300-740 Valid Braindumps Pdf | Books 300-740 PDF

Our 300-740 learning materials provide multiple functions and considerate services to help the learners have no inconveniences to use our product. We guarantee to the clients if only they buy our 300-740 study materials and learn patiently for some time they will be sure to pass the 300-740 test with few failure odds. The price of our product is among the range which you can afford and after

you use our study materials you will certainly feel that the value of the product far exceed the amount of the money you pay. Choosing our 300-740 Study Guide equals choosing the success and the perfect service.

Cisco Designing and Implementing Secure Cloud Access for Users and Endpoints Sample Questions (Q181-Q186):

NEW QUESTION # 181

Multifactor authentication typically requires something you know, something you have, and something you _____.

- A. encrypt
- B. forget
- C. are
- D. delete

Answer: C

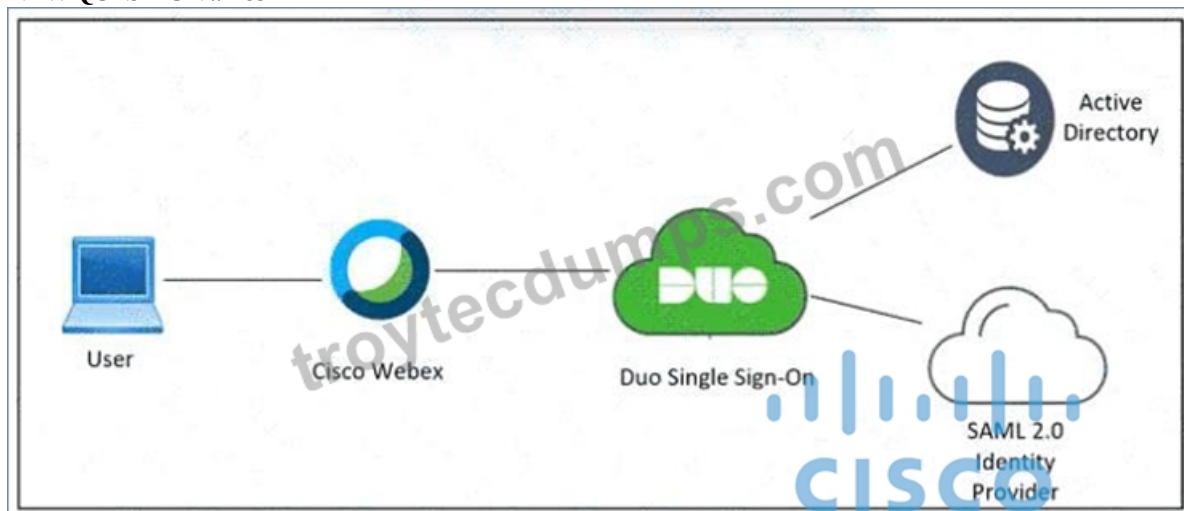

NEW QUESTION # 182

Security services edge (SSE) combines which of the following services for enhanced security at the network edge?

- A. Uninterruptible Power Supply (UPS)
- B. Secure Web Gateway (SWG)
- C. Cloud Access Security Broker (CASB)
- D. Zero Trust Network Access (ZTNA)

Answer: B,C,D

NEW QUESTION # 183

Refer to the exhibit. An engineer must configure Duo SSO for Cisco Webex and add the Webex application to the Duo Access Gateway. Which two actions must be taken in Duo? (Choose two.)

- A. Import the Identity Provider metadata.
- B. Add a new application to the Duo platform.
- C. Upload the application XML metadata file.
- D. Upload the SAML application JSON file.
- E. Configure the Applications settings for Cisco Webex.

Answer: A,B

Explanation:

To integrate Cisco Webex with Duo SSO using the Duo Access Gateway, the engineer must:

E: Add Cisco Webex as a new SAML application to Duo.

C: Configure the Webex application settings, including Entity ID, Assertion Consumer Service URL, and signing requirements.

Uploading XML metadata (Option A) is typically used when importing IdP settings, not for Duo application configuration. JSON (Option B) is not used in SAML-based Duo app configurations.

NEW QUESTION # 184

CISA guidelines in cloud security architecture focus on:

- A. Improving software development practices
- **B. Strengthening cybersecurity infrastructure and response**
- C. Offering financial advice to IT companies
- D. Designing physical devices for network security

Answer: B

NEW QUESTION # 185

Refer to the exhibit. An engineer must configure a global allow list in Cisco Umbrella for the cisco.com domain. All other domains must be blocked. After creating a new policy and adding the cisco.com domain, the engineer attempts to access a site outside of cisco.com and is successful. Which additional Security Settings action must be taken to meet the requirement?

- A. Enforce SafeSearch.
- B. Limit Content Access.
- C. Apply Destination List.
- **D. Enable Allow-Only Mode**

Answer: D

Explanation:

When configuring Cisco Umbrella to block all traffic except to domains explicitly allowed (e.g., cisco.com), the "Allow-Only Mode" must be enabled. This setting overrides default behavior and ensures that only entries listed in the allow list are accessible-everything else is automatically blocked. According to SCAZT Section

1 (Cloud Security Architecture, Pages 16-19), enabling Allow-Only Mode is crucial for strict outbound DNS filtering.

Without this setting, the system allows access to all domains not explicitly blocked, which is why the engineer was able to access non-cisco.com domains despite defining an allow list.
