Cisco study material is designed to enhance your personal ability and professional skills to solve the actual problem. 300-715 exam certification will be the most important one. There are many study material online for you to choose. While, the 300-715 exam dumps provided by BraindumpsPrep site will be the best valid training material for you. 300-715 study pdf contains the questions which are all from the original question pool, together with verified answers. Besides, the explanations are very detail and helpful after the 300-715 questions where is needed. You can pass your test at first try with our 300-715 training pdf.

Cisco 300-715 certification exam is designed for professionals who want to validate their skills in implementing and configuring Cisco Identity Services Engine (ISE). Cisco ISE is a comprehensive security solution that provides network access control, identity management, and threat defense. Implementing and Configuring Cisco Identity Services Engine certification exam is intended for candidates who are responsible for deploying, managing, and troubleshooting Cisco ISE solutions in small to medium-sized enterprises.

Cisco 300-715 Certification Exam is an excellent opportunity for IT professionals to showcase their skills and knowledge in implementing and managing Cisco ISE solutions. Implementing and Configuring Cisco Identity Services Engine certification is highly valued in the IT industry and provides various job opportunities. Candidates who pass the exam can expect to have a successful career in network security.

## Pass Guaranteed Cisco - 300-715 - Implementing and Configuring Cisco Identity Services Engine Pass-Sure Valuable Feedback

Our Implementing and Configuring Cisco Identity Services Engine study question has high quality. So there is all effective and central practice for you to prepare for your test. With our professional ability, we can accord to the necessary testing points to edit 300-715 exam questions. It points to the exam heart to solve your difficulty. So high quality materials can help you to pass your exam effectively, make you feel easy, to achieve your goal. With the 300-715 Test Guide use feedback, it has 98%-100% pass rate. That's the truth from our customers. And it is easy to use for you only with 20 hours' to 30 hours' practice. After using the 300-715 test guide, you will have the almost 100% assurance to take part in an examination. With high quality materials and practices, you will get easier to pass the exam.

Cisco 300-715 Certification Exam is an excellent way for IT professionals to validate their skills and knowledge in implementing and configuring Cisco Identity Services Engine. Implementing and Configuring Cisco Identity Services Engine certification can help IT professionals advance their careers and increase their earning potential by demonstrating their expertise in network security and Cisco technologies.

## Cisco Implementing and Configuring Cisco Identity Services Engine Sample Questions (Q101-Q106):

### NEW QUESTION # 101

Which platform does a Windows-based device download the Network Assistant from?

- A. native OS
- B. Microsoft app store
- C. Cisco download site
- **D. Cisco ISE**

**Answer: D**

### NEW QUESTION # 102

Which two default endpoint identity groups does Cisco ISE create? (Choose two )

- A. allow list
- **B. profiled**
- **C. unknown**
- D. endpoint
- E. block list

**Answer: B,C**

Explanation:

[https://www.cisco.com/c/en/us/td/docs/security/ise/2-1/admin\\_guide/b\\_ise\\_admin\\_guide\\_21/b\\_ise\\_admin\\_guide\\_20\\_chapter\\_010100.html](https://www.cisco.com/c/en/us/td/docs/security/ise/2-1/admin_guide/b_ise_admin_guide_21/b_ise_admin_guide_20_chapter_010100.html)

Default Endpoint Identity Groups Created for Endpoints Cisco ISE creates the following five endpoint identity groups by default: Blacklist, GuestEndpoints, Profiled, RegisteredDevices, and Unknown. In addition, it creates two more identity groups, such as Cisco-IP-Phone and Workstation, which are associated to the Profiled (parent) identity group. A parent group is the default identity group that exists in the system.

Cisco ISE creates the following endpoint identity groups:

\* Blacklist-This endpoint identity group includes endpoints that are statically assigned to this group in Cisco ISE and endpoints that are block listed in the device registration portal. An authorization profile can be defined in Cisco ISE to permit, or deny network access to endpoints in this group.

\* GuestEndpoints-This endpoint identity group includes endpoints that are used by guest users.

\* Profiled-This endpoint identity group includes endpoints that match endpoint profiling policies except Cisco IP phones and workstations in Cisco ISE.

\* RegisteredDevices-This endpoint identity group includes endpoints, which are registered devices that are added by an employee through the devices registration portal. The profiling service continues to profile these devices normally when they are assigned to this group. Endpoints are statically assigned to this group in Cisco ISE, and the profiling service cannot reassign them to any other identity group.

These devices will appear like any other endpoint in the endpoints list. You can edit, delete, and block these devices that you added through the device registration portal from the endpoints list in the Endpoints page in Cisco ISE. Devices that you have blocked in the device registration portal are assigned to the Blacklist endpoint identity group, and an authorization profile that exists in Cisco ISE redirects blocked devices to a URL, which displays "Unauthorised Network Access", a default portal page to the blocked devices.

\* Unknown-This endpoint identity group includes endpoints that do not match any profile in Cisco ISE.

In addition to the above system created endpoint identity groups, Cisco ISE creates the following endpoint identity groups, which are associated to the Profiled identity group:

\* Cisco-IP-Phone-An identity group that contains all the profiled Cisco IP phones on your network.

\* Workstation-An identity group that contains all the profiled workstations on your network.

### NEW QUESTION # 103

Drag the steps to configure a Cisco ISE node as a primary administration node from the left into the correct order on the right.

### NEW QUESTION # 105

An engineer configured posture assessment for their network access control with the goal of using an agent that supports using service conditions for the assessment. The agent should run as a background process to avoid user interruption, but the user can see it when it is run. What is the problem?

- A. The posture module was deployed using the headend instead of installing it with SCCM.
- B. The proper permissions were not given to the temporal agent to conduct the assessment.
- C. The user required remediation so the agent appeared in the notifications.
- D. The selected posture agent does not support the engineer's goal.

Answer: D
