Cisco 300-820 Valid Exam Cost | Reliable 300-820 Exam Syllabus

Our Cisco 300-820 practice exam software is the most impressive product to learn and practice. We have a team of professional software developers to ensure the software's productivity. After installation, Cisco 300-820 Practice Exam software is used without an internet connection.

Cisco 300-820: Career Opportunities

Acing the Cisco 300-820 Exam and obtaining the corresponding certifications open doors to a successful career in the IT field. There is a host of career opportunities for the certified individuals, even for those who have just earned the certificate and do not yet have any working experience. The companies always tend to employ the professionals with the IT certification as it serves as confirmation that they have undergone the relevant training and possess sufficient knowledge of Cisco enabled networks. Some of the job roles that will be available to you after getting certified are outlined below:

- Network Administrator
- Systems Engineer
- Network Engineer

The holders of the Cisco Certified Specialist – Collaboration Cloud & Edge Implementation and CCNP Collaboration certificates can also count on a decent salary. Thus, holding the position of a Network Architect, you can earn from \$80,000 to \$154,000 per annum. The title of a Solutions Architect can bring you from \$75,000 to \$159,000 per year.

Cisco Implementing Cisco Collaboration Cloud and Edge Solutions Sample Questions (Q68-Q73):

NEW QUESTION # 68

What happens to the encrypted signaling traffic of a collaboration device if you place it inside a firewall with private IP addresses and try to make a call over IP without any collaboration infrastructure?

- A. Encrypted IP traffic for collaboration devices always is trusted by the firewall.
- B. The signaling makes it back to the endpoint because the firewall is an application layer gateway and provides address translation.
- C. The signaling does not make it back to the endpoint because the firewall cannot inspect encrypted traffic.
- D. The signaling makes it back to the endpoint because the endpoint sent the private address to the external endpoint.

Answer: A

NEW QUESTION # 69

Refer to the exhibit. When a user tries to sign in to the Cisco Jabber client through Mobile and Remote Access, they receive this error message: "Cannot communicate with the server." The external DNS server is configured with the SRV records listed in the exhibit.

What is the cause of the issue?

Name	Type	Data
_cisco-uds	Service Location(SRV)	[0][0][8443] cucm-pub.cll-collab.internal.
_gc	Service Location(SRV)	[0][100][3268] WIN-SERVER01.cll-collab.internal.
_h323cs	Service Location(SRV)	[0][0][1720] expc-pub.cll-collab.internal.
_kerberos	Service Location(SRV)	[0][100][8] WIN-SERVER01.cll-collab.internal.
_kpasswd	Service Location(SRV)	[0][100][464] WIN-SERVER01.cll-collab.internal.
_ldap	Service Location(SRV)	[0][100][389] WIN-SERVER01.cll-collab.internal.
_sip	Service Location(SRV)	[0][0][5060] expc-pub.cll-collab.internal.
_sips	Service Location(SRV)	[0][0][5061] expc-pub.cll-collab.internal.
_xmpp-client	Service Location(SRV)	[0][0][5222] cms.cll-collab.internal.

- A. A Cisco CSF device must be configured in UC for the user and the _cisco-uds DNS record must be removed.
- B. The HTTP allow list is not allowing communication with the Instant Message and Presence server.
- C. The _sips DNS record must target expE-pub.cll-collab.internal and the _cisco-uds DNS record must be removed.
- D. The collab-edge DNS record must be added to the DNS server and the _cisco-uds DNS record must be removed.

Answer: D

NEW QUESTION # 70

Which 16-digit number is unique to a serial number and is used to enable the system?

- A. option key
- B. release key
- C. RMS license key
- D. Expressway series

Answer: B

NEW QUESTION # 71

Refer to the exhibit. An ISDN gateway is registered to Expressway-C with a prefix of 9 and/or it has a neighbor zone specified that routes calls starting with a 9.

	Expressway-E
Rule name	Enter Block ISDN call for example
Description	Enter Block everything (including nonregistered endpoints)
Priority	Enter 41
Protocol	<i>Any</i>
Source	
Request must be authenticated	<i>No</i>
Mode	<i>Alias pattern match</i>
Pattern type	<i>Regex</i>
Pattern string	Enter (9\d+) (.*) (@example.com)
Pattern behavior	<i>Replace</i>
Replace string	Enter do-not-route-this-call for example
On successful match	<i>Stop</i>
Target	<i>TraversalZone</i>
State	<i>Enabled</i>

Which value should be entered into the "Source" field to prevent toll fraud regardless at origin of the call?

- A. All
- B. Traversal Zone
- C. Any
- D. Neighbor Zone

Answer: C

Explanation:

The "Source" field specifies the source of the call that will be matched by the rule.

The goal is to prevent toll fraud regardless of the call's origin.

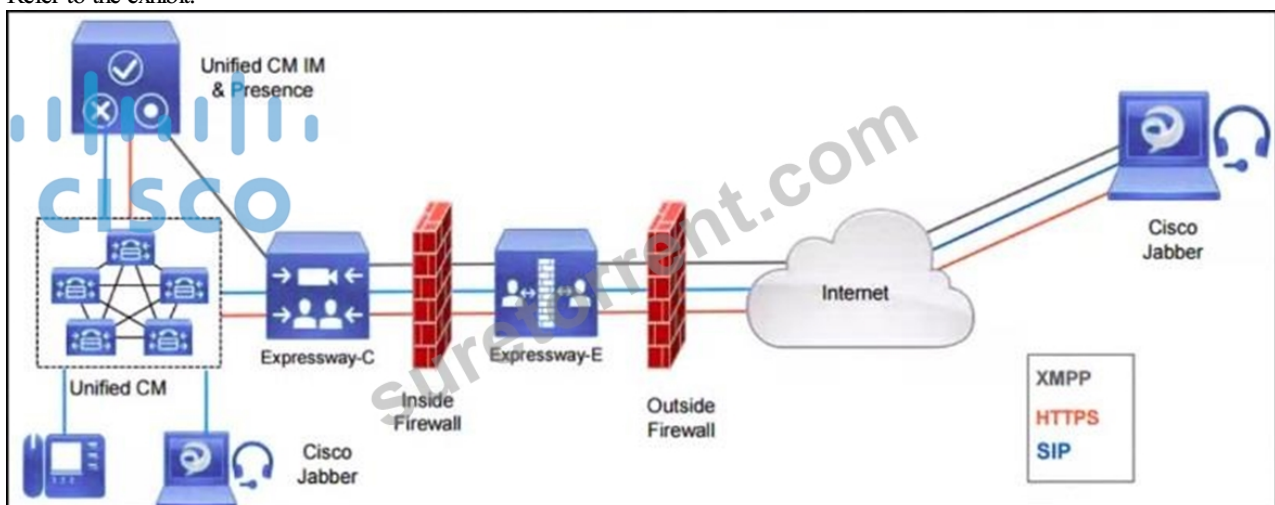

Therefore, we need to match calls from any source.

The option "Any" indicates that the rule will match calls from all sources.

By selecting "Any," we ensure that the rule will block toll fraud attempts regardless of the caller's location or network.

NEW QUESTION # 72

Refer to the exhibit.

Which inbound connection should an administrator configure on the outside firewall?

- A. SIP TCP 5061
- B. HTTPS (tunneled over SSH between C and E): TCP 2222
- C. Media: UDP 36000 to 36011

- Answer: C**
