ECCouncil 212-82題庫更新資訊：Certified Cybersecurity Technician和最新的ECCouncil認證培訓

根據過去的考試題和答案的研究，Testpdf提供的ECCouncil 212-82練習題和真實的考試試題有緊密的相似性。Testpdf是可以承諾您能100%通過你第一次參加的ECCouncil 212-82 認證考試。

最新的 Cyber Technician (CCT) 212-82 免費考試真題 (Q151-Q156):

問題 #151

A renowned research institute with a high-security wireless network recently encountered an advanced cyber attack. The attack was not detected by traditional security measures and resulted in significant data exfiltration. The wireless network was equipped with WPA3 encryption, MAC address filtering, and had disabled SSID broadcasting. Intriguingly, the attack occurred without any noticeable disruption or changes in network performance. After an exhaustive forensic analysis, the cybersecurity team pinpointed the attack method. Which of the following wireless network-specific attacks was most likely used?

- A. KRACK (Key Reinstallation Attack), exploiting vulnerabilities in the WPA2 protocol
- B. Evil Twin Attack, where a rogue access point mimics a legitimate one to capture network traffic
- C. Jamming Attack, disrupting network communications with interference signals
- D. Bluesnarfing, exploiting Bluetooth connections to access network data

答案：B

問題 #152

Leilani, a network specialist at an organization, employed Wireshark for observing network traffic. Leilani navigated to the

Wireshark menu icon that contains items to manipulate, display and apply filters, enable, or disable the dissection of protocols, and configure user-specified decodes.

Identify the Wireshark menu Leilani has navigated in the above scenario.

- A. Statistics
- **B. Capture**
- C. Analyze
- D. Main toolbar

答案： B

問題 #153

A company decided to implement the cloud infrastructure within its corporate firewall to secure sensitive data from external access. The company invested heavily in creating a cloud architecture within its premises to manage full control over its corporate data. Which of the following types of cloud deployment models did the company implement in this scenario?

- **A. Private cloud**
- B. Public cloud
- C. Multi cloud
- D. Community cloud

答案： A

解題說明：

Private cloud is the type of cloud deployment model that the company implemented in this scenario. Cloud computing is a model that provides on-demand access to shared and scalable computing resources, such as servers, storage, networks, applications, etc., over the internet or a network. Cloud computing can have different types based on its service or deployment model. A cloud deployment model defines how and where the cloud infrastructure and services are hosted and accessed. A cloud deployment model can have different types, such as public cloud, private cloud, hybrid cloud, community cloud, etc. A private cloud is a type of cloud deployment model that provides exclusive access to cloud infrastructure and services to a single organization or entity. A private cloud can be hosted within or outside the organization's premises and managed by the organization or a third-party provider. A private cloud can be used to secure sensitive data from external access and maintain full control over the corporate data. In the scenario, the company decided to implement the cloud infrastructure within its corporate firewall to secure sensitive data from external access. The company invested heavily in creating a cloud architecture within its premises to manage full control over its corporate data. This means that the company implemented a private cloud for this purpose. A multi-cloud is not a type of cloud deployment model, but a term that describes a strategy that uses multiple public or private clouds from different providers for different purposes or functions. A public cloud is a type of cloud deployment model that provides open access to cloud infrastructure and services to multiple organizations or entities over the internet. A public cloud can be hosted and managed by a third-party provider that owns and operates the cloud infrastructure and services. A community cloud is a type of cloud deployment model that provides shared access to cloud infrastructure and services to multiple organizations or entities that have common interests or goals.

問題 #154

Henry is a cyber security specialist hired by BlackEye - Cyber security solutions. He was tasked with discovering the operating system (OS) of a host. He used the Unkornscan tool to discover the OS of the target system. As a result, he obtained a TTL value, which indicates that the target system is running a Windows OS.

Identify the TTL value Henry obtained, which indicates that the target OS is Windows.

- A. 0
- **B. 1**
- C. 2
- D. 3

答案： B

解題說明：

128 is the TTL value that Henry obtained, which indicates that the target OS is Windows. TTL (Time to Live) is a field in the IP (Internet Protocol) header that specifies how long a packet can remain in a network before it is discarded or dropped. TTL is usually expressed in seconds or hops (the number of routers or gateways that a packet passes through). TTL is used to prevent packets from looping endlessly in a network or consuming network resources. Different operating systems have different default

TTL values for their packets. By observing the TTL value of a packet from a target system or network, one can infer the operating system of the target. Some common TTL values and their corresponding operating systems are:

- * 64: Linux, Unix, Android
- * 128: Windows
- * 255: Cisco IOS
- * 60: Mac OS

In the scenario, Henry used Nmap tool to discover the OS of the target system. Nmap (Network Mapper) is a tool that can perform various network scanning and enumeration tasks, such as port scanning, OS detection, service identification, etc. Nmap can use various techniques to detect the OS of a target system, such as TCP/IP fingerprinting, which involves analyzing various TCP/IP characteristics of packets from the target system, such as TTL value. In the scenario, Henry obtained a TTL value of 128, which indicates that the target OS is Windows.

問題 #155

Zion belongs to a category of employees who are responsible for implementing and managing the physical security equipment installed around the facility. He was instructed by the management to check the functionality of equipment related to physical security. Identify the designation of Zion.

- A. Supervisor
- B. Safety officer
- C. Chief information security officer
- **D. Guard**

答案： D

解題說明：

It identifies the designation of Zion. A guard is a person who is responsible for implementing and managing the physical security equipment installed around the facility. A guard typically performs tasks such as:

- Checking the functionality of equipment related to physical security Monitoring the surveillance cameras and alarms
- Controlling the access to restricted areas
- Responding to emergencies or incidents

In the above scenario, Zion belongs to this category of employees who are responsible for implementing and managing the physical security equipment installed around the facility.

問題 #156

.....

擁有 ECCouncil 認證可以證明考生能夠勝任這個職位。往往能力強的考生嘆息道：“如果可以擁有本證書，這個職位鐵定是我的。”那為什麼不儘早讓考試順利過關了。越早擁有 ECCouncil 認證，可以比別人多一份選擇理想工作的。但是如何能順利過關完成 ECCouncil 認證成了技術人員最頭疼的問題。如果你需要幫助，Testpdf 能幫助每個 IT 人士，因為它的 212-82 測試題庫和 212-82 學習指南可以幫助你通過真正的考試。

212-82 在線題庫 : <https://www.testpdf.net/212-82.html>

我們的 ECCouncil 212-82 題庫的命中率高達 100%，可以保證每個使用過 212-82 題庫的人都順利通過考試，IT 認證網提供最新的 IBM 認證 212-82 考試題庫，保證您壹次輕鬆通過 IBM 考試，不過全額退款，我對我們的產品有信心，相信很快 ECCouncil 212-82 題庫及答案就會成為你的不二之選，將 Testpdf 212-82 在線題庫的產品加入購物車吧，Testpdf 212-82 在線題庫可以在互聯網上為你提供 24 小時線上客戶服務，想要通過 ECCouncil 212-82 認證考試其實也沒有那麼難，關鍵在於你用什麼樣的方式方法，而最新的 212-82 考試題庫培訓資料是個不錯選擇，ECCouncil 212-82 題庫更新資訊 這是你輕鬆通過考試的最好的方法。

老頭很是驚訝以為恒弘會提更高的要求呢，沒有想到只是要自己騎寵的體液，這壹刻，眾人全都驚喜不已，我們的 ECCouncil 212-82 題庫的命中率高達 100%，可以保證每個使用過 212-82 題庫的人都順利通過考試，IT 認證網提供最新的 IBM 認證 212-82 考試題庫，保證您壹次輕鬆通過 IBM 考試，不過全額退款！

免費 PDF 212-82 題庫更新資訊擁有模擬真實考試環境與場境的軟件 VCE 版本 & 可信賴的 212-82 在線題庫

我對我們的產品有信心，相信很快 ECCouncil 212-82 題庫及答案就會成為你的不二之選，將 Testpdf 的產品加入購物
