from various points in the network stack of an ESXi host. You can use this tool to troubleshoot network issues or analyze traffic flows.

The other options are either incorrect or not available for this task. tcpdump is not a valid CLI command for packet capture on the ESXi node, as it is a tool that runs on Linux systems, not on ESXi hosts. debug is not a valid CLI command for packet capture on the ESXi node, as it is a generic term that describes the process of finding and fixing errors, not a specific tool or command. set capture is not a valid CLI command for packet capture on the ESXi node, as it does not exist in the ESXi CLI.
