

300-740 Actual Torrent: Designing and Implementing Secure Cloud Access for Users and Endpoints & 300-740 Actual Exam & 300-740 Pass for Sure

DOWNLOAD the newest Actual4Exams 300-740 PDF dumps from Cloud Storage for free: <https://drive.google.com/open?id=1MoesivYOEwdJadF1YpWcl-pjtE5HjFqX>

The number of questions of the 300-740 study materials you have done has a great influence on your passing rate. As for our study materials, we have prepared abundant exercises for you to do. You can take part in the real 300-740 exam after you have memorized all questions and answers accurately. Also, we just pick out the most important knowledge to learn. Through large numbers of practices, you will soon master the core knowledge of the 300-740 Exam. It is important to review the questions you always choose mistakenly. You should concentrate on finishing all exercises once you are determined to pass the 300-740 exam.

Cisco 300-740 Exam Syllabus Topics:

Topic	Details
Topic 1	• User and Device Security: This section of the exam measures skills of Identity and Access Management Engineers and deals with authentication and access control for users and devices. It covers how to use identity certificates, enforce multifactor authentication, define endpoint posture policies, and configure single sign-on (SSO) and OIDC protocols. The section also includes the use of SAML to establish trust between devices and applications.
Topic 2	• Application and Data Security This section of the exam measures skills of Cloud Security Analysts and explores how to defend applications and data from cyber threats. It introduces the MITRE ATT&CK framework, explains cloud attack patterns, and discusses mitigation strategies. Additionally, it covers web application firewall functions, lateral movement prevention, microsegmentation, and creating policies for secure application connectivity in multicloud environments.
Topic 3	• Network and Cloud Security: This section of the exam measures skills of Network Security Engineers and covers policy design for secure access to cloud and SaaS applications. It outlines techniques like URL filtering, app control, blocking specific protocols, and using firewalls and reverse proxies. The section also addresses security controls for remote users, including VPN-based and application-based access methods, as well as policy enforcement at the network edge.

Topic 4	• Cloud Security Architecture: This section of the exam measures the skills of Cloud Security Architects and covers the fundamental components of the Cisco Security Reference Architecture. It introduces the role of threat intelligence in identifying and mitigating risks, the use of security operations tools for monitoring and response, and the mechanisms of user and device protection. It also includes strategies for securing cloud and on-premise networks, as well as safeguarding applications, workloads, and data across environments.
Topic 5	• SAFE Architectural Framework: This section of the exam measures skills of Security Architects and explains the Cisco SAFE framework, a structured model for building secure networks. It emphasizes the importance of aligning business goals with architectural decisions to enhance protection across the enterprise.
Topic 6	• Integrated Architecture Use Cases: This section of the exam measures the skills of Cloud Solution Architects and covers key capabilities within an integrated cloud security architecture. It focuses on ensuring common identity across platforms, setting multicloud policies, integrating secure access service edge (SASE), and implementing zero-trust network access models for more resilient cloud environments.

Exam Cisco 300-740 Assessment - Latest 300-740 Exam Discount

Why you should trust Actual4Exams? By trusting Actual4Exams, you are reducing your chances of failure. In fact, we guarantee that you will pass the 300-740 certification exam on your very first try. If we fail to deliver this promise, we will give your money back! This promise has been enjoyed by over 90,000 takes whose trusted Actual4Exams. Aside from providing you with the most reliable dumps for 300-740, we also offer our friendly customer support staff. They will be with you every step of the way.

Cisco Designing and Implementing Secure Cloud Access for Users and Endpoints Sample Questions (Q36-Q41):

NEW QUESTION # 36

Cisco Secure Network Analytics is beneficial for:

- A. Providing detailed visibility into network traffic patterns for baseline and compliance analysis
- B. Detecting unusual network traffic that could indicate a security threat
- C. Ignoring encrypted traffic
- D. Reducing the amount of stored network logs

Answer: A,B

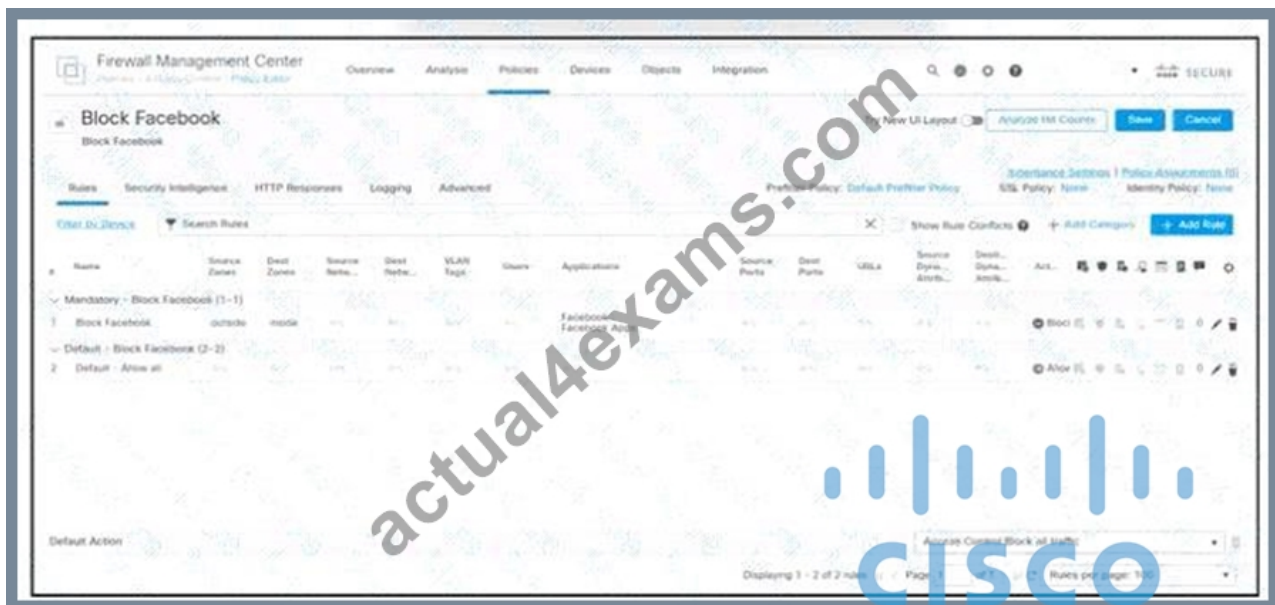

NEW QUESTION # 37

To validate traffic flow and telemetry reports for baseline and compliance behavior analysis, one should use:

- A. Cisco Secure Network Analytics for in-depth network visibility
- B. Basic firewall rules without logging
- C. Manual log reviews exclusively
- D. Paper-based tracking systems

Answer: A

NEW QUESTION # 38

Refer to the exhibit. An engineer must block internal users from accessing Facebook and Facebook Apps. All other access must be allowed. The indicated policy was created in Cisco Secure Firewall Management Center and deployed to the internet edge firewall; however, users still can access Facebook. Which two actions must be taken to meet the requirement? (Choose two.)

- A. Set Destination Zones to outside for rule 1.
- B. Set Source Zones to inside for rule 1.
- C. Set Destination Zones to outside for rule 2.
- D. Set Applications to Facebook and Facebook Apps for rule 2.
- E. Set Source Zones to inside for rule 2.

Answer: A,B

Explanation:

In the provided screenshot of Cisco Secure Firewall Management Center (FMC), the rule labeled "Block Facebook" is intended to block access to Facebook and Facebook Apps. However, the rule lacks correct zone configurations, which is why the block is ineffective.

Per Cisco's best practices outlined in the Designing and Implementing Secure Cloud Access for Users and Endpoints (SCAZT) documentation and Cisco Secure Firewall documentation:

The source zone should reflect where the traffic is originating from-in this case, from internal users.

Therefore, Source Zone must be set to inside (Answer: E).

The destination zone should reflect where the traffic is headed-in this case, towards the internet. So, Destination Zone must be set to outside (Answer: D).

Without properly defining source and destination zones, FMC rules may not match the traffic correctly, resulting in traffic being incorrectly allowed.

Reference: Designing and Implementing Secure Cloud Access for Users and Endpoints (SCAZT), Section 4: Application and Data Security, Pages 85-89; Cisco Firepower Threat Defense Configuration Guide.

NEW QUESTION # 39

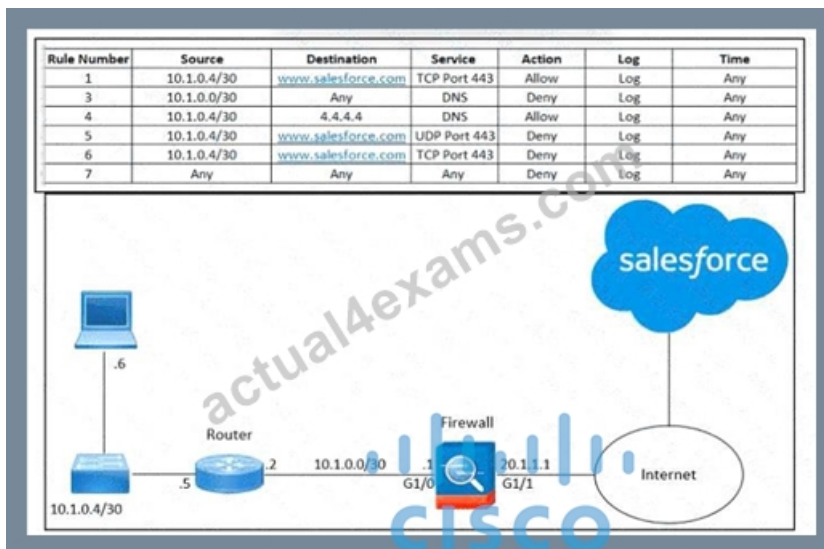

OIDC stands for OpenID Connect.

What is it used for in the context of identity management?

- A. To encrypt device data
- B. To track user activity on websites
- C. To connect to open networks
- D. To authenticate users by leveraging an identity provider

Answer: D

NEW QUESTION # 40

Refer to the exhibit. An engineer must configure the Cisco ASA firewall to allow the client with IP address 10.1.0.6 to access the Salesforce login page at <https://www.salesforce.com>. The indicated configuration was applied to the firewall and public DNS 4.4.4.4 is used for name resolution; however, the client still cannot access the URL. What should be done to meet the requirements?

- A. Remove rule 7
- B. Move rule 5 to the top
- C. Remove rule 3
- D. Move rule 6 to the top

Answer: C

Explanation:

Rule 3 denies all DNS traffic from the subnet 10.1.0.0/30, which includes the client at 10.1.0.6. Since DNS resolution is required to resolve www.salesforce.com, this DNS deny rule is preventing the client from obtaining the IP address needed for HTTPS connection. Removing Rule 3 allows DNS traffic from the client, while Rule 4 permits it specifically for the 4.4.4.4 DNS server. As per SCAZT Section 3: Network and Cloud Security (Pages 70-73), DNS resolution must be allowed before HTTPS connectivity is attempted. Rule priority and traffic dependency should always be considered in firewall design.

Reference: Designing and Implementing Secure Cloud Access for Users and Endpoints (SCAZT), Section 3, Pages 70-73

NEW QUESTION # 41

.....

Our company boasts top-ranking expert team, professional personnel and specialized online customer service personnel. Our experts refer to the popular trend among the industry and the real exam papers and they research and produce the detailed information about the 300-740 exam study materials. They constantly use their industry experiences to provide the precise logic verification. The 300-740 prep material is compiled with the highest standard of technology accuracy and developed by the certified experts and the published authors only. And you will be bound to pass the 300-740 exam with them.
