Are you still hesitating about which kind of 1z0-1075-25 exam torrent should you choose to prepare for the exam in order to get the related certification at ease? Our 1z0-1075-25 Exam Torrent can help you get the related certification at ease and 1z0-1075-25 Practice Materials are compiled by our company for more than ten years. I am glad to introduce our study materials to you. Our company has already become a famous brand all over the world in this field since we have engaged in compiling the 1z0-1075-25 practice materials for more than ten years and have got a fruitful outcome. You are welcome to download it for free in this website before making your final decision.

We not only do a good job before you buy our 1z0-1075-25 test guides, we also do a good job of after-sales service. Because we are committed to customers who decide to choose our 1z0-1075-25 study tool. We put the care of our customers in an important position. All customers can feel comfortable when they choose to buy our 1z0-1075-25 study tool. We have specialized software to prevent the leakage of your information and we will never sell your personal information because trust is the foundation of cooperation between both parties. A good reputation is the driving force for our continued development. Our company has absolute credit, so you can rest assured to buy our 1z0-1075-25 test guides.

Top 1z0-1075-25 Positive Feedback 100% Pass | Efficient 1z0-1075-25 Free Sample: Oracle Manufacturing Cloud 2025 Implementation Professional

Nowadays, the development of technology is quickly. Also, our 1z0-1075-25 exam guide will keep advancing. A lot of reforms have applied to the content and formats of our 1z0-1075-25 learning guide according to our professional experts constantly efforts. We just hope that you will have a better experience when you study on our 1z0-1075-25 Actual Exam. Act from now if you are still hesitating, our 1z0-1075-25 study materials will enable you embrace a bright future.

Oracle Manufacturing Cloud 2025 Implementation Professional Sample Questions (Q38-Q43):

NEW QUESTION # 38

Which three actions can a supervisor perform to annul or correct mistakes in a completed work order, committed by a user while entering work order details?

- A. Reverse from Scrap to Ready.
- B. Reverse at an operation.
- C. Correct the Product entered at work order.
- D. Reverse the product at the last operation.

- E. Reverse a Closed order to Open.

Answer: A,B,D

Explanation:

If a mistake is made in a completed work order, supervisors have the ability to perform certain corrective actions to reverse transactions or correct errors:

- * Reverse from Scrap to Ready (C) : This action allows the supervisor to reverse a product that was incorrectly marked as scrap back to a ready state, making it available for further operations.
- * Reverse at an operation (D) : If the mistake occurred during a specific operation, the supervisor can reverse the transaction at that operation and correct the mistake.
- * Reverse the product at the last operation (E) : The supervisor can reverse a transaction at the last operation to make corrections to the final product before closing the work order.

Incorrect options:

- * A (Reverse a Closed order to Open) : Once a work order is closed, it cannot be reopened. Reversing transactions must happen before the order is officially closed.
- * B (Correct the Product entered at work order) : The product specified in a work order cannot be changed once the order has been processed and completed.

Oracle Cloud documentation on Work Order Reversal Transactions explains the capabilities for reversing scrap, operation, and product entries to correct errors in work orders.

NEW QUESTION # 39

In which two places can you create and edit user-defined work order statuses?

- A. Functional Setup Manager > Setup: Manufacturing and Supply Chain Materials Management
- B. Work Execution work area tasks
- C. Scheduled Processes
- D. Work Definition work area tasks

Answer: A,B

Explanation:

User-defined work order statuses can be created and edited in the following areas of Oracle Manufacturing Cloud:

- * Functional Setup Manager : This is where the configuration of user-defined work order statuses is performed under the " Manufacturing and Supply Chain Materials Management " setup. Users can define new statuses and configure their behavior.
- * Work Execution work area tasks : Users can also manage work order statuses directly in the Work Execution area, which is part of the day-to-day management of production orders.

Incorrect options:

- * Scheduled Processes (A) and Work Definition work area tasks (B) are not areas where work order statuses are defined or edited.

Oracle Cloud 's Functional Setup Manager and Work Execution work area documentation outline how user- defined statuses are configured and maintained.

NEW QUESTION # 40

Production operations need operators to execute the right steps to produce quality products, so want to use " View Document Items on a Dispatch List. " Which statement is NOT true?

- A. You will always see the active revision of the attachment from currently effective revision of the document from Master Organization.
- B. You can view the document item attachment in the dispatch list and on the Manage Supplier Operations page by using the attachment icon.
- C. You cannot view the document item attachment on the Manage Supplier Operations page.
- D. You can add attachments to the document item and invoke the engineering change order to release the latest revision of the document item and attachment.

Answer: A

Explanation:

When using the " View Document Items on a Dispatch List " functionality, production operators can view and access necessary

document attachments to ensure correct steps in the manufacturing process. The statement that is not true is:

* Statement B is incorrect because you do not always see the active revision of the attachment from the currently effective revision in the Master Organization. The revision displayed in the dispatch list may depend on the specific version that was assigned to the work order or operation at the time of creation, not necessarily the most current revision in the Master Organization.

Correct statements:

* Statement A : Document attachments cannot be viewed on the Manage Supplier Operations page.

* Statement C : Attachments can be added to document items, and updates can be managed through engineering change orders.

* Statement D : Document item attachments are viewable both in the dispatch list and on the Manage Supplier Operations page via the attachment icon.

Oracle Manufacturing Cloud's " Dispatch List " functionality documentation outlines how document item attachments are handled and displayed.

NEW QUESTION # 41

An employee is responsible for dealing with different manufacturing practices and processes, machines, tools, and equipment that turn raw material into a product.

Which seeded job role must you assign to this employee?

- A. Manufacturing Engineer
- B. Production Operator
- C. Manufacturing Supervisor
- D. Production Supervisor
- E. Production Engineer

Answer: A

Explanation:

In Oracle Manufacturing Cloud, the Manufacturing Engineer role is responsible for dealing with various manufacturing practices, processes, machines, tools, and equipment that transform raw materials into finished products. This role focuses on defining and managing production processes, resources, and operations in manufacturing plants.

* Manufacturing Engineer : This role involves creating and maintaining manufacturing processes, production resources, and work instructions. It ensures that products are manufactured efficiently and in compliance with quality standards.

Oracle Cloud documentation for " Manufacturing Engineer " describes this role as the primary one for handling manufacturing setups, process definitions, and equipment management in the system.

NEW QUESTION # 42

Your customer runs production 24 x 7 x 365 and wants to track Overall Equipment Effectiveness (OEE) online.

Which key setup can they use to achieve this?

- A. Enable IoT Production Monitoring and turn on " Enable synchronization to IoT Production
- B. Enable IoT Asset Monitoring and turn on " Enable synchronization to IoT Asset Monitoring " in Resources.
- C. Enable IoT Production Monitoring and turn on " Enable synchronization to IoT Production Monitoring " In Inventory Organization.
- D. Enable IoT Asset Monitoring and turn on " Enable synchronization to IoT Asset Monitoring " In Plant Parameters.
- E. Enable IoT Fleet Monitoring and enable synchronization to IoT Production Monitoring in Plant Parameters.

Answer: C

Explanation:

To track Overall Equipment Effectiveness (OEE) in real-time, Oracle Manufacturing Cloud can integrate with IoT solutions. The correct setup involves:

* Enabling IoT Production Monitoring and turning on synchronization to IoT Production Monitoring in the Inventory Organization . This allows real-time data from the shop floor to be captured, processed, and used to monitor equipment effectiveness, performance, and availability.

Incorrect options:

* IoT Fleet Monitoring (A) and IoT Asset Monitoring (B, D) focus on tracking assets and fleets, which are more relevant for logistics or asset management, not production monitoring for OEE.

Oracle Cloud documentation on IoT Production Monitoring details how to set up the system to track OEE and integrate production data with IoT capabilities.

NEW QUESTION # 43

.....

As practice makes perfect, we offer three different formats of Oracle 1z0-1075-25 exam study material to practice and prepare for the Oracle Manufacturing Cloud 2025 Implementation Professional (1z0-1075-25) exam. Our Oracle 1z0-1075-25 practice test simulates the real 1z0-1075-25 exam and helps applicants kill exam anxiety. These 1z0-1075-25 practice exams provide candidates with an accurate assessment of their readiness for the 1z0-1075-25 test.
