With the arrival of experience economy and consumption, the experience marketing is well received in the market. If you are fully attracted by our 71301T training practice and plan to have a try before purchasing, we have free trials to help you understand our products better before you completely accept our 71301T study dumps. you must open the online engine of the study materials in a network environment for the first time. In addition, the 71301T Study Dumps don't occupy the memory of your computer. When the online engine is running, it just needs to occupy little running memory. At the same time, all operation of the online engine of the 71301T training practice is very flexible as long as the network is stable.

Avaya Aura Communication Applications Implement Sample Questions (Q74-Q79):

NEW QUESTION # 74

The WebRTC snap-in needs to be loaded on which of Avaya Breeze™ cluster?

- A. Context Store EDP Cluster
- B. General Purpose EDP Cluster
- **C. Core Platform EDP Cluster**
- D. Work Assignment EDP Cluster

Answer: C

Explanation:

A cluster profile is a pre-loaded template that contains cluster attributes. The Core Platform cluster profile: A closed cluster that supports up to 10 Avaya Breeze servers.

NEW QUESTION # 75

What is the process for establishing a command line session to the AES Management IP Address, and logging in with the default account and default password?

- A. Use PuTTY to SSH to > AES Management IP Addr > using port 222, then enter login=admin password=admin01.
- B. Use PuTTY to SSH to > AES Management IP Addr > using port 22, then enter login=cust password=custpw.
- C. Use PuTTY to Rlogin to > AES Management IP Addr > using port 21, then enter login=admin password=admin.
- **D. Use PuTTY to SSH to > AES Management IP Addr > using port 22, then enter login=craft password=crftpw.**

Answer: D

Explanation:

Use port 22, not port 21 or port 222.

Log in as craft and use the default password.

NEW QUESTION # 76

Which Avaya Breeze cluster type is required to install the Avaya Aura Presence Services snap-in?

- A. IM_Presence
- **B. Core Platform**
- C. General Purpose
- D. Presence Services

Answer: B

Explanation:

In the Avaya Breeze architecture, cluster types define the specific capabilities and resource allocations for the nodes within that group.

Core Platform Cluster: This is the standard, foundational cluster type required for most Avaya- provided snap-ins, including Presence Services. It provides the necessary middleware and security frameworks for the snap-in to interact with the rest of the Avaya Aura ecosystem.

General Purpose Cluster: Typically used for custom-developed snap-ins or lab environments where specific Avaya Aura feature integrations (like high-scale presence) aren't the primary focus.

NEW QUESTION # 77

Refer to the exhibit. Which type of a Configuration Profile in the Avaya Session Border Controller for Enterprise (ASBCE) allows to set Timers, URI Manipulation and Header Manipulation, and can be linked to a SIP Server Profile?

EMS Dashboard

Device Management

Backup/Restore

▶ System Parameters

▾ Configuration Profiles

AVAYA Domain DoS

Server Interworking

Media Forking

Routing

Topology Hiding

Signaling

Manipulation

URI Groups

SNMP Traps

- A. Topology Hiding
- B. Routing
- C. Signaling Manipulation
- D. Server Interworking

Answer: D

Explanation:

In the Avaya Session Border Controller for Enterprise (ASBCE), the Server Interworking Profile is the primary configuration object used to manage the "behavioral" aspects of SIP signaling between the SBC and a specific SIP entity (such as a Session Manager or a third-party SIP trunk provider).

Timers: This profile allows you to define custom values for various SIP timers (e.g., re-invite timeouts, T1/T2 timers) to ensure compatibility with different vendor requirements.

URI Manipulation: It provides the capability to modify the request URIs, which is often required to normalize dialing patterns or comply with specific carrier formatting.

Header Manipulation: It allows for adding, modifying, or removing SIP headers (e.g., P-Asserted- Identity, Diversion headers) to ensure that the internal Avaya network and the external network can communicate correctly.

Linking: You link this profile to a SIP Server Profile within the SBC configuration. Once linked, the SBC applies these specific interworking rules whenever it communicates with that specific server, ensuring that the signaling is tailored to the needs of that connection.

NEW QUESTION # 78

Which two statements about the Avaya Session Border Controller for Enterprise (ASBCE) certificate management are true? (Choose two.)

- A. It supports both the Root and Intermediate Certificate Authority (CA) certificates.
- B. It allows using a default server certificate for up to one year after the installation.
- C. It requires a single server identity certificate for each deployed server.
- D. It provides an in-built Certificate Signing Request (CSR) generation utility.
- E. It only supports .crt certificate file types.

Answer: A,D

Explanation:

Managing certificates in the ASBCE environment is a critical task for establishing secure TLS connections with endpoints, providers, and other Aura elements.

Support for CA Chains (A): The ASBCE allows you to import and manage a full chain of trust.

This includes the ability to import the Root CA certificate and any necessary Intermediate CA certificates, which is standard practice for modern PKI implementations to ensure complete validation of the server identity.

CSR Utility (D): The ASBCE web interface includes a built-in utility under Settings > Certificates > Certificate Management that generates the necessary public/private key pairs and formats the Certificate Signing Request (CSR). This is the standard mechanism for requesting identity certificates from your corporate or third-party CA.

NEW QUESTION # 79

.....

The Channel Partner Program Avaya Aura Communication Applications Implement 71301T certification enables you to move ahead in your career later. With the Avaya 71301T certification exam you can climb up the corporate ladder faster and achieve your professional career objectives.
