valid EAEP2201 Enterprise Administration Professional 2201 Practice Course

Please Get the Link of the Exam to proceed further - <https://www.educationry.com/?product=pass-eaep2201-enterprise-administration-professional-2201-certification-exam-educationry>

Most effective these exam dumps are routinely updated with usually precise and most current material by profoundly talented authorities, that have obtained authentication in their absolute very first attempt. Whenever you get your hands around the most current exam dumps preparation supply, then, at that point, you don't need to pressure over alluding to distinctive sources. These correct exam dumps pdf cover just about every single prospectus of this exam. You must merely concentrate on these exam questions cautiously and comprehend them well.

Using the assistance with the exam dumps you can quickly release your stress more than your exam readiness due to the deficiency. Prepare on time and get genuine exam dumps for efficient preparation. Get the additional weight due to the fact of it, you can get the itemized this exam questions connected along with your affirmation. These precise exams supply you using a belief of how to plan for the exam successfully. The genuine exams intended for operating on the expert abilities of the contender for the exam certification dumps who want to be able to cope with just about every one of the concerns impeccably.

Get prepared by means of the updated exam, you find out using the most current innovations, and any time you program by the most recent exam dumps 2022, you comprehend its significance and also the advantages in the executions. The part of the veritable exam dumps is coordinated appropriately by the endeavors of our topic matter experts. Carve out opportunities to perform it appropriately and afterward, you receive the greatest outcomes in your exam conclusion. Make your preparation in advance by taking the exam dumps.

Choose the major excellent exam dumps for the preparation of the exam which are checked by the exam dumps. The greatest exam questions and answers are finished by the precise exam dumps that happen to be in your schedule. Get ready with a compelling exam dumps pdf then you definitely will truly like to answer 90% from the exam certification dumps ideal. The fundamentals of the certified exam are investigated by professionals, so our refreshed exam questions will construct your capacity of inventiveness.

最好的最新EAEP2201考題，精品考試資料幫助妳輕鬆通過EAEP2201考試

NewDumps 提供下載的 Esri 的 EAEP2201 證照考試的問題範例，使你購買無風險的過程，這是一個使用版的練習題，讓你看得到的問題和答案的品質，以及在你決定購買之前的價值，相信 Esri 的 EAEP2201 證照考試的樣品足以定性，成為眾多考生滿意的產品。該考題還包括PDF格式和模擬考試測試版本兩種，你可以根據自己的情況去選擇適合自己的。

最新的 Technical Certification EAEP2201 免費考試真題 (Q40-Q45):

問題 #40

An ArcGIS administrator executes a script to silently upgrade all components of ArcGIS Enterprise version

10.6.1 to version 10.9.1. The upgrade completes without logging any errors.

When the administrator logs in, the following message appears: "Members in your organization were assigned the Standard (Temporary) or Lite (Temporary) user types. No users can log in to the Portal." What is causing these issues?

- A. The Portal for ArcGIS upgrade process requires a restart of the Portal for ArcGIS service when adding additional user types.
- B. The portal has no internet access, and the Software Authorization Wizard could not connect to Esri to validate the new license file.
- **C. The organization has level 2 members and the new license file used for the upgrade now has more than one compatible user type.**

答案： C

解題說明：

During the upgrade from ArcGIS Enterprise 10.6.1 to 10.9.1, user type licensing is enforced. If the new license file includes more than one compatible user type (e.g., Creator and GIS Professional), existing members without a specified user type may be assigned temporary user types like "Standard (Temporary)" or

"Lite (Temporary)." These temporary assignments prevent users from logging in until valid user types are manually assigned.

This issue is not related to internet access (Option B) or the need to restart services (Option C).

問題 #41

Portal for ArcGIS is running in a Windows environment.

Which type of account is recommended to run the Portal for ArcGIS service?

- A. Windows Active Directory domain account
- B. Local machine administrator account
- **C. Group-managed service account**
- D. Built-in system account

答案： C

解題說明：

Esri recommends using a Group Managed Service Account (gMSA) to run Portal for ArcGIS services in Windows environments. gMSAs automatically manage passwords, align with Active Directory policies, and are ideal for enterprise-scale deployments.

From Esri documentation:

"Using a group managed service account (gMSA) to run Portal for ArcGIS services improves security by allowing Windows to manage the password, reducing administrative overhead while meeting enterprise security requirements."

* Option B (regular AD account) is acceptable but requires manual password updates.

* Option C and D are not secure or scalable for enterprise environments.

Reference: ArcGIS Enterprise - Service Account Recommendations for Windows Environments

問題 #42

An organization wants to use the standard feature analysis tools available in ArcGIS Enterprise to create hosted feature layers for planning and design.

Which data store is required for this work?

- A. File-based geodatabase
- **B. Relational data store**
- C. Tile cache data store
- D. Spatiotemporal big data store

答案： B

解題說明：

The standard feature analysis tools in ArcGIS Enterprise (e.g., buffer, overlay, aggregate points) require hosted feature layers, which depend on the relational data store (a component of ArcGIS Data Store). The relational data store is the default location for hosting feature layers.

From ArcGIS Enterprise documentation:

"To use the standard spatial analysis tools and create hosted feature layers, the ArcGIS Data Store (relational) must be configured and set as the default hosting location."

* Option A (spatiotemporal big data store) is used for real-time and big data feeds, not standard analysis.

* Option C supports cached tiles, not feature layers.

Reference: ArcGIS Enterprise - Configuring the Relational Data Store for Hosting Feature Layers

問題 #43

A GIS administrator is analyzing the usage statistics of ArcGIS Enterprise. The administrator needs to pull tabular statistics on various groups and users about the type of content that they produce and consume.

Which action should the administrator perform?

- A. Use ArcGIS Monitor to capture desired information over a period of time in a report.
- **B. Run usage reports in Portal for ArcGIS to determine the effect on the organization.**
- C. Open ArcGIS Server statistics to create a report for commonly used items.

答案: B

解題說明:

Portal for ArcGIS provides built-in usage reports that allow administrators to monitor how members are using, sharing, and contributing resources. These reports offer insights into content creation, usage patterns, and group activities. Administrators can generate and export these reports in tabular formats for further analysis.

ArcGIS Server statistics focus on service-level metrics and do not provide detailed user or group content statistics. ArcGIS Monitor captures system performance metrics but is not designed for detailed content usage analysis by users or groups.

問題 #44

An organization is implementing a disaster recovery strategy for an ArcGIS Enterprise deployment for custom cached basemaps.

Which action should the organization perform?

- **A. Make backup copies of all cache folder directories**
- B. Use the ArcGIS Data Store backup utility
- C. Run the webgisdr disaster recovery utility tool

答案: A

解題說明:

Custom cached basemaps are stored as tile cache files on disk and are not included in backups created by the webgisdr tool or the ArcGIS Data Store backup utility. Therefore, to ensure these basemaps can be restored in the event of a disaster, it's essential to manually back up the cache directories where these tiles are stored.

This involves copying the cache folders to a secure backup location and ensuring they are kept in sync with any updates made to the basemaps.

The webgisdr tool (Option A) is used for backing up and restoring the ArcGIS Enterprise configuration and content but does not include custom tile caches. The ArcGIS Data Store backup utility (Option C) is used for backing up hosted feature layers and other data managed by the ArcGIS Data Store, not custom cached basemaps.
