최신 ITIL 4 Managing Professional ITIL-4-Transition 무료 샘플 문제 (Q67-Q72):

질문 # 67

Which guiding principle would help the MOST in breaking down silos and eliminating conflicting goals?

- A. Progress iteratively with feedback
- **B. Collaborate and promote visibility**
- C. Start where you are
- D. Optimize and automate

정답: B

설명:

Collaborate and promote visibility is the guiding principle that would help the most in breaking down silos and eliminating conflicting goals. This principle encourages working together across boundaries and sharing information and knowledge with relevant stakeholders. By doing so, the organization can achieve a common understanding of the vision, objectives, and progress of the service value system. This also helps to avoid duplication of work, reduce errors, and improve efficiency and effectiveness. Collaborate and promote visibility also fosters a culture of trust, openness, and learning, which are essential for continual improvement and innovation. References:

* 6 reasons why ITIL 4's guiding principle of collaborate and promote visibility is important, section "Collaboration and value co-creation"

질문 # 68

Which high velocity IT objective considers an organization's ability to continue providing business services when disruptive events affect its digital products?

- A. Valuable investments
- B. Fast development
- **C. Resilient operations**
- D. Assured conformance

정답: C

질문 # 69

Which is the MOST LIKELY way of resolving major incidents?

- A. Users establishing a resolution using self-help

- B. The service desk identifying the cause and a resolution
- C. A support team following detailed procedures for investigating the incident
- D. A temporary team working together to identify a resolution

정답: D

설명:

Comprehensive Explanation:

Major incidents typically require:

- * Urgent coordinated effort
- * Involvement of multiple teams or specialists
- * Focused collaboration
- * Rapid restoration of service

ITIL describes forming a temporary major incident team as the standard response.

Options A and B are too simple; option D is procedural but not sufficient for major incidents.

질문 # 70

Which high velocity IT objective considers an organization's ability to continue providing business services when disruptive events affect its digital products?

- A. Valuable investments
- B. Fast development
- C. Resilient operations
- D. Assured conformance

정답: C

설명:

Resilient operations is the high velocity IT objective that considers an organization's ability to continue providing business services when disruptive events affect its digital products. Resilient operations ensure the availability, reliability, and performance of the digital products and services, as well as the ability to recover quickly from failures and incidents. Resilient operations also involve proactive practices such as technical debt management, chaos engineering, and site reliability engineering, which aim to improve the quality and resilience of the digital solutions.
