No matter you are exam candidates of high caliber or newbies, our 300-540 exam quiz will be your propulsion to gain the best results with least time and reasonable money. Not only because the outstanding content of 300-540 real dumps that produced by our professional expert but also for the reason that we have excellent vocational moral to improve our 300-540 Learning Materials quality. We would like to create a better future with you hand in hand, and heart with heart.

The 300-540 study guide provided by the DumpsTests is available, affordable, updated and of best quality to help you overcome difficulties in the actual test. We continue to update our dumps in accord with 300-540 real exam by checking the updated information every day. The contents of 300-540 Free Download Pdf will cover the 99% important points in your actual test. In case you fail on the first try of your exam with our 300-540 free practice torrent, we will give you a full refund on your purchase.

First-Grade Cisco 300-540: Designing and Implementing Cisco Service Provider Cloud Network Infrastructure Sample Questions - Pass-Sure DumpsTests New 300-540 Exam Topics

Have you signed up for Cisco 300-540 Exam? Will masses of reviewing materials and questions give you a headache? DumpsTests

Cisco Designing and Implementing Cisco Service Provider Cloud Network Infrastructure Sample Questions (Q137-Q142):

NEW QUESTION # 137
Which of the following is NOT a purpose of implementing ACLs in network security?

- A. To provide a layer of security
- B. To define routing protocols
- C. To restrict access to network resources
- D. To filter network traffic

Answer: B

NEW QUESTION # 138
SR-IOV technology improves network performance by:

- A. Increasing CPU utilization for network tasks
- B. Allowing VMs direct access to physical network interfaces
- C. Encrypting all data in transit
- D. Decreasing the number of available network paths

Answer: B

NEW QUESTION # 139

```
router bgp 200
 network 10.10.0.0
 neighbor 10.12.10.1 remote-as 400
!
<output omitted>
!
end
```

Refer to the exhibit. An engineer must configure multihoming between router R1 and service provider SP-2.
Locally generated routes must be advertised to service provider SP-2. Which command must be run on R1 to complete the configuration?

- A. network 10.12.10.1 route-map as200only in
- B. neighbor 10.12.10.1 route-map localonly out

- C. neighbor 10.0.0.0 route-map localonly out
- D. network 10.0.0.0 route-map as200only out

Answer: B

Explanation:
On R1 (AS200), the requirement is:
* Advertiselocally generated routes(for example, 10.10.10.0/24 from AS200)
* Only towardSP-2, which peers on IP10.12.10.1
* Apply a policy (route-map) controlling what R1 advertises
In BGP, to controlwhich locally originated routesare sent to a specific neighbor, the correct configuration is:
neighbor <IP> route-map <map-name> out
This applies outbound policy filtering or permitting to the prefixes advertised.
Thus:
* The neighbor toward SP-2 is10.12.10.1
* The route-map must be appliedoutbound
* The command that accomplishes this is:
neighbor 10.12.10.1 route-map localonly out
Why the Other Options Are Incorrect
* A. network 10.0.0.0 route-map as200only outThe network command doesnotaccept route-map out.
This is invalid syntax.
* C. network 10.12.10.1 route-map as200only inIncorrect network, incorrect direction, and invalid syntax with in.
* D. neighbor 10.0.0.0 route-map localonly out10.0.0.0 is not a BGP neighbor; it's a network prefix.

NEW QUESTION # 140
What is the main advantage of using container orchestration in application deployment?

- A. Reduced security
- B. Automated management of containers
- C. Manual scaling of applications
- D. Increased application latency

Answer: B

NEW QUESTION # 141
What is used to protect a web server against a DDoS attack?

- A. Network Access Control
- B. Device Authorization Control
- C. Web Application Firewall
- D. Wi-Fi Protected Access

Answer: C

Explanation:
Comprehensive and Detailed Explanation
AWeb Application Firewall (WAF)protects HTTP/HTTPS applications against:
* DDoS attacks (layer 7)
* Bot traffic
* Request floods
* SQL injection, XSS, OWASP Top 10 threats
Other options:
* Device Authorization Control # device authentication, not DDoS
* NAC # endpoint authorization, not DDoS
* WPA # Wi-Fi protection, irrelevant to web servers
Thus, the correct protection mechanism for web servers isA. Web Application Firewall.

NEW QUESTION # 142

......

Once you get the 300-540 certificate, you can quickly quit your current job and then change a desirable job. The 300-540 certificate can prove that you are a competent person. So it is easy for you to pass the interview and get the job. The assistance of our 300-540 practice quiz will change your life a lot. As we can claim that if you study with our 300-540 exam braindumps for 20 to 30 hours, you can pass the exam and get the certification with ease.
