300-710 Simulated Test, 300-710 Reliable Test Tips

BONUS!!! Download part of GuideTorrent 300-710 dumps for free: https://drive.google.com/open?id=14H8QBgL8AgwAZR8THhUswgaX3wsfuEso

We promise you that if you fail to pass the exam after using 300-710 training materials of us, we will give you full refund. We are pass guarantee and money back guarantee if you fail to pass the exam. Besides, 300-710 exam dumps are high-quality, you can pass the exam just one time if you choose us. We offer you free update for one year for 300-710 Training Materials, and our system will send the update version to your email automatically. We have online and offline service, the staff possess the professional knowledge for 300-710 exam dumps, if you have any questions, don't hesitate to contact us.

Cisco is a leading company in the field of networking and cybersecurity solutions. They offer a wide range of certification exams to help professionals validate their knowledge and skills in different areas of networking technology. One of these exams is the Cisco 300-710 (Securing Networks with Cisco Firepower) Certification Exam.

>> 300-710 Simulated Test <<

Fantastic 300-710 Simulated Test & Guaranteed Cisco 300-710 Exam Success with Professional 300-710 Reliable Test Tips

All these three Cisco 300-710 practice exam formats provide a user-friendly interface to users. The Cisco 300-710 PDF questions file is very installed on any device and operating system. After the quick Cisco 300-710 Pdf Dumps file installation you can run this file anywhere and anytime and start 300-710 exam preparation.

Cisco Securing Networks with Cisco Firepower Sample Questions (Q212-Q217):

NEW QUESTION # 212
A network administrator wants to block traffic to a known malware site at https://www.badsite.com and all subdomains while ensuring no packets from any internal client are sent to that site. Which type of policy must the network administrator use to accomplish this goal?

- A. Access Control policy with URL filtering
- B. DNS policy
- C. SSL policy
- D. Prefilter policy

Answer: A

NEW QUESTION # 213
When packet capture is used on a Cisco Secure Firewall Threat Defense device and the packet flow is wailing on the malware query, which Snort verdict appears?

- A. block
- B. retry
- C. blocfcflow
- D. replace

Answer: B

Explanation:
When packet capture is used on a Cisco Secure Firewall Threat Defense (FTD) device and the packet flow is waiting on the malware query, the Snort verdict appears as "retry." This indicates that the device is still processing the malware analysis and has not yet determined the final action for the packet.
The "retry" verdict signifies that the packet is in a holding state while awaiting the result of the malware inspection, which helps in maintaining the security posture until a definitive decision is made.

NEW QUESTION # 214
A network administrator must create an EtherChannel Interface on a new Cisco Firepower 9300 appliance registered with an FMC tor high availability. Where must the administrator create the EtherChannel interface?

- A. FXOS CLI
- B. FMC GUI
- C. FTD CLI
- D. FMC CLI

Answer: A

Explanation:
An EtherChannel interface is a logical interface that consists of a bundle of individual Ethernet links that act as a single network link. An EtherChannel interface can increase the bandwidth and reliability of a network connection5.
On a Cisco Firepower 9300 appliance registered with an FMC for high availability, the network administrator must create the EtherChannel interface on the FXOS CLI. The FXOS is the operating system that runs on the Firepower 9300 chassis and provides hardware management functions such as interface configuration, power supply status, fan speed control, and so on6.
To create an EtherChannel interface on the FXOS CLI, the network administrator can follow these steps5:
* Connect to the FXOS CLI using SSH or console.
* Enter scope eth-uplink command to enter Ethernet uplink mode.
* Enter create port-channel command to create an EtherChannel interface.
* Enter a port-channel ID (1-48) and a mode (on or active) for the EtherChannel interface.
* Enter add interface command to add physical interfaces to the EtherChannel interface.
* Enter one or more interface IDs (for example, 1/1) for the physical interfaces.
* Enter commit-buffer command to save the changes.
The other options are incorrect because:
* The FMC CLI does not provide any commands to create an EtherChannel interface on a Firepower 9300 appliance. The FMC CLI is mainly used for managing FMC settings such as backup, restore, upgrade, troubleshoot, and so on7.
* The FTD CLI does not provide any commands to create an EtherChannel interface on a Firepower 9300 appliance. The FTD CLI is mainly used for managing FTD settings such as routing, NAT, VPN, access control, and so on8.
* The FMC GUI does not provide any options to create an EtherChannel interface on a Firepower 9300 appliance. The FMC GUI is mainly used for managing FTD policies such as access control, intrusion, file, malware, and so on9.

NEW QUESTION # 215
Which protocol establishes network redundancy in a switched Firepower device deployment?

- A. HSRP
- B. GLBP
- C. STP
- D. VRRP

Answer: C

Explanation:
https://www.cisco.com/c/en/us/td/docs/security/firepower/60/configuration/guide/fpmc-config- guide-v60/fpmc-config-guide-v60_chapter_01101000.html

NEW QUESTION # 216
An engineer wants to perform a packet capture on the Cisco FTD to confirm that the host using IP address 192 168.100.100 has the MAC address of 0042 7734.103 to help troubleshoot a connectivity issue What is the correct tcpdump command syntax to ensure that the MAC address appears in the packet capture output?

- A. -nm src 192.168.100.100
- B. -w capture.pcap -s 1518 host 192.168.100.100 ether
- C. -w capture.pcap -s 1518 host 192.168.100.100 mac
- D. -ne src 192.168.100.100

Answer: D

Explanation:

NEW QUESTION # 217
.....

Our 300-710 test questions are compiled by domestic first-rate experts and senior lecturer and the contents of them contain all the important information about the test and all the possible answers of the questions which maybe appear in the test. You can use the practice test software to check your learning outcomes. Our 300-710 test practice guide' self-learning and self-evaluation functions, the statistics report function, the timing function and the function of stimulating the test could assist you to find your weak links, check your level, adjust the speed and have a warming up for the real exam. You will feel your choice to buy 300-710 Exam Dump is too right.
