NEW QUESTION # 81

You are developing a Power Platform solution. You plan to add three buttons to a form. The buttons have the following requirements:

You need to complete each button's action.

Which commands should you use? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

Explanation

Box 1: Now() only.

The Now function returns the current date and time as a date/time value.

Box 2: Switch() or IF()

If and Switch functions in Power Apps determines whether any condition in a set is true (If) or the result of a formula matches any value in a set (Switch) and then returns a result or executes an action.

Box 3: isMatch(TextInput1.Text,"emergency",Contains & IgnoreCase)

Example: IsMatch(TextInput1.Text, "hello", Contains & IgnoreCase)

Tests whether the user's input contains the word "hello" (case insensitive).

NEW QUESTION # 82

You are creating a canvas app for users to interact with contact data in Microsoft Dataverse.

When users display contact data in the app, the following requirements must be met:

* By default, all contact data must be displayed, unless data is entered into a text input control; if so, then data must be filtered based on the last name of the contact

* A new column must be added when retrieving the data source. The column must combine the Salutation and Full Name columns into a new column named Full Salutation.

* All data must be sorted in alphabetical order based on the surname of the contact. You need to finalize the Microsoft Power Fx formula.

How should you complete the code segment? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

NEW QUESTION # 83

You are modifying a model-driven app for a bicycle company. The app modifications must meet the following requirements:

* The order form must include a column that calculates payments based on how many years the customer wants to finance a bicycle.

* A pop-up box must remind the employee to validate the information entered before saving.

You must use out-of-the-box features before customizing the application.

What should you do?

To answer, drag the appropriate actions to the correct requirements. Each action may be used once, more than once, or not at all.

You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct answer is worth one point.
