NEW QUESTION # 37

Case Study 3 - Bellows College

Background

Bellows College is a post-secondary school that wants to start a football team. The college uses Microsoft Power Platform to manage its recruiting efforts. The registration team and assistants use model-driven apps. The coaches use canvas apps on their mobile devices.

Prospects are considered underage if they are younger than 18 years old at the time of registration.

Current environment

Environment

- Custom code is not allowed in the system.
- Server-side synchronization is configured for emails, appointments, contacts, and tasks.
- The database and file storage of Dataverse must be minimized to keep costs low.

Contact table

- Birthdate is a custom date and time field.
- Age at Registration is a calculated field that displays the age of the prospect at the time of registration.
- Current Age is a calculated field that displays the age of the prospect based on the current date and time.

Evaluation table

- The Evaluation table is a custom table used to track evaluation criteria.
- Evaluation records cannot be manually created.
- Users must not be able to continue until an evaluation record is created automatically for the prospect.

Consent table

- The consent forms completed by the parents are stored as records in the Consent table.
- Occasionally, a parent cannot complete the consent online and a paper copy must be printed.

The signed copy must be scanned and stored with the consent record.

Team website

- The team website is created by using Power Pages.
- A starter layout template was used to create the site.
- The site consists of five pages:
 - o Home: A page open to everyone to view the announcements from the team.
 - o Schedule: A page open to everyone to view the tryout and game schedule.
 - o Evaluations: A page that displays tracking from the evaluation table. Prospects are able to view their own information only.
 - o Forms: A page that displays the consent form.
 - o Contact Us: A page for anyone to submit questions and comments.
- Two web roles for authenticated users are created: Primary Contact User and Prospect User.
- o All primary contacts and prospects are assigned to their respective roles.

Requirements

Registration

- Parents and prospects are created as contacts and must be linked.
- The registration team must be able to rapidly create prospects without navigating away from the Parents form. Only the First Name, Last Name, and Birthdate fields should be displayed for the team.
- Assistants must be able to update prospect information and add teams that the prospect has previously played on to a subgrid.

Parental consent

- When a prospect is underage, a Primary Contact field will appear. The field must be populated before the prospect record can be saved.
- A view named Underage Prospects that lists all underaged prospects is required.
- The Underage Prospects view must run once a week without requiring modifications to display correct information.
- A consent email must meet the following requirements:
 - o be sent to the primary contact of each new underage prospect
 - o contain a link to the team website
 - o be automatically sent weekly and tracked to the contact record in Dataverse
 - o include the current date using the full month name, date, and year
- Coaches rate prospects each day on a scale of 1-10 in three categories: endurance, coordination, and skill.
- The total of the three categories is displayed at the bottom of the form. If the total for the day is greater than 25, the number should appear green.

Drag and Drop Question

You need to create forms required for the registration team and assistants.

Which form types should you create? To answer, move the appropriate form types to the correct roles. You may use each form type once, more than once, or not at all. You may need to move the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

NEW QUESTION # 38

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You are creating Power Virtual Agents chatbot that captures demographic information about customers.

The chatbot must determine the group a customer belongs to based on their age. The age groups are:

- * 0 - 17
- * 18 - 25
- * 26 - 35
- * 36 - 55
- * 55 - 100

You need to configure the chatbot to ask a question that can be used to determine the correct age group.

Solution: Create a custom Age group entity and synonyms for each individual age in the corresponding item. Use Age group for Identify in the question.

Does this meet the goal?

- A. Yes
- B. No

Answer: A

Integrate Power Apps with other apps and services

Question Set 1

NEW QUESTION # 39

You create a new solution for a business process.

The business process includes uploading specific file types to a web service.

You need to ensure that the business process works the same way anywhere the solution is deployed.

Which option should you use? To answer, drag the appropriate options to the correct configurations. Each option may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

Explanation

Box 1: Solution system settings

For Power Apps in Settings > Customizations > Customize the System you can configure email and document management, activate or deactivate processes, and more.

Box 2: Environment variable

When should Environment variables be used?

Some examples include:

When an input parameter needs to change across environments and should not be hard-coded. For example, a URL that points to a different resource in development and production environments.

If you're building a solution where your customer is required to provide an input value.

Application setup pages.

Incorrect:

A connection reference is a solution component that contains information about a connector.

NEW QUESTION # 40

You are using power Automate to create a list of customers from a Microsoft Excel file, The list must contain customers who meet one of the following criteria:

* Sales of less than \$500,000.

* Customers who are on credit hold.

You need to create a condition to filter the list Of customers.

How should you complete the filter condition? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point

Answer:

Explanation:

□ Explanation

Graphical user interface, application, Word Description automatically generated

□ Box 1: or

Or: Takes two arguments and returns true if either argument is true.

Box 2: equals(item()['credithold'],'true')

Equals: Returns true if two values are equal.

For example, if parameter1 is someValue, this expression returns true:

equals(parameters('parameter1'), 'someValue')
