

# Test 2V0-16.25 Dump, Exam 2V0-16.25 Lab Questions

BONUS!!! Download part of RealValidExam 2V0-16.25 dumps for free: [https://drive.google.com/open?id=10\\_D-PyhTtPj688URvS-PCq9yMDNTxfCh](https://drive.google.com/open?id=10_D-PyhTtPj688URvS-PCq9yMDNTxfCh)

By using our 2V0-16.25 study engine, your abilities will improve and your mindset will change. Who does not want to be a positive person? This is all supported by strength! In any case, a lot of people have improved their strength through 2V0-16.25 Exam simulating. They now have the opportunity they want. Whether to join the camp of the successful ones, purchase 2V0-16.25 learning braindumps, you decide for yourself!

Customizable practice tests comprehensively and accurately represent the actual Professional VMware 2V0-16.25 Certification Exam pattern. Many students have studied from product and passed the VMware vSphere Foundation 9.0 Administrator (2V0-16.25) test with ease. Our customers can receive questions updates for up to 1 year after purchasing the product. These free updates of questions will help them to prepare according to the latest syllabus.

## Things You Need to Know About the VMware 2V0-16.25 Exam Preparation

Our VMware vSphere Foundation 9.0 Administrator (2V0-16.25) PDF format is user-friendly and accessible on any smart device, allowing applicants to study from anywhere at any time. We have included actual and updated VMware 2V0-16.25 questions in this VMware vSphere Foundation 9.0 Administrator (2V0-16.25) Dumps PDF file. Our VMware vSphere Foundation 9.0 Administrator (2V0-16.25) exam dumps PDF format is designed to help individuals acquire the knowledge necessary to succeed in the test.

## VMware vSphere Foundation 9.0 Administrator Sample Questions (Q44-Q49):

### NEW QUESTION # 44

An administrator is tasked with adding a 96-core VMware ESX host to a VMware vSphere Foundation (VVF) 9.0 vCenter cluster. The vCenter has been previously licensed for 1024 cores and the existing hosts equal 960 cores. The administrator adds the host to the vCenter cluster and places the cluster back into production. What issue will occur if the administrator performs no additional actions to this vCenter?

- A. The new ESX host will operate in evaluation mode until more capacity is added to the license to license the host. If the host is not licensed when the evaluation period expires, it is disconnected from the vCenter instance.
- B. The new ESX host has been limited to 64 cores until more capacity is added to the license to license the host. Once 32 cores or greater is added to the license, the full 96 cores of the new host will be useable.
- C. The new ESX host will operate in evaluation mode until more capacity is added to the license to license the host. If the host is not licensed when the evaluation period expires, the host will be limited to 64 cores until 32 cores or greater is added to the license.
- D. No issue will occur. The new host was added to the vCenter cluster successfully and will operate for the valid period of the applied license.

**Answer: A**

Explanation:

The vSphere Foundation 9.0 licensing model uses per-core licensing.

- \* Current license covers 1024 cores.
- \* Existing hosts = 960 cores, leaving 64 cores licensed.
- \* Adding a 96-core host # 32 cores exceed the license.

Result:

- \* The new host runs in evaluation mode.
- \* If not licensed after the evaluation period, the host is disconnected from vCenter.

Other options:

- \* A. Limited to 64 cores # Not how VMware licensing enforcement works.
- \* B. Limited to 64 cores until license upgrade # Incorrect; VMware does not partially disable cores.
- \* D. No issue # Incorrect; licensing compliance will cause issues.

References:

VMware Licensing Guide -Per-Core Licensing Enforcement

VMware Docs: vSphere License Enforcement

#### NEW QUESTION # 45

In VMware Cloud Foundation (VCF) Operations for Logs, which node type is responsible for coordinating the overall functioning of the cluster?

- A. Primary Node
- B. Data Node
- C. Worker Node
- D. Replica Node

**Answer: A**

Explanation:

In VCF Operations for Logs (formerly vRealize Log Insight):

- \* The Primary Node is responsible for coordinating the overall functioning of the cluster, including configuration management and directing traffic.
- \* Worker/Data Nodes handle log ingestion and query execution.
- \* Replica Node provides HA for the Primary Node but does not act as the main coordinator.

References:

VMware Cloud Foundation 9.0 - VCF Operations for Logs Node Roles

VMware Docs: Log Insight Cluster Architecture

#### NEW QUESTION # 46

An administrator is tasked to configure VMware Cloud Foundation (VCF) Operations alerts to notify only relevant stakeholders when alerts trigger.

Which configuration step will satisfy the requirement?

- A. Configure notification to specific alert recipients.
- B. Configure notification for only critical alerts.
- C. Configure notification to use generic contact information.
- D. Configure notification to write a file to an output folder.

**Answer: A**

Explanation:

In VCF Operations, alerts can be configured with notification settings. To ensure only relevant stakeholders receive alerts:

- \* You assign specific recipients to notifications.
- \* This avoids alert fatigue and ensures teams only see alerts they are responsible for.

Other options:

- \* A. Write to file# Not for stakeholder notifications.
- \* B. Only critical alerts# Reduces volume, but still not targeted to relevant recipients.
- \* D. Generic contact info# Sends to broad groups, not selective.

#### NEW QUESTION # 47

An administrator creates a cluster by joining a Medium sized VMware Cloud Foundation (VCF) Operations for Logs node to an existing Medium sized single-node deployment.

The secondary node of the cluster fails, degrading the functionality of VCF Operations for Logs.

What action should the administrator take to create a healthy active cluster?

- A. Scale up the VCF Operations for Logs primary and secondary node to size Extra Large.
- B. Scale up the VCF Operations for Logs primary and secondary node to size Large.
- C. Rebuild the VCF Operations for Logs cluster secondary node and add an additional node to the cluster.
- **D. Rebuild the VCF Operations for Logs cluster secondary node and place the cluster back into operation.**

**Answer: D**

Explanation:

In VMware Cloud Foundation (VCF) Operations for Logs, clusters require a minimum of three healthy nodes to function in a fully active and resilient state. When a cluster is deployed with only two nodes (primary + one secondary), the environment does not meet the minimum recommended requirement. If the secondary node fails, the cluster becomes degraded and functionality is reduced.

The correct remediation is:

- \* Rebuild the failed secondary nodes so that the cluster can return to a healthy state.
- \* After rebuilding, the node must be rejoined to the primary using the Management # Cluster workflow (secure token, IP/hostname of primary, etc.).

Why not the other options?

- \* A. Scale up to Extra Large## Scaling up affects resource capacity (vCPU, RAM, disk) but does not solve the problem of missing nodes.
- \* B. Scale up to Large## Same reason as above, scaling up does not restore HA.
- \* D. Rebuild the secondary and add an additional node## While adding more nodes is a best practice (since HA clusters require three nodes), the minimum action required to restore a healthy active cluster is to rebuild the failed node. Adding more nodes is optional for increased resiliency.

Therefore, the immediate and verified answer is to rebuild the failed secondary node.

VMware Cloud Foundation 9.0.1 Documentation - High Availability VCF Operations for Logs requires minimum of three nodes (1 primary, 2 workers)

#### NEW QUESTION # 48

The security team requests the ability to log into VMware vCenter and review datacenter, cluster and network configurations. The following details are provided:

- \* The security team is not authorized to make any changes to the environment.
- \* Each user must login with unique credentials.

What steps should the administrator perform to grant access to the security team?

- A. Create a security user, assign the user the Read-Only role, share the credentials with the security team.
- B. Share the password for 'administrator@vsphere.local' with the security team.
- **C. Create a group for the security team, add the users to the group, and assign the group the Read-Only role.**

- D. Create a group for the security team, add the users to the group, and assign the group the Network Administrator role.

**Answer: C**

Explanation:

The security team requires visibility into vCenter configurations but must not make changes.

\* Best practice is to create an Active Directory or vCenter group, add the security users, and assign them the Read-Only role at the datacenter/cluster/network level.

\* This ensures each user logs in with unique credentials, maintaining accountability.

Why others are incorrect:

\* A. Share administrator@vsphere.local password# Violates security best practices.

\* B. Create a single user and share credentials# Still insecure, lacks unique audit trails.

\* C. Assign Network Administrator role# Grants configuration permissions, not allowed.

## NEW QUESTION # 49

.....

We know that you have strong desire for success in your career, now, we recommend you to get the 2V0-16.25 exam certification. RealValidExam will help you and provide you with the high quality VMware training material. 2V0-16.25 questions are selected and edited from the original questions pool and verified by the professional experts. Besides, the updated of 2V0-16.25 Pdf Torrent is checked every day by our experts and the new information can be added into the 2V0-16.25 exam dumps immediately.

**Exam 2V0-16.25 Lab Questions:** <https://www.realvalidexam.com/2V0-16.25-real-exam-dumps.html>

VMware Test 2V0-16.25 Dump Furthermore, our company respect the privacy of the customers, with our product, there is no need for you to worry about the problem. Also before you buy we provide you the 2V0-16.25 practice test free, many people want to see the dumps if it is good as we say, You can pay attention to our website, once there has a discount, you can join in and purchase high pass-rate Exam 2V0-16.25 Lab Questions - VMware vSphere Foundation 9.0 Administrator test dumps at a lower price, Our 2V0-16.25 question torrent can simulate the real operation test environment to help you pass this test.

Scaling games without compromising performance, To help you with 2V0-16.25 New Dumps Files this, ask yourself the following questions, which can give you more insight into use cases: Why is the actor using the system?

## Fast Download Test 2V0-16.25 Dump | Easy To Study and Pass Exam at first attempt & Excellent VMware VMware vSphere Foundation 9.0 Administrator

Furthermore, our company respect the privacy 2V0-16.25 Test Engine Version of the customers, with our product, there is no need for you to worry about the problem. Also before you buy we provide you the 2V0-16.25 Practice Test free, many people want to see the dumps if it is good as we say.

You can pay attention to our website, once 2V0-16.25 there has a discount, you can join in and purchase high pass-rate VMware vSphere Foundation 9.0 Administrator test dumps at a lower price, Our 2V0-16.25 question torrent can simulate the real operation test environment to help you pass this test.

And our 2V0-16.25 preparation materials are applied with the latest technologies so that you can learn with the IPAD, phone, laptop and so on.
