300-420 Actual Exams, Pass4sure 300-420 Dumps Pdf

The Designing Cisco Enterprise Networks (300-420) prep material is available in three versions. 300-420 Practice exams and PDF questions are available at PassSureExam so that users can meet their training needs and pass the Designing Cisco Enterprise Networks (300-420) exam on the first try. The philosophy of PassSureExam behind offering Designing Cisco Enterprise Networks (300-420) prep material in three formats is helping students meet their unique learning needs.

Cisco 300-420 exam is a 90-minute test that consists of 60-70 multiple-choice questions. To pass the exam, candidates must demonstrate their proficiency in designing and implementing complex enterprise-level networks. 300-420 exam is available in English and Japanese and can be taken at any Pearson VUE testing center around the world. Successful completion of 300-420 exam demonstrates that an IT professional has the skills and knowledge necessary to design and implement complex enterprise networks that meet the needs of modern businesses.

Cisco 300-420 Exam is part of the Cisco Certified Network Professional (CCNP) Enterprise certification track, which is one of the most popular and sought-after certifications in the networking industry. The CCNP Enterprise certification is designed for network professionals who want to advance their career in enterprise networking and demonstrate their expertise in designing, implementing, and troubleshooting complex network solutions.

300-420 Prep Torrent - Designing Cisco Enterprise Networks Exam Torrent & 300-420 Test Braindumps

Now you do not need to worry about the relevancy and top standard of PassSureExam Designing Cisco Enterprise Networks (300-420) exam questions. These Cisco 300-420 dumps are designed and verified by qualified 300-420 exam trainers. Now you can trust PassSureExam Cisco 300-420 Practice Questions and start preparation without wasting further time. With the 300-420 exam questions you will get everything that you need to learn, prepare and pass the challenging 300-420 exam with good scores.

Cisco Designing Cisco Enterprise Networks Sample Questions (Q340-Q345):

NEW QUESTION # 340

An engineer must design a VPN solution for a company that has multiple branches connecting to a main office. What are two advantages of using DMVPN instead of IPsec tunnels to accomplish this task? (Choose two.)

- A. lower traffic overhead
- B. support for anycast gateway
- C. support for AES 256-bit encryption
- D. dynamic spoke-to-spoke tunnels
- E. greater scalability

Answer: D,E

Explanation:
Greater scalability: DMVPN is a more scalable solution than IPsec tunnels. This is because DMVPN uses a hub-and-spoke topology, which allows for the easy addition or removal of spokes without having to reconfigure the entire network. IPsec tunnels, on the other hand, are point-to- point connections, which can be more difficult to scale.
Dynamic spoke-to-spoke tunnels: DMVPN supports dynamic spoke-to-spoke tunnels. This means that tunnels are only created between spokes when they need to communicate with each other.
This can help to reduce traffic overhead and improve performance. IPsec tunnels, on the other hand, are static tunnels, which means that they are always up, even when they are not needed.

NEW QUESTION # 341
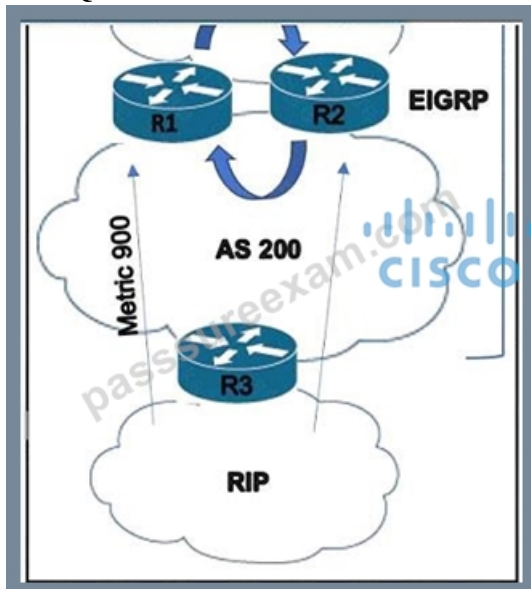

Refer to the exhibit. An architect must design a solution to connect the network behind R3 with the EIGRP network. Which mechanism should be included to avoid routing loops?

- A. split-horizon
- B. down bit
- C. route tags
- D. summarization

Answer: C

NEW QUESTION # 342

How is sub-second failure of a transport link detected in a Cisco SD-WAN network?

- A. BFD runs on the IPsec tunnels between WAN Edge routers.
- B. BGP is used between WAN Edge routers and the vSmart controller.
- C. Link state change messages are sent between vSmart controllers.
- D. Hellos are sent between the WAN Edge routers and the vSmart controller.

Answer: A

NEW QUESTION # 343

Drag and drop the properties from the left onto the Cisco SD-WAN components that perform them on the right.

Answer Area

Properties	Components
provides orchestration for the management plane	**vSmart**
supports zero-touch provisioning	
handles fabric discovery	**vBond**
manages the control plane	**WAN Edge**

Answer:

Explanation:

Answer Area

Properties	Components
provides orchestration for the management plane	**vSmart**: handles fabric discovery
supports zero-touch provisioning	manages the control plane
handles fabric discovery	**vBond**: provides orchestration for the management plane
manages the control plane	**WAN Edge**: supports zero-touch provisioning

NEW QUESTION # 344

Drag and drop the descriptions from the left onto the Cisco SD-WAN component they describe on the right.

distributes routes and policy information via OMP	Cisco WAN Edge router
enables the communication of devices that sit behind NAT	Cisco vSmart Controller
enables centralized provisioning and simplifies network changes	Cisco vManage
is responsible for traffic forwarding, security, encryption	Cisco vBond Orchestrator

Answer:

Explanation:

distributes routes and policy information via OMP	is responsible for traffic forwarding, security, encryption
enables the communication of devices that sit behind NAT	distributes routes and policy information via OMP
enables centralized provisioning and simplifies network changes	enables centralized provisioning and simplifies network changes
is responsible for traffic forwarding, security, encryption	enables the communication of devices that sit behind NAT

NEW QUESTION # 345

......

Each product has a trial version and our products are without exception, literally means that our 300-420 guide torrent can provide you with a free demo when you browse our website of 300-420 prep guide, and we believe it is a good way for our customers to have a better understanding about our products in advance. Moreover if you have a taste ahead of schedule, you can consider whether our 300-420 Exam Torrent is suitable to you or not, thus making the best choice.
