Useful Network-and-Security-Foundation Dumps - Valid Network-and-Security-Foundation Test Answers

Our Network-and-Security-Foundation exam materials have plenty of advantages. For example, in order to meet the needs of different groups of people, we provide customers with three different versions of Network-and-Security-Foundation actual exam, which contain the same questions and answers. They are the versions of the PDF, Software and APP online. You can choose the one which is your best suit of our Network-and-Security-Foundation Study Materials according to your study habits.

PDFBraindumps offers up to 1 year of free Network-and-Security-Foundation (Network-and-Security-Foundation) exam questions updates. With our actual questions, you can prepare for the Network-and-Security-Foundation exam without missing out on any point you need to know. These exam questions provide you with all the necessary knowledge that you will need to clear the Network-and-Security-Foundation (Network-and-Security-Foundation) exam with a high passing score.

Valid Network-and-Security-Foundation Test Answers - Network-and-Security-Foundation Training Tools

Are you planning to attempt the Network-and-Security-Foundation (Network-and-Security-Foundation) exam of the Network-

and-Security-Foundation certification? The first hurdle you face while preparing for the Network-and-Security-Foundation (Network-and-Security-Foundation) exam is not finding the trusted brand of accurate and updated Network-and-Security-Foundation exam questions. If you don't want to face this issue then you are at the trusted PDFBraindumps is offering actual and latest Network-and-Security-Foundation (Network-and-Security-Foundation) Exam Questions that ensure your success in the Network-and-Security-Foundation (Network-and-Security-Foundation) certification exam on your maiden attempt.

WGU Network-and-Security-Foundation Sample Questions (Q12-Q17):

NEW QUESTION # 12
After recently experiencing a security breach, a company is working on improving its database security. As a part of its security governance strategies, the company is developing a database security checklist.
Which component is important to include in this checklist?

- A. Developing algorithms for secure access to data
- B. Disclosing any instances of breaches of personal data
- C. Outsourcing data management to third-party vendors
- D. Restricting physical access to locations where data is housed

Answer: D

Explanation:
Restricting physical access to data storage facilities is a critical part of database security. Even with strong cybersecurity measures, unauthorized physical access to servers can lead to breaches. Security strategies include biometric authentication, surveillance cameras, and restricted entry zones.
* Disclosing breaches is required by compliance laws but does not protect data proactively.
* Developing algorithms improves security but is not a fundamental checklist item.
* Outsourcing data management can introduce security risks if not properly controlled.

NEW QUESTION # 13
What is the layer of the OSI model that creates, maintains, and disconnects process communications over the network?

- A. Physical
- B. Transport
- C. Session
- D. Data link

Answer: C

Explanation:
The Session layer (Layer 5 of the OSI model) is responsible for establishing, maintaining, and terminating communication sessions between network applications. It ensures that data exchanges remain synchronized and structured.
* Data link layer handles error detection and frame transmission.
* Physical layer deals with hardware-level transmission.
* Transport layer ensures reliable data delivery but does not manage sessions.

NEW QUESTION # 14
A person is troubleshooting a network issue and needs to see a list of all active network connections.
Which Linux command should be used?

- A. dig
- B. ifconfig
- C. netstat
- D. nslookup

Answer: C

Explanation:
The netstat command in Linux displays active network connections, listening ports, and network statistics. It is useful for diagnosing network issues and identifying open connections.

* nslookupis for DNS queries.
* digprovides DNS information, not network connection status.
* ifconfigshows network interface details but does not list active connections.

NEW QUESTION # 15
Access to a company's information system requires a user to be within a valid geographic location and to enter a valid username and password.
Which concept does this scenario demonstrate?

- A. Single sign-on
- B. User-based accounting
- C. Multifactor authentication
- D. Certificate verification

Answer: C

Explanation:
Multifactor authentication (MFA)requires users to verify their identity usingmultiple factors, such as something they know (password), something they have (a token or phone), or somewhere they are (geolocation-based access control). Requiring both location verification andpassword authentication demonstrates MFA.
* Certificate verificationchecks digital certificates for security but does not use multiple authentication factors.
* User-based accountinglogs user activities but does not verify identity.
* Single sign-on (SSO)allows access to multiple systems with one login but is not necessarily MFA.

NEW QUESTION # 16
An attacker uses a poisoned domain name on the domain name server to navigate users to the attacker's site.
Which malicious attack strategy is represented in the scenario?

- A. Brute-force attack
- B. Session hijacking
- C. Pharming
- D. IP address spoofing

Answer: C

Explanation:
Pharmingis an attack that manipulates theDomain Name System (DNS)to redirect users to fraudulent websites without their knowledge. Attackers poison DNS records or compromise routers to reroute traffic to malicious sites designed to steal information.
* Brute-force attackinvolves password guessing, not domain manipulation.
* IP address spoofingdisguises a device's identity but does not alter DNS records.
* Session hijackingtakes over active user sessions but does not redirect websites.

NEW QUESTION # 17
......

No matter how good the product is users will encounter some difficult problems in the process of use. Our Network-and-Security-Foundation real exam materials are not exceptional also, in order to enjoy the best product experience, as long as the user is in use process found any problem, can timely feedback to us, for the first time you check our Network-and-Security-Foundation Exam Question performance, professional maintenance staff to help users solve problems. Our Network-and-Security-Foundation learning reference files have a high efficient product maintenance team, and they can send the Network-and-Security-Foundation exam questions to you in a few minutes.

Valid Network-and-Security-Foundation Test Answers: https://www.pdfbraindumps.com/Network-and-Security-Foundation_valid-braindumps.html

WGU Useful Network-and-Security-Foundation Dumps Thus people have a stronger sense of time and don't have enough time in participating in another exam, Capable group, Credible company, Luckily, our company masters the core technology of developing the Valid Network-and-Security-Foundation Test Answers - Network-and-Security-Foundation study materials, You can learn

from your Network-and-Security-Foundation (Network-and-Security-Foundation) practice test mistakes and overcome them before the actual Network-and-Security-Foundation (Network-and-Security-Foundation) exam, It is very difficult for candidates to own a certification of Network-and-Security-Foundation which had several exams to pass.

Basic knowledge of simple statistical analysis techniques, How Network-and-Security-Foundation Question Explanations will this happen, Thus people have a stronger sense of time and don't have enough time in participating in another exam.

Capable group, Credible company, Luckily, our Network-and-Security-Foundation company masters the core technology of developing the Network-and-Security-Foundation study materials, Youcan learn from your Network-and-Security-Foundation (Network-and-Security-Foundation) practice test mistakes and overcome them before the actual Network-and-Security-Foundation (Network-and-Security-Foundation) exam.
