

300-620 Valid Exam Blueprint | 300-620 Certification Sample Questions

P.S. Free & New 300-620 dumps are available on Google Drive shared by Prep4King: <https://drive.google.com/open?id=16X4S8O-sCQCaYW2vySqgkU7f8Ah9OOmt>

Firstly, we can give you 100% pass rate guarantee on the 300-620 exam. Our 300-620 practice quiz is equipped with a simulated examination system with timing function, allowing you to examine your learning results at any time, keep checking for defects, and improve your strength. Secondly, during the period of using 300-620 learning guide, we also provide you with 24 hours of free online services, which help to solve any problem for you on the 300-620 exam questions at any time and sometimes mean a lot to our customers.

How to Prepare for Implementing Cisco Application Centric Infrastructure (300-620 DCACI)

Preparation Guide for Implementing Cisco Application Centric Infrastructure (300-620 DCACI)

Introduction for Implementing Cisco Application Centric Infrastructure (300-620 DCACI)

The Implementing Cisco Application Centric Infrastructure v1.0 (DCACI 300-620) exam is a 90-minute exam that is associated with the CCNP Data Center Certification and Cisco Certified Specialist - Data Center ACI Implementation certifications. This exam tests a candidate's knowledge of Cisco switches in ACI mode including configuration, implementation, and management. You will learn the essential skills, concepts, and technologies to be a contributing member of a cybersecurity operations center (SOC) including understanding the IT infrastructure, operations, and vulnerabilities.

Cisco ACI delivers an intent-based networking framework to enable agility in the data center. It captures higher-level business and user intent in the form of a policy and translates this intent into the network constructs necessary to dynamically provision the network, security, and infrastructure services. It uses a holistic systems-based approach, with tight integration between hardware and software and physical and virtual elements, an open ecosystem model, and innovative Cisco customer Application-Specific Integrated Circuits (ASICs) to enable unique business value for modern data centers. This unique approach uses a common policy-based operating model across the network, drastically reducing the cost and complexity of operating your network.

Before taking this exam, you should have the following knowledge and skills:

- ACI Fabric Infrastructure
- Integrations
- ACI Packet Forwarding
- ACI Anywhere
- ACI Management

The following candidates can enroll for this exam:

- Network Designers
- Cisco integrators and partners
- Technical Solutions Architects
- Network Engineers
- Field Engineers
- Consulting Systems Engineers
- Systems Engineers
- Network Administrators
- Cisco Integrators/Partners
- Network Managers
- Server Administrators
- Data Center Engineers

Conclusion

Earning a certification is a good opportunity for you to upgrade yourself, and the certificates offered by Cisco can easily boost your marketability. Pass 300-620 Exam to improve and validate your skills, improve your confidence, and gain extra recognition for your competence. With its related specialist-level and CCNP accreditations, you can opt for a variety of lucrative jobs, so go for it!

Upon successful completion of the Cisco 300-620 exam, candidates will earn the Cisco Certified Specialist – ACI Implementation certification. Implementing Cisco Application Centric Infrastructure certification demonstrates that the candidate has the skills and knowledge necessary to implement and manage Cisco's Application Centric Infrastructure. It is highly valued by enterprises, as it signals the candidate's ability to modernize and secure their infrastructure in order to meet the rapidly evolving demands of the modern business environment.

300-620 – 100% Free Valid Exam Blueprint | Reliable Implementing Cisco Application Centric Infrastructure Certification Sample Questions

The purpose of our product is to let the clients master the 300-620 quiz torrent and not for other illegal purposes. Our system is well designed and any person or any organization has no access to the information of the clients. So please believe that we not only provide the best 300-620 test prep but also provide the best privacy protection. Take it easy. If you really intend to pass the 300-620 Exam, our software will provide you the fast and convenient learning and you will get the best study materials and get a very good preparation for the exam. The content of the 300-620 guide torrent is easy to be mastered and has simplified the important information.

Cisco Implementing Cisco Application Centric Infrastructure Sample Questions (Q326-Q331):

NEW QUESTION # 326

Refer to the exhibit. An engineer is deploying a Cisco ACI fabric with an L2Out to external switches. The Cisco ACI fabric has just been deployed and follows the default forwarding behavior. Which two actions accomplish a loop free topology? (Choose two.)

- A. Add ports Eth1/1 and Eth1/2 to the LACP port channel.
- **B. Disconnect the link between Leaf3 and Leaf4.**
- C. Configure BPDU guard on Catalyst switch ports.
- D. Enable MCP on the ports between the leafs and spine switches.
- E. Implement LLDP on ports Eth1/1 and Eth1/2 on Leaf2.

Answer: B

NEW QUESTION # 327

Which tenant is used when configuring in-band management IP addresses for Cisco APICs, leaf nodes, and spine nodes?

- A. common
- B. default
- C. infra
- **D. mgmt**

Answer: D

Explanation:

b_KB_Configuring_Static_Management_Access.html#concept_CFF63FEBE947424291B0F10E6F23DA7D

NEW QUESTION # 328

An engineer created two interface protocol policies called Pol_CDP40275332 and Pol_LLDP46783451. The policies must be used together in a single policy. Which ACI object must be used?

- A. switch policy group
- B. interface profile
- **C. interface policy group**
- D. switch profile

Answer: C

NEW QUESTION # 329

New ESXi hosts are procured in a data center compute expansion project. An engineer must update the configuration on the Cisco APIC controllers to support the addition of the new servers to the existing VMM domain. Which action should be taken to support this change?

- A. Set the encapsulation mode as VXLAN.
- **B. Map the leaf interface selector to the AEP that is associated with the VMM domain.**
- C. Enable infrastructure VLAN in the associated AEP.
- D. Create a range of internal VLANs in the associated VLAN pool.

Answer: B

NEW QUESTION # 330

An engineer must monitor a Cisco ACI fabric with SNMP. The "permit any contract" attribute is not configured in the fabric. Which action must be taken to receive SNMP traps from Cisco APIC?

- A. Provide a standard contract under the user tenant.
- **B. Add the UDP filter port 162 to the existing OOB contract.**
- C. Configure the OOB contract under the common tenant.
- D. Consume the inband contract from the out-of-band EPG.

Answer: B

Explanation:

Pre-requisites

1. To allow SNMP communications, you must configure an "out-of-band (OOB) contract" in the "mgmt" tenant

to allow SNMP traffic. SNMP traffic typically uses UDP port 161 for SNMP requests.

2. Configure the APIC OOB IP addresses in the "mgmt" tenant. Although the OOB addresses are configured during APIC setup, the addresses must be explicitly configured in the "mgmt" tenant before the OOB contract will take effect.

About SNMP

ACI provides SNMPv1, v2, and v3 support, including Management Information Bases (MIBs) and notifications (traps). The SNMP standard allows any third-party applications that support the different MIBs to manage and monitor the ACI fabric.
