DCPLA Reliable Test Dumps - DCPLA Reliable Test Cost

We know deeply that a reliable DCPLA exam material is our company's foothold in this competitive market. High accuracy and high quality are the most important things we always looking for. Compared with the other products in the market, our DCPLA latest questions grasp of the core knowledge and key point of the real exam, the targeted and efficient DSCI Certified Privacy Lead Assessor DCPLA certification study training dumps guarantee our candidates to pass the test easily. Our DCPLA Latest Questions is one of the most wonderful reviewing DSCI Certified Privacy Lead Assessor DCPLA certification study training dumps in our industry, so choose us, and together we will make a brighter future.

DSCI Certified Privacy Lead Assessor DCPLA certification Sample Questions (Q68-Q73):

NEW QUESTION # 68

What is a Data Controller?

- A. Entity that shares personal data with third parties

- B. Entity that stores personal data
- C. Entity that determines the purpose and means for data processing
- D. Entity that collects personal data

Answer: C

NEW QUESTION # 69

FILL BLANK

PIS

The company has a well-defined and effectively implemented security policy. As in case of access control, the security controls vary in different client relationships based on the client requirements but certain basic or hygiene security practices / controls are implemented organization wide. The consultants have advised the information security function to realign the company's security policy, risk assessment, data classification, etc to include privacy aspects. But the consultants are struggling to make information security function understand what exact changes need to be made and the security function itself is unable to figure it out.

(Note: Candidates are requested to make and state assumptions wherever appropriate to reach a definitive conclusion) Introduction and Background XYZ is a major India based IT and Business Process Management (BPM) service provider listed at BSE and NSE. It has more than 1.5 lakh employees operating in 100 offices across 30 countries. It serves more than 500 clients across industry verticals - BFSI, Retail, Government, Healthcare, Telecom among others in Americas, Europe, Asia-Pacific, Middle East and Africa. The company provides IT services including application development and maintenance, IT Infrastructure management, consulting, among others. It also offers IT products mainly for its BFSI customers.

The company is witnessing phenomenal growth in the BPM services over last few years including Finance & Accounting including credit card processing, Payroll processing, Customer support, Legal Process Outsourcing, among others and has rolled out platform based services. Most of the company's revenue comes from the US from the BFSI sector. In order to diversify its portfolio, the company is looking to expand its operations in Europe. India, too has attracted company's attention given the phenomenal increase in domestic IT spend esp. by the government through various large scale IT projects. The company is also very aggressive in the cloud and mobility space, with a strong focus on delivery of cloud services. When it comes to expanding operations in Europe, company is facing difficulties in realizing the full potential of the market because of privacy related concerns of the clients arising from the stringent regulatory requirements based on EU General Data Protection Regulation (EU GDPR).

To get better access to this market, the company decided to invest in privacy, so that it is able to provide increased assurance to potential clients in the EU and this will also benefit its US operations because privacy concerns are also on rise in the US. It will also help company leverage outsourcing opportunities in the Healthcare sector in the US which would involve protection of sensitive medical records of the US citizens.

The company believes that privacy will also be a key differentiator in the cloud business going forward. In short, privacy was taken up as a strategic initiative in the company in early 2011.

Since XYZ had an internal consulting arm, it assigned the responsibility of designing and implementing an enterprise wide privacy program to the consulting arm. The consulting arm had very good expertise in information security consulting but had limited expertise in the privacy domain. The project was to be driven by CIO's office, in close consultation with the Corporate Information Security and Legal functions.

Can you please guide the information security function to realign company's security initiatives to include privacy protection, keeping in mind that the client security requirements would vary across relationships? (250 to 500 words)

Answer:

Explanation:

The information security function of XYZ needs to realign the company's security initiatives to include privacy protection and make sure that it meets its client's requirements. The Information Security team must understand the legal and regulatory requirements for data privacy for each region in which XYZ operates, as well as industry standards such as ISO 27001/2 or NIST 800-53. This will help ensure that the organization is complying with applicable laws and regulations, while also helping build trust with clients by demonstrating that they take privacy seriously.

The Information Security team should also identify the most important risks associated with data privacy in order to determine what additional measures need to be taken in order to protect sensitive data from misuse or loss. The team should then assess the appropriate risk management and privacy controls to ensure that the data is being managed in a secure manner. This could include encryption of sensitive data, access control measures such as role-based permissions, and regular reviews of user access rights to ensure proper security protocols are being followed.

In addition, XYZ should create an internal privacy policy which outlines its commitment to protecting the privacy of customers and employees. The policy should be reviewed periodically to ensure it meets changing regulatory requirements and industry standards. The policy must also be communicated to all staff members so they know what their responsibilities are with regards to protecting personal data.

Finally, XYZ should have a robust incident response plan in place for when breaches or unauthorized access occur. This should cover procedures for detecting, investigating, and responding to potential data breaches. It should also include measures to prevent

future incidents and ensure that customer data is protected going forward.

By taking these measures, XYZ will be able to meet its client's security requirements while also demonstrating its commitment to protecting the privacy of their customers. This can help build trust with existing clients as well as new ones, making it easier for them to do business with the company. In addition, a comprehensive privacy protection program can help protect XYZ from costly legal or regulatory penalties in case of a data breach. Therefore, it is crucial for XYZ to invest in robust privacy protection initiatives in order to realize the full potential of the market.

NEW QUESTION # 70

Which of the following activities form part of an organization's Visibility over Personal Information (VPI) initiative, according to DSCI Privacy Framework (DPF)?

- A. 'Data processing environment' analysis of industry peers
- B. 'Data processing environment' analysis of the country
- C. 'Data processing environment' analysis of the organization only
- D. 'Data processing environment' analysis of the organization and associated third parties

Answer: D

Explanation:

The VPI practice area in the DPF emphasizes the importance of identifying personal data, understanding its flow, and assessing risks not only within the organization but also across third parties with whom data is shared or processed.

Therefore, analyzing the data processing environment of both the organization and associated third parties is critical to achieving visibility over personal information.

NEW QUESTION # 71

RCI and PCM

The Digital Personal Data protection Act 2023 has been passed recently. The Act shall be supported by subordinate Rules for various sections that will gradually bring more clarity into various aspects of the law.

First set of Rules are yet to be formulated and notified. A public sector bank has identified that it collects and processes personal data in physical documents and electronic form. The bank intends to assess its existing compliance level and proactively undertake an exercise to ensure compliance. Since this is the first time the bank is attempting to comply with a comprehensive privacy law, it has hired a legal expert in Privacy law to assist with initial assessment and compliance activities. As part of the initial visibility exercise the consultant identified that the bank collects and generates a significant amount of personal data in physical and digital form. The data may be upto 200 million customers' data. It is identified that customer onboarding is also done through various business correspondents in the field who collect and process personal data in physical and digital form on behalf of the bank for the purpose of opening bank accounts and this data is shared with the bank through various channels. There are upto 10 business correspondent companies that have been appointed by the bank across the country for such onboarding. These companies further appoint individual contractors on the field to face the customers. The legal consultant also identified that there are a huge number of employees and contractors engaged by the bank whose personal data is being collected and processed by the bank for HR purposes including biometric based attendance. While the intent of initial assessment was the new Act, the legal consultant has also identified that the Bank collects Aadhaar numbers (voluntary submission) from customers and employees and may be subject to Aadhaar Act compliance. It also came as a surprise that the bank wasn't aware of the data breach reporting mandate by one of the regulatory bodies under the Information Technology Act 2000 and that it was a criminal offense. The Bank generally outsources all non-core activities such as call centers which are handled by an Indian BPO company and document warehousing which is handled by another company. The Bank has also moved many of its applications to a known cloud provider as part of its digital strategy and there may be data transfer aspects associated with the same. On review of various contracts with third parties it was identified that the bank has signed standard terms of the cloud provider and has signed contracts with third parties which were in standard format of the third parties. Data protection obligations are not clear or available in these contracts. Bank leadership has been of the opinion that even the third parties should comply with the laws and robust contracts on legal compliance may not be needed. The legal consultant is not just expected to help identify gaps, assist in fixing the gaps but also to help implement controls and processes to continuously comply with evolving Rules under the new Act and also manage data protection with various third parties that may be appointed in the future.

(Note: Candidates are requested to make and state assumptions wherever appropriate to reach a definitive conclusion) Introduction and Background XYZ is a major India based IT and Business Process Management (BPM) service provider listed at BSE and NSE. It has more than 1.5 lakh employees operating in 100 offices across 30 countries. What steps should the legal consultant suggest to manage data protection for the existing third parties with whom there are existing contracts? Please also mention the various controls that should be implemented with these third parties to ensure continued compliance and monitoring Please answer with respect to the PCM practice area (upto 250 words)

Answer:

Explanation:

See the answer below in explanation.

Explanation:

To manage data protection risks associated with third-party engagements, the legal consultant should take a structured Privacy Contract Management (PCM) approach. This involves:

- * Conduct a comprehensive review of all third-party contracts (e.g., cloud provider, BPO, document warehouse, business correspondents).

- * Identify gaps related to privacy and data protection clauses (which are currently unclear or missing).

- * Categorize vendors based on risk level (data sensitivity, volume, criticality, location).

1. Contract Review & Risk Categorization:

2. Define Privacy Obligations in Contracts: Update or re-negotiate contracts to include:

- * Data Processing Clauses: Clearly outline roles (Data Fiduciary vs. Processor), purpose limitation, retention policies.

- * Breach Notification: Mandate immediate reporting of data breaches by vendors (as per IT Act & upcoming DPDP Rules).

- * Aadhaar Handling: For any third-party collecting Aadhaar, add compliance clauses for Aadhaar Act.
 - * Cross-border Transfers: Ensure compliance with Section 16 of DPDP Act, if data leaves India (e.g., via cloud provider).
 - * Audit Rights: Include rights to audit vendor privacy practices and security controls.
 - * Establish Third-Party Risk Assessments (TPRA) and due diligence during onboarding and periodically.
 - * Mandate privacy training for third-party staff handling personal data.
 - * Enforce technical and organizational controls: Encryption, access control, secure transmission.
 - * Implement a Vendor Monitoring Framework - regular privacy compliance checks, reporting, and corrective action tracking.
3. Implement Ongoing Controls:
- * Assign a Third-Party Privacy Officer or include the DPO in oversight.
 - * Maintain a Third-Party Data Processing Register (as required under DPDP Act).
4. Governance and Reporting:

NEW QUESTION # 72

The assessor organization can issue the DSCI certification to the assessee organization if it is satisfied with the assessment outcome.

- A. True
- B. False

Answer: A

NEW QUESTION # 73

.....

With our study materials, you do not need to have a high IQ, you do not need to spend a lot of time to learn, you only need to follow the method DCPLA real questions provide to you, and then you can easily pass the exam. Our study material is like a tutor helping you learn, but unlike a tutor who make you spend too much money and time on learning. As usual, you just need to spend little time can have a good commend of our study materials, then you can attend to your DCPLA Exam and pass it at your first attempt.

DCPLA Reliable Test Dumps: <https://www.itpass4sure.com/DCPLA-practice-exam.html>

DCPLA real dumps revised and updated according to the syllabus changes and all the latest developments in theory and practice, our DSCI Certified Privacy Lead Assessor DCPLA certification real dumps are highly relevant to what you actually need to get through the certifications tests, If you are so unlucky that fail in the test with DCPLA VCE dumps, we also keep the promise that returning all money to you or changing another test dump for you, You don't need to spend much time and energy in DCPLA Reliable Test Dumps - DSCI Certified Privacy Lead Assessor DCPLA certification exam review, just make most of your spare time to practice DCPLA Reliable Test Dumps - DSCI Certified Privacy Lead Assessor DCPLA certification review dumps, if you insist, it will easy for you to get high DCPLA Reliable Test Dumps - DSCI Certified Privacy Lead Assessor DCPLA certification passing score.

The Lower Subscreen, Password Recovery Issue, DCPLA real dumps revised and updated according to the syllabus changes and all the latest developments in theory and practice, our DSCI Certified Privacy Lead Assessor DCPLA certification Real DCPLA Dumps are highly relevant to what you actually need to get through the certifications tests.

Best Features of DSCI DCPLA PDF Dumps Format

If you are so unlucky that fail in the test with DCPLA VCE dumps, we also keep the promise that returning all money to you or changing another test dump for you.

You don't need to spend much time and energy in DSCI Certified Privacy Lead Assessor DCPLA certification exam review, just DCPLA Latest Dumps Free make most of your spare time to practice DSCI Certified Privacy Lead Assessor DCPLA certification review dumps, if you insist, it will easy for you to get high DSCI Certified Privacy Lead Assessor DCPLA certification passing score.

That is why I would recommend it to all the candidates attempting the DCPLA exam to use DCPLA exam preparation materials, Besides, we promise you full refund if you lose exam with our DCPLA test questions.
