

300-620 Latest Dumps Book | 300-620 Latest Exam Dumps

2025 Latest Braindumpsqa 300-620 PDF Dumps and 300-620 Exam Engine Free Share: <https://drive.google.com/open?id=1aeXUFfESV8af-mhdq0N0YBJYnm7oBeb>

There are more opportunities for possessing with a certification, and our 300-620 study tool is the greatest resource to get a leg up on your competition, and stage yourself for promotion. When it comes to our time-tested 300-620 latest practice dumps, for one thing, we have a professional team contains a lot of experts who have devoted themselves to the research and development of our 300-620 Exam Guide, thus we feel confident enough under the intensely competitive market. For another thing, conforming to the real exam our 300-620 study tool has the ability to catch the core knowledge. So our customers can pass the exam with ease.

Cisco 300-620 Exam is a certification test that focuses on the implementation of Cisco Application Centric Infrastructure (ACI). 300-620 exam is intended for IT professionals who are looking to gain knowledge and skills in deploying, configuring, and managing an ACI environment. 300-620 exam is part of the CCNP Data Center certification track and is designed to validate the candidate's expertise in ACI architecture, policy model, fabric infrastructure, and security.

Exam Characteristics

Before enrolling in the exam, it is recommended to first gather information about its key characteristics. Generally, 300-620 comprises multiple-choice questions that needed to be completed in 1,5 hours. This test is available in the English language only, presently. Also, there are no certain details regarding the passing score. However, it is clear that the result you achieve will remain valid for three years. Then, one has to fulfill the recertification requirements before the cycle ends to enjoy the benefits for a longer time.

As far as exam delivery is concerned, it is managed by Pearson VUE. The online and offline proctoring facilities are available. The standard fee for one attempt is \$300. The applicants have to pay this sum to buy an exam voucher. Note that this voucher is non-transferable and non-refundable.

Preparation Material with Free Demos and Updates [2025]

Based on high-quality products, our 300-620 guide torrent has high quality to guarantee your test pass rate, which can achieve 98% to 100%. 300-620 study tool is updated online by our experienced experts, and then sent to the user. So you don't need to pay extra attention on the updating of study materials. The data of our 300-620 exam torrent is forward-looking and can grasp hot topics to help users master the latest knowledge. If you fail the exam with 300-620 Guide Torrent, we promise to give you a full refund in the shortest possible time. Of course, if you are not reconciled and want to re-challenge yourself again, we will give you certain discount.

Cisco Implementing Cisco Application Centric Infrastructure Sample Questions (Q353-Q358):

NEW QUESTION # 353

Which statement regarding ACI Multi-Pod and TEP pool is true?

- A. A different TEP pool must be assigned to each Pod.
- B. The Pod1 TEP pool must be split and a portion of the TEP pool allocated to each Pod.
- C. The same TEP pool is used in all Pods.
- D. The IP addresses used in the IPN network can overlap TEP pool of the APIC.

Answer: A

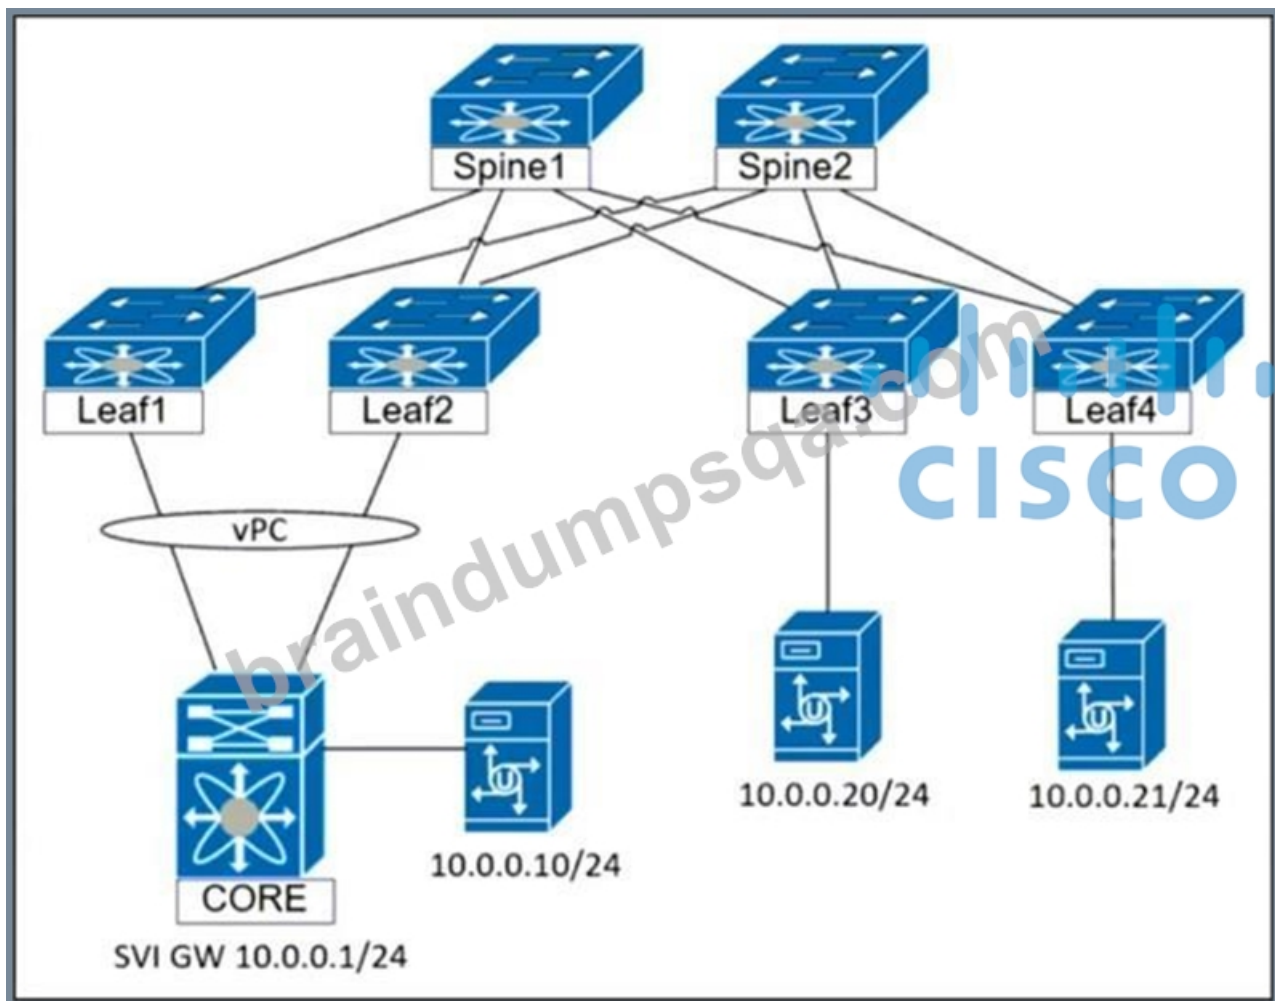

Explanation:

Section: ACI Anywhere

Explanation/Reference: <https://www.cisco.com/c/en/us/solutions/collateral/data-center-virtualization/application-centric-infrastructure/white-paper-c11-739714.html>

NEW QUESTION # 354

Refer to the exhibit. A company deployed Cisco ACI and plans to migrate the first servers to the Cisco ACI fabric. The current network setup experiences a small number of silent hosts. What is the Cisco recommended bridge domain configuration to support the network topology presented?

- A. ARP Flooding: Disabled
L3 Unknown Multicast Flooding: Flood
- B. ARP Flooding: Enabled
Multi Destination Flooding: Flood in BD
- C. Unicast Routing: Enabled
L2 Unknown Unicast: Hw Proxy
- D. Unicast Routing: Disabled
L2 Unknown Unicast: Flood

Answer: C

Explanation:

When you extend an existing L3-switched network into ACI and keep the original SVI as the gateway, enabling Unicast Routing on the bridge domain lets the fabric advertise its host routes back to that SVI. Setting L2 Unknown Unicast to HW Proxy ensures the spine/leaf fabric will proxy ARP and unknown-unicast MAC requests for those migrated servers so that "silent" hosts are reachable without flooding.

NEW QUESTION # 355

Where is the COOP database located?

- A. endpoint
- B. leaf
- C. APIC
- D. spine

Answer: D

NEW QUESTION # 356

An ACI engineer is implementing a Layer 3 out inside the Cisco ACI fabric that must meet these requirements:

The data center core switch must be connected to one of the leaf switches with a single 1G link.

The routes must be exchanged using a link-state routing protocol that supports hierarchical network design.

The data center core switch interface must be using 802.1Q tagging, and each vlan will be configured with a dedicated IP address.

Which set of steps accomplishes these goals?

- A. Set up the EIGRP Protocol policy with the selected Autonomous System number. Create the Routed Outside object and Node Profile selecting EIGRP. Configure the Interface profile selecting Routed Interface and the appropriate interfaces. Create the External Network object with a network of 0.0.0.0/0.
- **B. Configure the OSPF Protocol policy with an area of 0.**
Create Routed Outside object and Node Profile, selecting OSPF as the routing protocol. Build the Interface profile, selecting Routed Sub-interface and the appropriate VLAN. Configure the External Network object with a network of 0.0.0.0/0.
- C. Set up the BGP Protocol policy with the Autonomous System number of 0.
Configure an interface policy and an External Bridged Domain.
Create an External Bridged Network using the configured VLAN pool.
Build the Leaf profile, selecting Routed sub-interface and the appropriate VLAN.
- D. Set up the EIGRP Protocol policy with the selected Autonomous System number. Set up the Routed External Network object and a Node Profile, selecting EIGRP. Create the Switch profile, selecting Port-channel and the appropriate interfaces.
Create the default network and associate it with the Routed Outside object.

Answer: B

NEW QUESTION # 357

On which two interface types should a user configure storm control to protect against broadcast traffic? (Choose two.)

- A. fabric uplink interfaces on the leaf switches
- B. APIC facing interfaces
- C. all interfaces on the leaf switches in the fabric
- **D. endpoint-facing trunk interface**
- **E. port channel on a single leaf switch**

Answer: D,E

NEW QUESTION # 358

.....

In addition to the content updates, our system will also be updated for the 300-620 training materials. If you have any opinions, you can tell us that our common goal is to create a product that users are satisfied with. After you start learning, I hope you can set a fixed time to check emails. If the content of the 300-620 Practice Guide or system is updated, we will send updated information to your e-mail address. Of course, you can also consult our e-mail on the status of the product updates. I hope we can work together to make you better use 300-620 simulating exam to pass the 300-620 exam.
