

300-740 Valid Exam Simulator - Complete 300-740 Exam Dumps

What is your reason for wanting to be certified with 300-740? I believe you must want to get more opportunities. As long as you use 300-740 learning materials and get a 300-740 certificate, you will certainly be appreciated by the leaders. As you can imagine that you can get a promotion sooner or latter, not only on the salary but also on the position, so what are you waiting for? Just come and buy our 300-740 study braindumps.

Cisco 300-740 Exam Syllabus Topics:

Topic	Details
Topic 1	• SAFE Key Structure: This section of the exam measures skills of Network Security Designers and focuses on the SAFE framework's key structural elements. It includes understanding 'Places in the Network'—the different network zones—and defining 'Secure Domains' to organize security policy implementation effectively.
Topic 2	• Industry Security Frameworks: This section of the exam measures the skills of Cybersecurity Governance Professionals and introduces major industry frameworks such as NIST, CISA, and DISA. These frameworks guide best practices and compliance in designing secure systems and managing cloud environments responsibly.
Topic 3	• Application and Data Security This section of the exam measures skills of Cloud Security Analysts and explores how to defend applications and data from cyber threats. It introduces the MITRE ATT&CK framework, explains cloud attack patterns, and discusses mitigation strategies. Additionally, it covers web application firewall functions, lateral movement prevention, microsegmentation, and creating policies for secure application connectivity in multicloud environments.
Topic 4	• SAFE Architectural Framework: This section of the exam measures skills of Security Architects and explains the Cisco SAFE framework, a structured model for building secure networks. It emphasizes the importance of aligning business goals with architectural decisions to enhance protection across the enterprise.

Topic 5	• User and Device Security: This section of the exam measures skills of Identity and Access Management Engineers and deals with authentication and access control for users and devices. It covers how to use identity certificates, enforce multifactor authentication, define endpoint posture policies, and configure single sign-on (SSO) and OIDC protocols. The section also includes the use of SAML to establish trust between devices and applications.
Topic 6	• Network and Cloud Security: This section of the exam measures skills of Network Security Engineers and covers policy design for secure access to cloud and SaaS applications. It outlines techniques like URL filtering, app control, blocking specific protocols, and using firewalls and reverse proxies. The section also addresses security controls for remote users, including VPN-based and application-based access methods, as well as policy enforcement at the network edge.
Topic 7	• Threat Response: This section of the exam measures skills of Incident Response Engineers and focuses on responding to threats through automation and data analysis. It covers how to act based on telemetry and audit reports, manage user or application compromises, and implement response steps such as containment, reporting, remediation, and reinstating services securely.
Topic 8	• Cloud Security Architecture: This section of the exam measures the skills of Cloud Security Architects and covers the fundamental components of the Cisco Security Reference Architecture. It introduces the role of threat intelligence in identifying and mitigating risks, the use of security operations tools for monitoring and response, and the mechanisms of user and device protection. It also includes strategies for securing cloud and on-premise networks, as well as safeguarding applications, workloads, and data across environments.

Complete Cisco 300-740 Exam Dumps | New 300-740 Test Materials

Practice on Cisco 300-740 practice test software improves your problem-solving skills and enables you to complete the Cisco 300-740 exam within the time set. Practice with 300-740 practice test software to increase your capability to understand the queries and solve them quickly during the 300-740 Exam. Dumpcollection is a reliable platform, offering Cisco 300-740 pdf questions and practice tests for the last many years. Thousands of candidates have already used them for their Cisco 300-740 exam preparation and gave positive feedback.

Cisco Designing and Implementing Secure Cloud Access for Users and Endpoints Sample Questions (Q173-Q178):

NEW QUESTION # 173

The role of a reverse proxy in cloud security includes:

- A. Load balancing, SSL encryption, and protection from attacks
- B. Directly exposing application APIs to the public internet
- C. Increasing the visibility of backend servers to external threats
- D. Simplifying the architecture by removing the need for WAF

Answer: A

NEW QUESTION # 174

Multifactor authentication typically requires something you know, something you have, and something you _____.

- A. encrypt
- B. delete
- C. are
- D. forget

Answer: C

NEW QUESTION # 175

Refer to the exhibit. A security engineer deployed Cisco Secure XDR, and during testing, the log entry shows a security incident. Which action must the engineer take first?

- A. Block IP address 10.77.17.45.
- B. Rebuild the endpoint.
- C. Uninstall the malware.
- **D. Isolate the endpoint.**

Answer: D

Explanation:

The SCAZT documentation emphasizes that when Cisco Secure XDR identifies a high-risk threat (e.g., risk score 8 out of 10 for malware distribution, as shown in the exhibit), the first priority is to prevent lateral movement and data exfiltration. The recommended first response action is to isolate the affected endpoint from the network.

Cisco Secure Endpoint and XDR allow you to trigger an "isolate" response directly from the dashboard, cutting off all non-management communication from the compromised device. This preserves the environment and enables forensic analysis before removing malware or taking destructive actions like rebuilding the system.

Reference: Designing and Implementing Secure Cloud Access for Users and Endpoints (SCAZT), Section 6: Threat Response, Pages 113-118

NEW QUESTION # 176

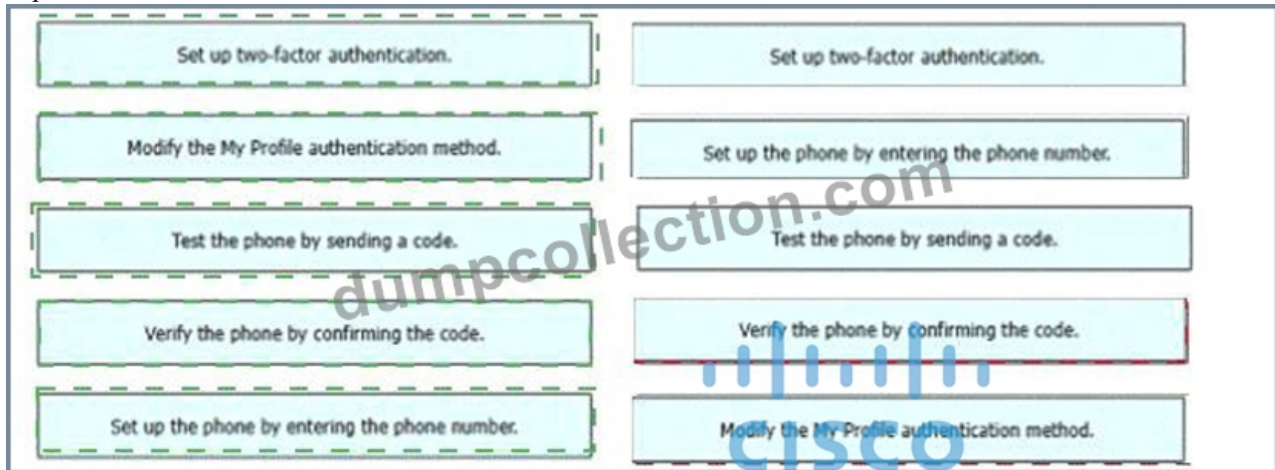

Refer to the exhibit. An engineer must configure multifactor authentication using the Duo Mobile app to provide admin access to a Cisco Meraki switch. The engineer already configured Duo Mobile and received an activation code. Drag and drop the steps from left to right to complete the configuration.

Set up two-factor authentication.	step 1
Modify the My Profile authentication method.	step 2
Test the phone by sending a code.	step 3
Verify the phone by confirming the code.	step 4
Set up the phone by entering the phone number.	step 5

Answer:

Explanation:

Explanation:

A screenshot of a phone number AI-generated content may be incorrect.

NEW QUESTION # 177

What are key considerations when implementing an integrated cloud security architecture?

- A. Implementing consistent security policies across environments
- B. Leveraging zero-trust principles
- C. Centralizing all data storage on-premises
- D. Ensuring compatibility between different cloud services

Answer: A,B,D

NEW QUESTION # 178

.....

In fact, a number of qualifying exams and qualifications will improve your confidence and sense of accomplishment to some extent, so our 300-740 learning materials can be your new target. When we get into the job, our 300-740 learning materials may bring you a bright career prospect. Companies need employees who can create more value for the company, but your ability to work directly proves your value. Our 300-740 Learning Materials can help you improve your ability to work in the shortest amount of time, thereby surpassing other colleagues in your company, for more promotion opportunities and space for development.
